Welcome to the Business School

Undergraduate study at the University of Sydney Business School is more dynamic and industry engaged than ever before. You will be immersed in contemporary business practice through internships, international placement opportunities and project-based learning. Our courses focus on real-world business, to give you the technical, analytical, practical and leadership skills to succeed in the business world.

Gain real-world experience and stand out in the market as a graduate. Your business degree should include genuine experience of today's business world, so we offer you the opportunity to gain industry experience locally and internationally, during your degree. Work experience locally and overseas is available to you.

The Bachelor of Commerce (Liberal Studies) allows you to combine the solid foundation of a commerce degree with other areas of study, such as the arts and sciences. The Bachelor of Commerce (Bachelor of Science) is a flexible program that allows you to combine the solid business foundations and experiential learning opportunities of our commerce degree with other areas of study, such as the arts and science. The critical thinking and decision-making skills you will acquire on this program will set you apart from your peers.

Your second, optional major, subject to degree requirements, may be completed in a three-year program. Alternatively, you can choose up to three majors and more elective subjects to enable you to complete in a three-year program.

Postgraduate study

Take your career to the next level with postgraduate study in business. We offer some of the most widely recognised global business qualifications in Australia. Strategic and practical, our programs equip you with the skills and knowledge to challenge conventions, disrupt the status quo, and generate better economic and social outcomes. Immerse yourself in the latest business ideas, access unparalleled networks, and gain unique experiences to accelerate your leadership journey.

Your second, optional major, subject to degree requirements, may be completed by post-graduate Bachelor of Commerce (Liberal Studies) students at the three-campus universities in Sydney or overseas through our partnerships in Asia, Europe, North America and South America.

Broaden your academic horizons and enrich your experience by taking part in an extensive range of internships or student exchange programs with leading universities around the world, while receiving credit towards your degree.

We believe that a business degree should include genuine experience of today's business world, so we offer you the opportunity to gain industry experience locally and internationally, during your degree. Work experience locally and overseas is available to you.
