GLENN MURCUTT INTERNATIONAL MASTERCLASS 2006

The Sixth Glenn Murcutt International Architecture Masterclass will take place from 10 - 21 July 2006, led by Glenn Murcutt, with tutors including Richard Leplastrier, Peter Stutchbury and, the Masterclass Convener, Lindsay Johnston.

20 (TWENTY) U.Syd BArch 4\textsuperscript{th} Year students will be selected to join the second week of the Murcutt Masterclass, which will take place from Monday 17 July to Friday 21 July in the Design Studios of the Wilkinson Building.

The selected students will work with the 30 international visitors, who are practitioners, academics, postgraduates and senior undergraduate students from many countries. The Masterclass is intensive, and will involve working every day, from early morning until late at night. Satisfactory completion of the week’s work, plus a further week of development and documentation of the project, as agreed with Prof Tom Heneghan and Dr Peter Armstrong, will earn 6 credit points.

Two additional USyd students will be selected to be full participants of the Masterclass over the full two week program, from 10 July to 21 July – the first week spent living and working in the Arthur Boyd Centre, designed by Murcutt, Lewin and Larke at Bundanon. Satisfactory completion of the two-weeks work, plus documentation, will earn 6 credit points.

The 20 students joining for the second-week will be allocated to the design-groups that have been formed during the first week of the Masterclass. The responsibility of each U.Syd student will be to assist their group to develop the design proposals they have developed in outline during the previous week by enthusiastically and collaboratively joining in discussions and tutorials and by assisting with drawing and model making, and in the final presentations. This work will be collaborative and supportive, not individual.

Those interested should send expressions of interest, on paper, to Kim Pagett to pass to Prof Heneghan. Please indicate whether you wish to be considered for the second week only, or for both of the two weeks. Further information on the Masterclass can be found at: www.ozetecture.org

Wilkinson Building - 17 - 21 July 2006

This is a unique opportunity to work under the guidance of an exceptional group of architects.
