ABOUT HARN
The Human Animal Research Network (HARN) at the University of Sydney is an interdisciplinary and cross-Faculty research group comprising members from the Faculty of Arts and Social Sciences, Faculty of Science, Faculty of Veterinary Science and the Faculty of Law. From the perspectives of Science, Law, Veterinary Science and the Humanities, both the 'animal' and the 'human' carry different meanings and unique philosophical genealogies, and much can be learnt when these perspectives interact, consult, teach and learn from each other. HARN aims to promote cross-disciplinary dialogue within the university and between the university and community groups, international human animal studies organizations and other Australian University based organizations.

Enjoying a rapid growth within the Academy, both here and internationally, Human Animal Studies addresses and is also inspired by everyday interactions with animals. These might include conservation issues, animal welfare, the meaning of humane research, the roles of zoos and wildlife parks, questions relating to why relationships to pets seem 'different' to feeling for other animals; why some animals have protective legislation and others do not; why some of us eat particular animals but not others; why being 'an animal' is akin to denigration, and what cruelty to animals says 'about us'. Human Animal Studies thus brings both human and animal together, while often interrogating the history of those two terms.

SPEAKERS:
PROFESSOR PAUL MCGREEVY
Faculty of Veterinary Science, Sydney
Flogging a Tired Horse

CELESTE BLACK
Sydney Law School
'Plowing by the Tayle': Horse Welfare and the Law

ASSOC PROFESSOR PHIL MCMANUS
School of Geosciences, Sydney
Thoroughbreds: breeding, racing and beyond

CHAIR: DR FIONA PROBYN-RAPSEY
Department of Gender and Cultural Studies, Sydney

Drinks to follow at the Bar at the corner of New Law School.
All Welcome.
