The Brattle Group provides consulting and expert testimony in economics, finance, and regulation to corporations, law firms, and governments around the world. We aim for the highest level of quality and client service in our industry. Brattle is distinguished by our credibility, quality, and the clarity of our insights. We work with Nobel laureates and other leading international academics and industry specialists. For the fourth consecutive year, Brattle was ranked the top economic consulting firm in the Vault Consulting 50. With a staff of more than 300, we have offices in North America (Boston, Washington DC, New York, San Francisco, Toronto), Europe (London, Madrid, Rome), and Australia (Sydney).

We are looking for intellectually curious team players with strong quantitative skills to join our tightly knit, ambitious, and growing Sydney office. From day one as a Research Analyst (RA) at Brattle, you will participate in project teams with senior consulting staff and leading industry experts, analysing complex matters such as asset valuation, energy market design, transfer pricing and tax controversies, securities litigation, and infrastructure access disputes.

Brattle offers a diverse, stimulating, and collegial environment. Our comprehensive Graduate Program begins with a weeklong training at our headquarters in Boston where you will learn Brattle’s best practices on how to build economic models, write code, and tackle complex economic problems. At the same time, you will develop an international network of like-minded peers through activities like scavenger hunts, dinner cruises, and much more! Professional development at Brattle continues through ongoing training in topics ranging from programming to the structure and regulation of specific industry sectors.

A typical day for Brattle RAs includes:
- Combining economic theory and industry knowledge to solve real problems
- Diving into data, using statistical analyses to extract information from messy data
- Constructing models from a blend of theoretical concepts to answer complex questions
- Reviewing literature and industry trends to understand the debate around key developments

An ideal Brattle RA has an honours degree or an excellent academic record (Distinction on average) in economics, finance or other quantitative subjects. They work seamlessly in teams, have exceptional analytical skills (preferably data analysis experience using software such as R or Stata), a passion for creative problem-solving, and the ability to communicate complex concepts effectively. Most importantly, Brattle RAs are looking to learn and take ownership of their work.

We are looking for RAs to join our Sydney office Graduate Program 2019, but we will consider an earlier start date on an individual basis. To learn more about the RA role, click here. To apply for this position, click here.

We will only consider applications including a CV, transcript and cover letter submitted via our website. Applications must be submitted by 6 April 2018 but earlier applications will be reviewed on a rolling basis. Only successful candidates will be notified.
