Architectural Science Review
Volume 49, Number 2, June 2006

Contents

Editorial
Gary T. Moore

A Systematic Approach for Fire Safety Audits in Health-Care Facilities
Mohammad A. Hassanai and Mohammed Sai

Acceptable Illumination Levels for Office Occupants
K. W. Mui and L. T. Wong

Characteristics of the Environmental and Energy Behaviour of Contemporary Urban Buildings in Greece
N. Papamichael

Qualitative and Quantitative Evaluation of Energy Conversation Measures (ECM) Over Baseline as Given by ASHRAE
Hayce Sozer and Mahfouj Elmimeiri

Lessons from Managing Design-Build Construction Projects in Hong Kong
Edmond W. M. Lam, Albert P. C. Chan, and Daniel W. M. Chan

A Method for the Preservation and Restoration of the Stones Used in Historical Buildings
S. Acun and N. Arıoğlu

Designing Concrete Precast External Wall Components on Multi Storey Steel Structures According to Modular Co-ordination
Ozlem Essiz and Ilkay Koman

Determination of Acceptable U-values for Naturally Ventilated Residential Building Façades in Singapore
N.H. Wong and S. Li

Comparison between Three Different Methods for Calculating Average Daylight Factor Values in Atrium Buildings
Swinal Samant and Benachir Medjdoub

The Acoustical Performance Analysis of Bilkent Amphitheater: Proposal for Acoustical Renovation
Zührü Süt and Semilla Yılmazer

Comfort Temperatures for Naturally Ventilated Buildings in Hong Kong
V. Cheng and E. Ng

Relation Between Building Envelope and the Operational Period of Heating Systems
Gülen Manioglu and Zerrin Yılmaz

Barriers to Applying the Design-build Procurement Method in Hong Kong
Edmond W. M. Lam, Albert P. C. Chan, and Daniel W. M. Chan

What Principals of Firms say an Architect Needs to Know: International Comparisons
Andrew D. Seidel, Gordon Holden, and Taner R. Özdiil

ARCHITECTURAL SCIENCE REVIEW

Aims and Scope: Architectural Science Review is an international refereed journal devoted to the science of architecture and the built environment. ASR publishes submissions of original research papers, review articles, and research notes in all areas of architectural science including building science and technology, environmental science, ergonomics, environmental sustainability, building economics, structural, transport, acoustic, thermal systems, building services, building climatology, history and theory of building science and technology, and social sciences of architecture and the built environment. ASR encourages submissions from all countries. All papers and review articles are peer refereed. Shorter contributions may be submitted as research notes or communications. ASR also publishes extensive book reviews and occasional editorials.

Editor Emeritus
Professor HJ Cowan, AO, Professor Emeritus of Architectural Science, The University of Sydney

Editor-in-Chief
Professor Gary T Moore, RAAIA PIA PAPA, Professor of Environment Behaviour Studies, The University of Sydney

Associate Editors
Dr Simon Hayman, Associate Editor (Environmental Sustainability)
Professor Warren Julian, Associate Editor (Environmental Sciences)
Honorary Associate Professor Peter Smith, Associate Editor (Building Sciences, Technology and Economics)

Book Review Editor
Professor HJ Cowan

Editorial Assistant & Production Manager
Honor Morton

Honorary Editorial Advisory Board
Professor P O Fanger, International Centre for Indoor Environment and Energy, Technical University of Denmark
Professor Jack Greenland, Energy Research Centre, University of Technology Sydney, Australia
Professor Paolo Guerra, Institute for the Construction of Buildings, University of Naples, Italy
Dr BK Sama, Central Building Research Institute, Bovkend, India

Editorial Advisory Board
Dr Mohamed Ahdel-Kader, Department of Architecture, Planning and Urban Economics, Cairo University, Egypt
Dr Richard M Ayres, Director of Research and Development, Delta Corporation, Lexington, USA
Professor Chew Li Lu, Vice-Dean (Research), School of Design, National University of Singapore, Singapore
Professor W-K Cho, Department of Building Services Engineering, Hong Kong Polytechnic University, China
Professor Anja Chuhan, Faculty of Architecture and Town Planning, Technion Institute of Technology, Israel
Professor Gary Bayo, Department of Design and Environmental Analysis, Cornell University, USA
Dr Marjanje de Jong, School of Pedagogy, Malmo University, Sweden
Professor Paul Fazio, Building Performance Laboratory, Centre for Building Studies, Concordia University, Canada
Professor Ordinarius Karl Germs, Department of Constructive Building Physics, Stuttgart University, Germany
Professor Robert Gifford, School of Environmental Studies, University of Victoria, Canada
Professor Reginald G Godlee, Department of Geography, University of California, Santa Barbara, USA
Professor Richard Hoog, ARUP Australia, Sydney, Australia
Professor Santiago Huerta, Department of Construction, Technical University of Madrid, Spain
J Derrick Kendall, School of Architecture, University of Adelaide, Australia
Professor Kentshi Kuma, International Research Institute on Human Environment, Tokyo, Japan
Professor Ross King, Faculty of Architecture, Building and Planning, University of Melbourne, Australia
Dr Richard Kinder, Institute of Construction and Architecture, Skolov Academy of Science, Slovakia
Dr J C Lam, Department of Construction and Building, City University of Hong Kong, China
Professor Rudolf K L, Lawrence, Faculty of Social and Economic Sciences, University of Geneva, Switzerland
Professor Lui Lin, College of Architecture and Urban Planning, Tongji University, China
Professor William J Mitchell, Director, Media Arts and Sciences Smart Cities Research Group, MIT, USA
Professor Jack N. Lazar, Department of City and Regional Planning, Ohio State University, USA
Professor Douglas Noble, Leavitt Graduate Building Science Program, University of Southern California, USA
Professor Bijuline OJ, Dean, Faculty of Art, Design and Architecture, Bilkent University, Turkey
Professor Jens Pohli, Collaborative Agent Design Research Center, California Polytechnic State University, USA
Professor Wolfgang F Preiner, School of Architecture and Interior Design, University of Cincinnati, USA
Professor Anthony J Radford, School of Architecture, University of Adelaide, Australia
Professor Eleni Ros, School of Natural and Rural Systems Management, University of Queensland, Australia
Professor Stephen Sharpley, Environmental Design and Sustainability, University of Sheffield, England
Professor Ehsa Shari, Heat, Climate and Energy Laboratory, Technion Israel Institute of Technology, Israel
Professor Drattention Seemann, Director, Martin Centre for Urban Studies, University of Cambridge, England
Dr Steven V Sizemore, Honorary Associate Professor of Architecture, University of Queensland, Australia
Professor Emeritus Peter G Tregenza, Department of Architecture, University of Sheffield, England
Professor Brenda Vale, School of Architecture, University of Auckland, New Zealand
Professor Jacqueline Visher, Faculty of Environmental Design, University of Montreal, Canada
Dr Xu Leiping, College of Architecture and Planning, Tongji University, China
Dr Mohammad Ali Yaghan, Dean, College of Architecture, University of Petra, Jordan
Professor Zeng Shiting, Anhui School of Management, Shanghai Jian Tong University, China

Information for Authors

Preparation of Manuscripts: The Architectural Science Review adopts the Harvard, APA or Royal Society publication style. This is very similar to the ASR style with minor changes and variations (below). For assistance, see http://www.copyright.ca/ (and Adobe Photoshop). Papers should be prepared at a 12 pt double-spaced font. Figures, tables and diagrams should be inserted in the text at appropriate places and numbered consecutively. Figures should be less than 30 cm wide, and should be created using high resolution graphic software (such as Adobe Illustrator). The majority of figures and tables should be in black and white. The editing of tables and figures is the responsibility of the authors. Papers should be submitted as a 12 pt double-spaced Word document. Create formulae in Word’s Equation Editor, MathType or Expressionist. Use Word’s Table for formatting tables. The preferred format for pictures is TIFF or PICT, and for graphs EPS or PICT, but the following formats are also supported: BMP, (IM, DCS, EPS, EPS, GIF, GIF, JPEG, JPG, PICT, PICT, PAC, PNG, PDF, PDF, PNG, JPEG, Tiff, Tiff, Adobe Illustrator (AI) and Adobe Photoshop (PSD)). Indicate the preferred colour here: &. English spelling may be in accordance with the Oxford English, Macquarie or Webster’s (USA) dictionaries. Organise the manuscript in the following order: Cover page with title, authors and affiliations; next page with Title (no author’s names or affiliations). Abstract and keywords begin with the text of the paper itself. Acknowledgements (if any), References, Tables, Figure Captions and Figures. There is no page or word limit, but most papers are 8-10 published pages, i.e., approximately 6000-8000 words plus tables and figures, shorter is better, with fewer words if there are more tables or figures.

Language Editing: International Science Editing and Asia Science Editing provide English language services to authors who need assistance for submission or during revision for publication. Authors can contact these services directly at http://www.internationalscienceediting.com and http://www.asiascienceediting.com. Please note that ASR neither endorses nor takes responsibility for any products, goods or services offered by outside vendors.

Submission: All manuscripts are to be submitted electronically to asrsubmissions@arch.usyd.edu.au with “ASR Submission” in the subject line. Submit tables and figures as separate pages at the end of the manuscript but in the same file. Submit a complete PDF of the manuscript including tables and figures. If you do not have access to email, send one hard copy of the manuscript accompanied by a CD containing the Word text, tables and illustrations file and PDF file to ASR Journal at the above address.

Corresponding Author: Indicate who is responsible for correspondence at all stages of refereeing and publication (not necessarily the first author). Provide a current e-mail address for the Corresponding Author in addition to telephone and fax numbers (with country and area codes) and complete postal address information.

Original Material: Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of an academic thesis), that it is not under consideration for publication elsewhere, that its submission is approved by all authors, and that, if accepted, it will not be published elsewhere in the same form in English or in any other language without the written consent of the Publisher.

Style Changes and Variations: As an ASR is a double-blind refereed journal, include a cover page with paper title, author(s) name(s) and affiliations, and full postal addresses. International telephone, fax and e-mail addresses for each author must be given, and, if available, their research interest. Papers may have different affiliations, identify them by superscripts (** ** **), etc., with the corresponding author indicated by a dagger (†). Start the next page with a 100 word abstract that summarises the intent, methods, findings and conclusions, and up to six key words. Do not identify the author(s) or affiliations in any way in the remainder of the paper. Headings should not exceed three levels – title, main headings and secondary headings – all three in Capital and lower case, with the title and main headings in bold face, secondary headings in bold face and lower case. Tables should be numbered and have an 11 pt caption above, adequate to inform the reader. Illustrations should be numbered separately and have a caption underneath in 11 pt, to aid the reader find the right reference. International metric units of SI should be used (conversions to imperial units may be given in parentheses). American authors may use imperial units (but must convert them to metric, if units in parentheses). Footnotes and endnotes are to be avoided. Abbreviations should be explained in full when first used (with the abbreviation in parentheses). If there are many abbreviations, give a list as a boxed table or appendix. Symbols should be explained when first used, and if there are many, should be listed and defined in a box or appendix. Avoid the use of mathematics that is difficult to typeset (divisions of square roots, etc.). A text parenthesis at square root (‘ ’) or a division bar (‘ ‘) will simplify publishing. Cited references should be accessible to readers, that is, in internationally recognised journals that can be found easily. All references are to be in the APA Harvard in text format (eg, Julian, Hayman & Smith, 2006). Books, titles, journals and published conference proceedings are to be in Capital and lower case Italic, not underlined. Include the city, publisher and the year of publication for all non-journal references. (If a reference is not in English, translate the title into English in parentheses). Do not reference unpublished papers or reports, nor papers or books in languages that are unlikely to be known to a majority of readers.

Additional Materials: Computer printouts, tables of raw data, appendices and colour illustrations will not be published, but an indication may be given in the article where auxiliary data may be obtained.

Editorial Rights: The Editor reserves the right to return manuscripts that do not conform to the Information for Authors, or do not fit the scope of the journal, and to make final copy-editing changes in accordance with international editing conventions.

Editorial and Publishing Offices: Faculty of Architecture, University of Sydney, Sydney, NSW 2006, Australia.
