The Graduate Certificate in Innovation and Enterprise
and the Commercialisation Training Scheme

The Commercialisation Training Scheme (CTS) is a scholarship program offered by the Commonwealth Government to provide high quality commercialisation training for the next generation of Australian researchers.

If you are a current postgraduate research student at the University of Sydney, this scholarship is designed for you. In 2009, the University expects to offer up to 25 CTS places to eligible postgraduate research students to facilitate study of the Graduate Certificate in Innovation and Enterprise (the Graduate Certificate in I&E).

The Graduate Certificate in I&E is designed to develop commercially aware and empowered entrepreneurs. Researchers will be equipped with the knowledge and experience to bring research-based ideas and inventions to market.

Commercialisation Training Scheme placeholders will be provided with the normal tuition fees for the Graduate Certificate (valued at over \$9,000) and a living allowance of up to \$7,500 per year. This living allowance is tax-exempt for full-time postgraduate research students.

To be eligible for a CTS scholarship, applicants must be domestic research students concurrently enrolled in a relevant

research program at The University of Sydney. The Graduate Certificate course must normally be completed on a part-time basis.

Applications open in late December 2008. Further information and application forms regarding the CTS Scholarships are available from:
<http://www.usyd.edu.au/ro/training/commercialisation>

Further information on the Graduate Certificate is available from:
<http://www.econ.usyd.edu.au/innovation>
