Following the enormous success of last year’s studio, altogetherelsewhere announce Urban Islands 2007, introducing to Sydney three emerging international practices:

**Morphogenesis** - India
www.morphogenesis.org

**Supersudaca** - 5th America
www.supersudaca.org

**Studio Sumo** - USA
www.studiosumo.org

Cockatoo Island in the Sydney Harbour will be the site for the design investigations, as well as the location for the studios themselves. The workshops will generate new cross-disciplinary visions for the island and create real interventions for re-inhabitations of this unique place.

Students from UTS, UNSW and USYD will have the opportunity to work collaboratively along with some of the world's most innovative and emerging architects, through a range of studios, lectures, symposia and informal gatherings.

Applications are encouraged early, as limited places are available. Successful applicants will be contacted as soon as possible. Further to contact, enrolment will be handled through each individual University. Go to:
