The geography of human-other animal encounters matters. Places and spaces have politics and imaginaries that entangle multi-species pasts and futures and continually reposition human and non human subjects. In this seminar we examine aspects of how human-other animal relations intersect with geographies of settlement in Australia. We focus on inside / outside relations, exploring the way that non human others shape the geo-political and biopolitical borders of our selves, cities and nation.

**HARN SEMINAR**

**NORTH/SOUTH: HUMAN/ANIMAL**

**Wednesday 22 May, 2-3.30 pm**

**HUMAN ANIMAL RESEARCH NETWORK**

**DR CHRIS DEGELING (VELIM)**
*Fantastic Invasion: Biological Insecurity and the Moral Standing of Hendra Virus*

**DR DINESH WADIWEL (SOCIOMETRY)**
*Saving ‘Our’ Cattle: Race and Animal Advocacy*

**ASSOC PROFESSOR TESS LEA (GCS)**
*Mosquito architecture: how things that bite shape cities*
