### **Brief Biography**

Professor Corinne Mulley is the founding Chair in Public Transport at the Institute of Transport and Logistics Studies at the University of Sydney. Since her appointment to Newcastle University as a transport economist she has been active in transport research at the interface of transport policy and economics. More recently Corinne has concentrated on specific issues relating to public transport. She led a high profile European and UK consortia undertaking benchmarking in urban public transport and has provided both practical and strategic advice to local and national governments on benchmarking, rural transport issues, and public transport management. Prof Mulley's research is motivated by a need to provide evidence for policy initiatives and she has been involved in such research at local, regional, national and European levels.

Prof Mulley is a recognised expert on the recent history of buses and is the Editor for a 'Companion to Road Passenger Transport History' – a resource document for transport historians and a sister volume to the 'Companion on Freight' published by the Science Museum. In 2006, she was appointed to the Editorial Board of the Journal of Transport History, a long standing Manchester University Press journal.

Prof Mulley came to Sydney University from TORG (Transport Operations Research Group) Newcastle University, United Kingdom. She achieved her PhD in Economics at the LSE (London University) having graduated in 1976 from London University (LSE) with a Masters in Economics as the holder of the Rees Jeffrey's Scholarship and in 1975, from Nottingham University with a BA Honours in Economics.

## **Research Expertise**

### **Membership in Business School Research Groups**

- Business and Labour History Group

### **External Research Grants, Contracts, Consulting**

- **The role of agglomeration economies in public transport projects** (2011, AU\$34,000 over 1 year) NSW Department for Transport, NSW Department for Transport, Australia, Project is to take a two-fold approach to the estimation of the contribution of agglomeration economies. First by progressing a computer general equilibrium model and second by the estimation of NSW experience using published elasticities with sensitivity analysis
- **Centre of Excellence in Bus Rapid Transit development** (2010) Volvo Research and Education Foundation, Sweden, ITLS is a partner (with Professor Hensher as Principal Investigator), together with the Pontificia de Catolica de Chile who leads the project), MIT, IST Portugal, EMBARQ Washington, Brasil and Mexico, of a competitive Volvo Centre of Excellence in Bus Rapid Transport (BRT) (2010-2014). The Centre of Excellence will deliver a new framework for the planning, design, financing, implementation and operation of BRT in different urban areas, providing evidence based research as to when and how BRT projects can effectively enhance mobility and meet accessibility needs. ITLS will be working on the critical element of how to identify elements which are transferable between existing and prospective BRT systems and elements that are project site specific. The Center of Excellence in BRT was selected among many applicants worldwide. It is the eighth center funded by VREF.
- **A review of Community Transport for the City of Sydney** (2010) City of Sydney, Australia, The project is to provide a review of CT for the City. My role is to provide peer review or deliverables and to have input into direction. Transport Planning and Management is the lead partner.

### **Internal Business School Research and Conference Grants**

- **Evaluation of bus reform in NSW: the impact of network planning changes** (2011, AU\$15,000) Business School - Research Grant.
- **Will public transport users walk further for a more frequent service? A Stated preference investigation** (2011, AU\$15,000) Business School - Research Grant.
- **Accessibility impacts of Liverpool-Parramatta Transitway** (2010, AU\$20,000 over 1 year) Business School - Research Grant, Improvements in transport infrastructure and services increase land values (value uplift) which reflects, amongst other benefits, the increased benefit that residents derive through reduced travel time and increased accessibility. A potential strategy to fund transport infrastructure is charging those who benefit from the land value increases attributed to transport infrastructure improvements: this is value capture.

This grant is to investigate the value uplift element of the Transitway since demonstrating the existence of uplift is a prerequisite to a policy involving value capture..

- **Strengthen the Public Transport research group at the Institute of Transport and Logistics Studies** (2011, AU\$15,000 over 1 year)  
Strategic Research Initiatives.
- **World Symposium on Transport and Land Use Research WSTLUR** (2011, AU\$3,825)  
Business School - Overseas Conference Travel Grant, Canada, H Du, July 2011.
- **Closing the accessibility gap: quantifying the role of flexible transport services** (2010, AU\$11,281 over 1 year)  
Business School - Research Grant.
- (2010, AU\$2,333.33)  
Business School - HERDC Awards Scheme.
- **12th World Conference on Transport Research WCTR 2010** (2010, AU\$4,050)  
Business School - Overseas Conference Travel Grant, Portugal, July 2010.
- **The role of public transport interactions in agglomeration economies** (2010, AU\$4,799 over 1 year)  
Business School - Research Grant.
- (2009, AU\$2,116.66)  
Business School - HERDC Awards Scheme.
- **Thredbo 11** (2009, AU\$3,520)  
Business School - Overseas Conference Travel Grant, Netherlands, L Sloman & J Baker, September 2009.
- **Flexible transport services: Identifying and overcoming barriers to implementation in NSW** (2009, AU\$9,966)  
Business School - Research Grant.
