

Master of Commerce majors and major combinations for 2010

The following tables illustrate degree progression examples for full-time students (commencing Semester 1) for the majors available in 2010 for the Master of Commerce.

Please Note: In most of these examples, all the required core units of study are completed within the first semester of study. This IS NOT a requirement of the degree. If a core unit is not required to be completed as a prerequisite for other advanced compulsory/elective units then students can complete them at anytime during their degree (in their 2nd or 3rd semesters). It should be noted that these are examples ONLY and students can complete units in different sequences to those indicated in these tables.

Major in Accounting

| Year / Semester | Units of study | | | | Credit points |
