79	1.68	Moderate	49	-0.02	Moderate	19	-2.18	Severe	First, make sure that all not applicable (N/A) questions are excluded from the final score. E.g. if the patient does not take any medication then maximum score is 28 (not 30). Divide the number of "never" questions by the number of maximum applicable questions. This percentage score should be checked against this table so that a logit score and a severity category are revealed.
