CRU Consulting Internship – Sydney

CRU Consulting is the consultancy arm of the CRU Group and delivers approximately 150 projects per year across a wide section of clients in the mining, metals, fertilizers and chemicals industry. Many of our projects are related to valuation and strategy decisions faced by our clients. We provide value to our clients through accurate data, insightful analysis and timely delivery. Through continued growth in our client base and expansion of our services, 2017 summer internship positions are available.

As an intern, you will work on separate projects on a part time basis within our teams, reporting to and receiving guidance and feedback from the Project Manager and/or Project Director. Projects might be external for clients or internal to improve and maintain our intellectual property.

Skills developed while working as an intern could include analysing complex data, problem solving, contributing to marketing, preparing high quality presentations and writing clear reports. Interns will also get used to the professional business environment of a dynamic consulting company.

Interns are encouraged to attend company-wide presentations given by (among others) the in-house CRU Group Economics team; CRU commodity experts; CRU Consulting marketing meetings, etc. as these occur.

**Essential criteria**

- Undertaking a relevant first or further degree in Economics/Commerce or in a similar field
- An interest in commodities, their markets and their businesses
- Exposure and interest in marketing strategy would be an advantage
- A professional attitude to work and the office environment
- Good writing skills
- A clear and confident communicator
- An inquisitive mind
- Strong numeracy and analysis skills. Ability to use a framework to critically analyse data and identify trends and key drivers
- Strong commercial awareness
- Excellent attention to detail. Drive to ensure accurate and well presented work
- Working knowledge of Excel, PowerPoint and Word
- Willingness to embrace change and work as a team player
- Fluent English required. A second language such as Russian or Chinese would be an advantage

**Desirable criteria**

- Double degree or Higher Degree Research student
