4. Referencing checklist .............................................................................................................30
1. How to use this guide

Once you are familiar with this guide and the basics of referencing, you will mainly refer to section 3 which gives examples of how to reference a wide variety of sources. Use the table of contents on page 1 to quickly locate the type of source you are referencing.

Section 1 introduces you to some common words and terms used in referencing and in this guide.

Section 2 shows you how to reference according to the way you are using source material, and the rules for handling the most commonly encountered referencing tasks.

Finally, the last page of this guide is a referencing checklist. Please use it before you submit your assignment.

Some referencing terms and rules

Harvard referencing style

The Harvard referencing style consists of two parts. First, an in-text reference giving the author, publication date and in some cases a page number, of your source of information. This is enclosed in parentheses and placed within a sentence, for example: (Thorpe 2011, p. 21). Second, a reference list at the end of your assignment, sorted in alphabetical order and containing sufficient information to allow a reader to accurately and quickly locate your sources.

There are many variations of the Harvard system. These differ in their precise specification of how in-text references and reference list entries are to be formatted, and the information required to be shown in the reference list for each of the many different types of sources.

All your assignments written for The University of Sydney Business School must use The University of Sydney Business School Referencing Guide (BSRG).

A paraphrase means saying something in another way without changing its meaning, for example, using your own words to express the ideas of an author. A paraphrase may or may not be shorter than the original.

A summary is similar to a paraphrase except it is always much shorter than the original. Summarising involves ‘compressing’ large amounts of information into usually no more than a few sentences. It involves picking out the main ideas, leaving out the details, and putting the main ideas into your own words.

A quotation involves reproducing the exact words from a source. Quotations must be carefully selected and copied from the original source material, and should be sparingly used to support your arguments or the key points you wish to make.

If you wish to use a short quotation, you must put single quotation marks (‘ ’) around the words of the original author and integrate the quotation into your sentence.

For long quotations (over 30 words) single quotation marks are not used. Instead you must indent the quote from the left and right margins.

You use double quotation marks (“ ”) only when referencing a quotation which includes a quotation.

Important: Make sure you include the author’s family name (or the source’s name) and year of publication every time you paraphrase, summarise or quote.

Note: When paraphrasing a specific part of a text (as opposed to summarising an entire text) or using a quotation, you must also include the page number(s) from which the material was taken (unless the source is a web page or from multimedia).
2. Examples – when and how to reference

You must reference any information or ideas that you use in your assignments which are not your own and which are not general knowledge.

2.1 Placement of in-text references

In-text references must be placed within a sentence. That is, they must be placed before the full stop.

There are two ways of formatting in-text references: Author (Date) and (Author Date).

The first format is used to emphasise the author. It is often used when comparing studies or information from different sources. Usually, one author's name is near the beginning of a sentence. For example:

According to Jones (2007) ... . However, a more recent study by Henderson (2011) showed that ...

The (Author Date) format is used to show the source of the idea or information you are using. The reference should be placed immediately after the idea or information that you have used. It is often placed at the end of a sentence. When using more than one source in a sentence, each reference should be placed immediately after the idea or information you have used. For example:

Mergers and acquisitions often fail to achieve expected synergies (Crannock 2008), but when their goals, and the strategies to achieve them, are objectively assessed, they are much more likely to lead to growth and increased shareholder value (Benson and Hodge 2010).

2.2 Summarising a source

When you summarise a source, the in-text reference should be placed near the beginning of the very first sentence of the paragraph. The first and second sentences should very clearly indicate that you are writing about the source. For example:

Lane (2008) does not agree with the critics of state-led capitalism in Russia. Instead he thinks that the Putin model, while not perfect, is a realistic way to develop Russia's resources for the following three reasons. First, it is based on the strong and accepted influence of the state in the private sector. Second, he believes that this form of state-led capitalism is a great improvement on the ‘chaotic’ capitalism that characterised the early period of transition. Finally, he concludes that there will not be any great re-nationalisation of industry.

Reference list

2.3 Paraphrasing a source

When you paraphrase a specific part of a source (as opposed to summarising the entire text), the in-text reference must include a page number or numbers showing where the material came from. For example:

The Allen Consulting Group (2006, p. 1) presented a convincing argument that skills matter to employers.

Reference list
2.4 **Short quotation**

Quotations of less than about 30 words are always integrated within your own sentence. Whenever you quote, you must use your source’s exact words, and in the in-text reference you must include the page number where the quoted words were found. For example:

Many questions have been raised about issues concerning ‘skills and skill development’ (Fenwick and Hall 2006, p. 571).

**Note:** The only exception to this rule is when your source is a web page and/or has no page numbers.

**Reference list**

2.5 **Long quotation**

Long quotations, typically those longer than about 30 words, must be indented from both margins. Word users can do this by applying the built-in style ‘Block Text’ (but note you may have to modify the default style to remove borders and italicisation).

There has been some debate within the academic community in recent decades about how to best define the term globalisation. Given how contested this term has become, the following definition of globalisation will be used in this assignment:

Globalisation involves the creation of linkages or interconnections between nations. It is usually understood as a process in which barriers (physical, political, economic, cultural) separating different regions of the world are reduced or removed, thereby stimulating exchanges in goods, services, money, and people (Hamilton and Webster 2009, p. 5).

**Reference list**

2.6 **Quoting reported speech**

Sometimes you may want to quote the words spoken by a person as reported in a newspaper or news source. To do this, give the title and name of the person, and reference the source as usual. For example:

Harvey Norman Executive Chairman Gerry Harvey recently stated that ‘there are more retailers currently under pressure than I’ve ever seen’ (Kruger 2012).

**Reference list**

2.7 **Modifying quotations**

Sometimes you may need to modify a quotation by changing or inserting one or more words either to make it grammatically correct within your own sentence, or to clarify an ambiguous place name, or to change capitalisation. To do this, place square brackets around the inserted text.

For example: ‘… resided near Perth [Scotland]’.

Sometimes you may want to omit parts of a quotation. To do this, put an ellipsis (…) in their place.

For example: ‘For most of the super-rich, status symbols are not enough … [w]hat matters most is [their] reputation.’
2.8 Corporate authors (when there is no named author)

If your source is published either in print or on the Internet by a recognised organisation but has no personal author, then it can be referenced by using the name of organisation that published the work. This applies to publications by newspapers, associations, companies, organisations and government departments. It does not apply to journal articles.

2.9 Using more than one source within the same in-text reference

If you are using more than one source to support your argument, they must be listed alphabetically within the in-text reference. For example:

Mergers and acquisitions can benefit the organisation, but care must be taken assessing the synergy between the companies before the deal is finalised (Needle 2010, Wiklund and Shepherd 2009).

Reference list

2.10 Using the same author more than once in the same in-text reference

Sometimes you may need to reference the same author but for different dates. For example:

2.11 Page numbers and ranges in in-text references

For in-text referencing use ‘p.’ for ‘page’ and ‘pp.’ for ‘page range’. For example:

If the quotation was found on page 63: Jones (2010, p. 63) or (Jones 2010, p. 63).

If the quotation ran over the page break: Jones (2010, pp. 63-64) or (Jones 2010, pp. 63-64).

If the quotation is not from sequential pages: Jones (2010, pp. 42, 63-67) or (Jones 2010, pp. 42, 63-67).

Important: Page numbers are required for all in-text quotations and paraphrases, except when your source does not have page numbers, such as a web page or multimedia or any other online source without pages, or when you are summarising the entire text.

2.12 Page numbers and ranges in reference list entries

Do not add the page numbers or ranges used in your in-text references to your reference list entries.

2.13 URLs in reference list entries

When the source is found online (on the Internet) you need to include the URL in its reference list entry. For example: <http://www.nytimes.com/2011/04/01/opinion/01iht-edyan01.html>

Important: If when you paste a URL into your document it becomes an underlined hyperlink, you must remove the hyperlink (which will remove the underlining). This is to ensure readability.

Most word processing programs, like Microsoft Word, have an option to turn off automatic generation of hyperlinks when URLs are pasted. In Word 2007: select Word Options | Proofing | AutoCorrect Options | AutoFormat As You Type and untick Internet and network paths with hyperlinks.

2.14 Using the same source more than once (reference list)

When you use the same source more than once in your assignment, you must only list the source once in your reference list.
2.15 Sources with more than one author

In both in-text references and the reference list the order of the authors should be **exactly** as shown on the title page of the source.

<table>
<thead>
<tr>
<th>Authors</th>
<th>In-text reference</th>
<th>Reference list</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Shields (2007) proposes that ...</td>
<td>Shields, J. 2007, ...</td>
</tr>
<tr>
<td></td>
<td>.... (Shields 2007).</td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>... high success rate (Jones and Spracher 2008). According to Jones and Spracher (2008) ...</td>
<td>Jones, P. and Spracher, F. 2008, ...</td>
</tr>
<tr>
<td>3</td>
<td>... result (Hanson, Peters and O'Reilly 2010). Hanson, Peters and O'Reilly (2010) report...</td>
<td>Hanson, J. F., Peters, O. and O'Reilly, M. 2010, ...</td>
</tr>
<tr>
<td>4 or more</td>
<td>... consolidation (Johnson et al. 2007). Johnson et al. (2007) observe that when...</td>
<td>Johnson, M., Deudney, D., Leverett, G. and Strange, P. 2007, ....</td>
</tr>
</tbody>
</table>

2.16 Sources with same author(s) and year

To distinguish each source, add a suffix (e.g. 2010a, 2010b) to **both** the in-text reference and the corresponding reference list entry dates. Reference list items are in the same order as referenced in your assignment, earliest first. You also use this method when different authors have the same family name: Linklater (2002a) states that ... improvements of up to 80 percent have been observed (Linklater 2002b).

**Reference list**

2.17 Secondary sources (a source referenced within another source)

Referencing a source that is referenced within the source you are using is also referred to as ‘referencing a secondary source’. In this example your source is Dwyer:

Employability skills are described as ‘those skills essential for employment and for personal development’ (Gibbs 2004 cited in Dwyer 2008, p. 61).

OR

**Reference list**

2.18 Use of & (ampersand)

Use ‘and’ instead of ‘&’, **except** when ‘&’ is used in the source’s title, publisher or database name.

For example: Smith and Jones (2009); *Journal of Banking & Finance*.

2.19 Use of ibid.

Do **not** use ‘ibid.’ when using any in-text referencing style, including Harvard.
2.20 Names with titles, honorifics or hyphens

**Titles and honorifics**

Titles such as Sir, Lord, Dame, Princess, and honorifics such as AO, CBE etc. are not used in references. For example, Susan Adele Greenfield’s full title is Baroness Professor Greenfield CBE, but she would be referenced in-text as simply (Greenfield 2002) and in a reference list as: Greenfield, S. A. 2002, ...

**Hyphens**

Hyphenated *family* names are not changed: (Armstrong-Jones 2001), Armstrong-Jones, S. 2001, ...

Hyphenated *given* names are converted to initials: Park, Kuen-Yong becomes Park, K. Y.

2.21 Names with particles (Dutch, Flemish, French, German); suffixes; ‘St.’; Irish & Scots names

**Dutch, Flemish, French and Germans names**

Often these names have particles like ‘von’, ‘van’, ‘van der’ and so on.

For example: Anne Sofie von Otter, Karl Klaus von der Decken, Ludwig van Beethoven, Vincent van Gogh, and Ludwig Mies van der Rohe.

Names of French origin may use the particle ‘de’ or ‘du’.

For example: Henri de Villiers, Anne du Bourg.

When referencing **Dutch or Flemish** names, the particle is always included in the in-text reference, and put last (before the date) in the reference list entry unless (as is often the case) the person is referred to in-text by the particle, which is always capitalised.

For example: Van Gogh, Van der Vaart.

When referencing **German** names the particle is dropped in the in-text reference, and put last in the reference list entry.

When referencing **French** names the particle is retained in both in-text and reference list entries.

<table>
<thead>
<tr>
<th>Full name</th>
<th>In-text reference</th>
<th>Reference list entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dutch Vincent van Gogh</td>
<td>(van Gogh 1885)</td>
<td>Gogh, V. van 1885, ...</td>
</tr>
<tr>
<td></td>
<td>or Van Gogh (1885)</td>
<td>or Van Gogh, V. 1885, ...</td>
</tr>
<tr>
<td>Flemish Henri Clemens van de Velde</td>
<td>(van de Velde 1887)</td>
<td>Velde, H. C. van de 1887, ...</td>
</tr>
<tr>
<td>French Henri Jacques de Villiers</td>
<td>(de Villiers 2002)</td>
<td>de Villiers, H. J. 2002, ...</td>
</tr>
<tr>
<td>German Ludwig van Beethoven</td>
<td>(Beethoven 1813)</td>
<td>Beethoven, L. van 1813, ...</td>
</tr>
<tr>
<td>German Karl Klaus von der Decken</td>
<td>(Decken 1855)</td>
<td>Decken, K. K. von der 1855, ...</td>
</tr>
</tbody>
</table>

The guidelines are based on Teijlingen, E. van 2004, ‘Referencing Flemish, Dutch and German authors in English’, *Medical Sociology News*, vol. 30, no. 1, pp. 42-44.

**Names with generational suffixes (Jr., Sr., II, III etc.)**

Some American names use the generational suffixes ‘Jr.’ or ‘Sr.’ to indicate son and father respectively, and in some rare cases, mother and daughter. In British English ‘Jnr.’ and ‘Snr.’ are used instead.

Sometimes the Roman numeral ‘I’ is used instead of ‘Sr.’ and this may extend to further generations as ‘II’ and ‘III’. When referencing such names, the suffix should only be included if the author uses it for his or her publications. For examples, see the table on the next page.
Names with the prefix ‘St.’

Some names have a prefix, such as ‘St.’ – the abbreviation for ‘saint’ and often pronounced as ‘sin’.

The following table lists some examples.

<table>
<thead>
<tr>
<th>Full name</th>
<th>In-text reference</th>
<th>Reference list entry</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Irish and Scots names

Many Irish names begin with O’, and this must be retained in referencing. Many Scots names begin with Mac and sometimes Mc, and this must be retained in referencing. The letter immediately following O’, Mac or Mc must be capitalised. The following table lists some examples.

<table>
<thead>
<tr>
<th>Full name</th>
<th>In-text reference</th>
<th>Reference list entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>Phyllis McCaul</td>
<td>McCaul (2012)</td>
<td>McCaul, P. 2012,</td>

<td></td>
<td></td>
</tr>
</tbody>
</table>

2.22 Acronyms and initialisms

**Acronyms** are words formed from the initial letters (or groups of letters) of the words making up a company’s or organisation’s name. In speech an acronym replaces the full name. For example, we talk about ‘Qantas’ not ‘Queensland and Northern Territory Aerial Services’. When referencing a source authored by an acronym, the acronym must be used in both in-text references and the reference list entry.

In-text reference: (Qantas n.d.).

Reference list

**Initialisms**, unlike acronyms, are not spoken as words. Instead, all their letters are pronounced. For example, IBM (International Business Machines), ABC (Australian Broadcasting Corporation) and OECD. Initialisms may not be unique. ABC is also an initialism for American Broadcasting Corporation. To use an initialism, you must show its full name followed by the initialism itself in parentheses in the first sentence where you use it. There are two ways you can do this:

**Example 1**: In 2007 the International Energy Agency (IEA) assessed all the world’s largest oil fields. Production in 580 of these oil fields was declining on average by 5.1% per annum (IEA 2008, p. 221).

**Example 2**: A 2007 study by the International Energy Agency showed that production in 580 of the world’s largest oil fields declined on average by 5.1% per annum (IEA 2008, p. 221).

Reference list

**Note**: You do not need to give the full names of commonly known initialisms like ‘CD’ or ‘DVD’.
2.23 Formatting your reference list

Your reference list must be in **alphabetical order**. It should also be easy to read. It is recommended that you choose a paragraph spacing of 9pt so that there is a gap between each reference list entry. This improves readability.

**Important:** Do not number or bullet point a reference list.

Note carefully how items with **the same author and the same date** (Linklater), and items with **the same author but with different dates** (Smil), are used in the following example:

**Reference list**

Teijlingen, E. van 2004, ‘Referencing Flemish, Dutch and German authors in English’, *Medical Sociology News*, vol. 30, no. 1, pp. 42-44.

3. Examples – in-text and reference list entries

In this section of the guide information has been organised into three columns:

Column 1. **Type of source** lists the different types of source materials that you may need to reference. It would not be practical to list every type of source you may encounter in your studies; however, the examples provided in this guide should be sufficient.

Column 2. **In-text reference** shows you how to make an in-text reference (sometimes called an in-text citation). This is where you refer to your sources of information within your assignment whenever you paraphrase, summarise, or use a direct quotation or other source material, such as a graph or table.

**Note:** See 2.1 above for the two methods you can always use with in-text references.

Formatting rules concerning punctuation and spacing must be followed exactly. For example:

(Jones, 2012) is **incorrect**, while (Jones 2012) is correct.

Column 3. **Reference list entry** shows you how to insert each type of reference in the reference list at the end of your assignment. This list of references gives your reader all the information they need to easily find the sources you have used. These entries must be listed in alphabetical order, and follow exactly the rules for use of capitals, italics and punctuation. It may not always be possible for you to obtain all of the information specified; however you must supply sufficient information for the source to be easily located.

### 3.1 Formatting rules for titles in reference list entries

The following table shows how to interpret the formatting rules for titles in reference list entries.

<table>
<thead>
<tr>
<th>Format rule</th>
<th>How to apply the rule</th>
<th>Example</th>
</tr>
</thead>
</table>
| **Title of x**  
e.g.  
Title of article  
Title of report | Capitalise the first letter of the title **and** the first letter of any proper name(s) in the title | Business in context  
Business management in Australia |
| **Title of X**  
e.g.  
Government  
Department or Body  
Database Name | Capitalise the **first letter** of each word in the title **exactly** as it is capitalised in the source | Department of Foreign Affairs  
Springer Link |
| **Title of x**  
e.g.  
Title of website  
Title of book  
Title of lecture | Capitalise the first letter of the title **and** the first letter of any proper name(s) in the title, and apply italics | Gwynne Dyer – author & historian  
Introduction to international business  
Politics in Cambodia |
| **Title of X**  
e.g.  
Title of Journal  
Title of Newspaper  
Title of Magazine | Capitalise the **first letter** of each word in the title **exactly** as it is capitalised in the source, and apply italics | Journal of Marketing  
New York Times  
OECD Review |

**Note:** initialisms are always capitalised, e.g. OECD, never Oecd; DVD not Dvd
3.2 Books, ebooks, translated books and book reviews

<table>
<thead>
<tr>
<th>Type of source</th>
<th>In-text reference</th>
<th>Reference list entry</th>
</tr>
</thead>
</table>
| **Book (print)** | Shields (2007, p. 20) proposes … | Author(s) Year, *Title of book*, Publisher, Place of Publication.  
**Example:**  
| **Book with no author (print)** | Note: truncate long titles with an ellipsis (…) as shown in this example:  
In 1941 the Air Ministry published an account of its bombing missions to date (*Bomber Command … 1941*). | *Title of book* Year, Publisher, Place of Publication.  
**Example:**  
| **Book with no publication date (print)** | The ancient scholar Aurelius (n.d., p. 20) claimed that … | Author(s) n.d., *Title of book*, Publisher, Place of Publication.  
**Example:**  
| **Book with more than one edition (print)** | Some characterise the discipline of finance (Frino, Hill and Chen 2009, p. 2) as … | Author(s) Year, *Title of book*, number of edition, Publisher, Place of Publication.  
**Example:**  
| **Edited book (print)** | The foundations of industrial justice are examined by Patmore (2003) through … … deny the fact (Jones and Hensher 2008). | Editor(s) (ed./eds.)* Year, *Title of book*, Publisher, Place of Publication.  
*use ed. for one editor; eds. for multiple editors  
**Examples:**  
| **Chapter in an edited book (print)** | One perspective on women and work is offered by Baird (2010) in her discussion of … | Author(s) Year, ‘Title of chapter’ in Editor(s) (ed./eds.)*, *Title of book*, Publisher, Place of Publication, page numbers.  
*use ed. for one editor; eds. for multiple editors  
**Example:**

### 3.4 Internet: web pages, web sites, blogs, social media

**Web page titles:** most browsers show web site and web page titles in a title bar at the top of the window. It is acceptable to truncate the title in the in-text reference.

**Note:** this section applies only to web pages, not to downloaded documents (usually in PDF format) such as reports, journal articles, conference papers and so on. Refer to the relevant section to reference these items.

*Networks: how they change our thinking* 2011, video file, SlowTV, October, viewed 26 November 2011, <http://blip.tv/file/get/Slowtv-NetworksHowTheyChangeOurThinkingPaulOrmerod295.m4v>  
**Note:** Give the URL for the page from which the vodcast can either be viewed or downloaded. |
3.10 Newspapers, online news sources and wire feeds

Online news sources such as Reuters or Bloomberg or the Australian Broadcasting Corporation (ABC) should be referenced as online newspapers. Wire feeds (which get their name from the age of the telegraph) are also referenced as online newspapers.

**Note:** Omit 'a', 'an' or 'the' from the start of a newspaper title: Wall Street Journal, not The Wall Street Journal.

**Note:** Newspaper section numbers or letters are treated as part of the page number.

**Note:** Newspaper editions are placed in parentheses immediately following the title, but in normal (non-italic) text parentheses, e.g. Wall Street Journal (Eastern Edition).

| Article from news source or wire feed with no author (online) | **Note:** When Associated Press, Australian Associated Press and Agence France Presse are used as corporate authors you only need to use their initialism (AP, APP, AFP).  
‘… in every month since February 2012’ (AAP 2013).  
… according to exit polls (AFP 2014). | News Source Name (initials) Year, ‘Title of article’, Title of News Source, Day Month, viewed Day Month Year, <URL>  
**Example:** article from wire feed in online newspaper  
**Example:** article on news source web site  
| Newspaper article with author (print) | Different methods of retaining nurses have been challenged by Brown (1987, p. A.1) … | Author(s) Year, ‘Title of article’, Title of Newspaper, Day Month, page number(s).  
**Example:**  
**Examples with edition and section:**  
<table>
<thead>
<tr>
<th>Type of source</th>
<th>In-text reference</th>
<th>Reference list entry</th>
</tr>
</thead>
</table>
| Newspaper article, no author (print) | ... infrequent (Sydney Morning Herald 2011, p. 10). | Title of Newspaper Year, ‘Title of article’, *Title of Newspaper*, Day Month, page number(s).  
**Example:**  
| Newspaper article with author (online) | Martin (2011) asserts that ... | Author(s) Year, ‘Title of article’, *Title of Newspaper*, Day Month, viewed Day Month Year, <URL>  
**Example:**  
| Newspaper article, no author (online) | ... infrequent (Sydney Morning Herald 2011) | Title of Newspaper Year, ‘Title of article’, *Title of Newspaper*, Day Month, viewed Day Month Year, <URL>  
**Example:**  
| Newspaper article with author (database) | The problems faced by Wall Street in the past have been denied by Kindleberger (1999, p. A.16) who maintains that ... | Author(s) Year, ‘Title of article’, *Title of Newspaper*, Day Month, page number(s) (if available), viewed Day Month Year, Database Name, doi: or item number (if available).  
**Note:** the most preferred identifier is the DOI (digital object identifier) in either the number or URL format. The next preferred identifier is the stable URL. A stable URL is one that will never change. The database will clearly identify a stable URL if one is available. The item number may be called the accession number or document number or document id.  
**Example with item number:**  
| Newspaper article, no author (database) | According to Government witnesses, Standard Oil salesman tampered with oil lamps (New York Times 1908, p. 8). | Title of Newspaper Year, ‘Title of article’, *Title of Newspaper*, Day Month, page number(s) (if available), viewed Day Month Year, Database Name, doi: or item number (if available).  
**Example:**  
**Note:** the item number may be called the accession number or document id. |

4. Referencing checklist

<table>
<thead>
<tr>
<th>Before you submit, check the following:</th>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1. In-text references</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Quotations</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Did you put single inverted commas ‘…’ around the author’s or source’s original words in each short quotation?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Did you integrate each short quotation into a sentence?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>If you used a long quotation (more than 30 words), did you indent the quotation from the left and right margins (without using single inverted commas)?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Did you include the following information near each quotation:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• author’s family name or source?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• year of publication?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• page number(s) where you found the quotation (unless a web page)?</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Paraphrases and summaries</strong></td>
<td></td>
<td></td>
</tr>
<tr>
