

## Sydney Microscopy & Microanalysis Fee Schedule - 3View SBF SEM

Effective from 1 January 2017

### 3View Serial Block Face Scanning Electron Microscope:

Our fees and workflow for the 3View SBF SEM along with anticipated time-frames for each stage of your experiment are outlined below.

	Staff assisted sample preparation	Staff assisted 3View SBF SEM set-up & imaging
University of Sydney	\$ 390	\$ 488
Publically funded research organisations	\$ 780	\$ 488
Commercial	\$ 1560	\$ 488

#### Sample Preparation – 1 week

- Our technical staff can do the sample preparation for you.
- Alternatively, if you have TEM biological sample preparation experience we can assist with the 3View specific steps.
- Samples are typically batch processed every 2-4 weeks.

## Sydney Microscopy & Microanalysis Fee Schedule - 3View SBF SEM

### 3View SBF SEM Imaging – 1 to 5 days

- This generally takes place the week following sample preparation, depending on instrument and staff availability.
- Before your imaging session commences it's important to advise us of the lateral and axial resolution required, field of view, total depth/volume, frequency of event.
- Extra charges may apply for complex samples or long scan times.

### Data Transfer, Storage and Archiving – 2 to 5 days

- Each 3View data set can range from 5-50 GB, not including analysis.
- University of Sydney staff and students can request space on the Research Data Store [Click here for more details](#)
- When you request space please add Minh Huynh to your project to enable her to transfer your data to your RDS allocation.
- External users must provide an external hard drive at the first imaging session.

### Image Visualisation and Analysis – 1 to 6 months

3View data sets are large and standard computers will not be able to open your data set at full resolution. SMM offers access to workstations and image processing software to analyse your data.

For help with visualisation or analysis contact Dr Matt Foley [matthew.foley@sydney.edu.au](mailto:matthew.foley@sydney.edu.au).
