Are you interested in designing the built and virtual space around you? Our graduate programs cover everything from mobile phones to urban centres, from loudspeakers to sustainable design. And at Sydney you choose how far into a field you want to dive, from individual units to graduate certificate, diplomas and master’s degrees, so that your study meets both your personal and professional needs.

**EXPLORE YOUR PASSION FOR DESIGN**

**GRADUATE OPTIONS IN 2010**

Are you interested in designing the built and virtual space around you? Our graduate programs cover everything from mobile phones to urban centres, from loudspeakers to sustainable design. And at Sydney you choose how far into a field you want to dive, from individual units to graduate certificate, diplomas and master’s degrees, so that your study meets both your personal and professional needs.

**COURSEWORK PROGRAMS INCLUDE:**

**Master of Architecture**
2 year professional degree for architecture graduates that continues the path to professional accreditation.

**Audio and acoustics**
Blends creative, technical and scientific approaches to sound, giving you expertise in your choice of acoustics, audio systems or audio production. The only program of its kind in Australia.

**Building Services**
Covers the operation of the various services systems in buildings and the implication of these on building design.

**Facilities Management**
Provides an understanding of business finance and management information as well as the technical areas of building management.

**Heritage Conservation**
Covers the assessment, interpretation, management, formulation of policy, and documentation of culturally significant places, buildings, sites and landscapes.

**Illumination Design**
One of only a few programs in the world providing architects, interior designers and other professionals with multidisciplinary lighting and design process knowledge.

**Interaction Design & Electronic Arts**
The IDEA program is the first of its kind in Australia to explore how humans behave and interact with computers and the merging of art, technology and culture.

**Sustainable Design**
Explores the sustainability of the built environment with an understanding of the principles underpinning sustainable design.

**Urban Design**
Addresses emerging design issues as well as essential morphological, ecological, cultural and other dimensions of urbanism for graduates in architecture, landscape architecture or urban planning.

**Urban & Regional Planning**
Covers the foundations of urban and regional planning, with the option to develop more specialised knowledge in related areas, such as environmental design and sustainable management.

**Combined degree**
Combine 2 master’s degrees within the faculty or even with programs from Economics and Business fields.

**RESEARCH**
We offer you extensive opportunities and facilities to undertake a research program, leading to either an MPhil or PhD, within the disciplines of:

- Architecture & Allied Arts
- Architectural & Design Science
- Design Lab
- Urban & Regional Planning & Policy
INFORMATION NIGHT
The Faculty of Architecture, Design and Planning is holding an information night on Tuesday 20th of April, from 5.30pm.
This is your opportunity to join fellow students and professionals in discovering the range of graduate study options on offer from across the various built environment and design disciplines.

Coursework options
Whether you want to enhance your knowledge in your existing field or develop expertise in a new discipline, the informal evening provides you with the perfect opportunity to chat with the academics who teach the programs and to discuss the various study options that are available to meet your specific education and professional needs.
You can discuss your eligibility for entry, any assumed knowledge prior to commencing each program, and the type of skills and attributes you will have gained on completion.
Many of our coursework options include intensive block mode and evening classes, allowing you to juggle both work and study, and range from an individual subject to graduate certificates and diplomas, to complete master’s degrees.

Research opportunities
Come to the information night to discuss opportunities to pursue research degrees in our four disciplines: Architecture & Allied Arts; Architectural & Design Science; Design Lab; Urban & Regional Planning & Policy.
You may elect to research in any of these fields, or to pursue interdisciplinary studies in a combination of fields with the faculty or between the faculty and elsewhere in the university.
All of our graduate programs have a July intake.

ABOUT THE NIGHT
The information night is an informal evening in which you can discuss your options with staff from throughout the faculty, including academics across all of our programs and admissions experts. You may submit your application on the night if you bring appropriate documentation along - see our website for admissions procedures.

Where: The Hearth, Wilkinson Building, 148 City Road, The University of Sydney
When: Tuesday, 20th of April, from 5.30 to 7.30pm
Registrations
For more information or to register to attend this event please contact Jonathan Hulme, Communication and Engagement Officer, on 9351 2686 or email jonathan.hulme@sydney.edu.au
