Dentistry at the University of Sydney

The Faculty of Dentistry offers dental health courses that are patient centred, evidence based, integrated with research and responsive to community needs.

Teaching and learning

As Australia’s first dental school, the Faculty of Dentistry has been training dental practitioners for more than 100 years.

Our graduates are caring, think clearly and logically, and possess outstanding clinical and research capabilities. They are engaged and globally aware and have the capability to become leaders in oral health, dentistry and research.

Academics at the Faculty of Dentistry are expert oral health professionals, and our researchers are pioneering new dental treatments to improve patient outcomes.

By studying with us, you will acquire the patient-centred, evidence-based skills required for modern dental practice.
Continuing education

We offer courses to support lifelong learning for dental professionals.

Join our community of dental professionals committed to lifelong learning and improved patient care. Attend continuing professional development (CPD) accredited workshops, clinical simulations and lectures offered across a range of specialties.

Our community

Our faculty combines integrated research, teaching and clinical practice. Co-located with Sydney Dental Hospital, Westmead Centre for Oral Health and community clinics in New South Wales and beyond, our students, teachers, researchers and alumni are the foundation of the professional community.

Our engaged, socially conscious community is constantly seeking new ways to learn, share best practice and solve problems. This ensures we offer education of the highest calibre and conduct world-leading research that has a meaningful impact.

Through professional associations and groups such as the Dental Alumni Society of the University of Sydney and the Sydney University Dental Association for students, our community members have access to resources, real-world advice and each other.

− sydney.edu.au/dentistry/discover

Dentistry research

Researchers in the Faculty of Dentistry work collaboratively to address major health issues, with a focus on two main areas: ageing well, ageing productively; and chronic diseases.

Discover how our innovative research is delivering advances in treatment, improving our understanding of the complex mechanisms that cause disease, promoting evidence-based teaching and driving improved health outcomes across Australia and around the world.

− sydney.edu.au/dentistry/research

Research at the University of Sydney

We invest in research that changes the way we think about the world and how we live and work in it.

The University is a member of Australia’s prestigious Group of Eight network and the Association of Pacific Rim Universities. This association partners us with others that excel in research, including Stanford, Caltech, UC Berkeley and UCLA.

Our research is shaped by the big picture. We look at real-world problems from all angles, combining the expertise and talents of scholars from many disciplines.

This collaboration drives our interdisciplinary research centres, including several dedicated to deepening our understanding of China and Southeast Asia, and increasing Australia’s engagement in these regions.

Why study with us?

Our modern curriculum focuses on medical, behavioural and clinical sciences, while developing problem-solving and critical thinking skills in our students.

Our courses emphasise clinical experience, beginning in the first year of study at the Sydney Dental Hospital and Westmead Centre for Oral Health, as well as regional rotations in Bathurst, Bowral, Albury, Cessnock, Dubbo and Ballina.

We offer numerous research training opportunities, with links to other health faculties, focusing on general and oral health issues in local, national and international communities.

At the University of Sydney you will:

- receive outstanding supervision and teaching from leading dental professionals, researchers and academics
- commence practice as a dental health professional (oral health therapist, dentist or dental specialist) upon graduating
- embark on a journey of intellectual discovery by participating in research into the priority areas of chronic disease management and healthy ageing
- gain student membership of prestigious, professional associations that provide mentoring, support and advice
- have access to the Sydney University Dental Association (SUDA), a dynamic student association that unites and leads the student community
- be part of a faculty that has a commitment to engage with Aboriginal and Torres Strait Islander communities through dental services, oral health education and research in partnership with Aboriginal Medical Services in regional communities.
Undergraduate

Study a Bachelor of Oral Health (BOH) (3 years)

Study double degree dentistry: Bachelor of Science (Advanced) and Doctor of Dental Medicine (7 years)

Bachelor’s degree in any discipline

Study a Doctor of Dental Medicine (4 years)

become a dentist

Postgraduate

Study a Doctor of Clinical Dentistry

become a registered dental specialist

Undertake a Graduate Certificate or Graduate Diploma in Clinical Dentistry

develop your clinical skills

Conduct research with the Doctor of Philosophy (PhD)

become a Doctor of Philosophy

Conduct research with the Master of Philosophy (MPhil)

become a Master of Philosophy

Continuing education

Continue your professional education, undertake a short course

accrue CPD hours

Why study with us?
Our courses

Whether you are joining our faculty straight from school or you’re at graduate-entry level with a degree, we have a range of exciting options to suit you.

Our unique and dynamic set of courses produce dental practitioners, oral health professionals, dental specialists and researchers of the highest calibre.

All of our programs are accredited by the Dental Board of Australia and our graduates are highly sought after.

We emphasise the use of new technologies in delivering our courses. Teaching and research are interdisciplinary, with research focused on two main areas: chronic disease management and healthy ageing. You will graduate with strong decision-making skills and a research-informed approach to learning.

We introduce the clinical component of our courses early, and your practical experience starts in the first year. We offer clinical learning at a range of sites, including hospitals and community-based centres in metropolitan and rural areas.

We strongly encourage volunteer work by our students, especially in communities with high needs – this can be organised locally as well as internationally.

The Bachelor of Oral Health (BOH) offers training in dental hygiene, dental therapy, and oral health promotion (see page 8).

The Doctor of Dental Medicine (DMD) leads to registration as a dentist and gives you the opportunity to develop skills through practice-based learning and exposure to new dental technologies and research (see page 6).

The Bachelor of Science (Advanced)/Doctor of Dental Medicine (DMD) double degree program for high-achieving students provides the opportunity to study science followed by dentistry (see page 7).

The faculty also offers further study and specialist courses for qualified dentists.

The Doctor of Clinical Dentistry offers advanced specialised training in your choice of:
- oral medicine
- orthodontics
- paediatric dentistry
- periodontics
- prosthodontics
- special care dentistry.

The Graduate Diploma in Clinical Dentistry offers advanced specialised training in your choice of:
- advanced restorative
- conscious sedation and pain control
- oral implants
- surgical dentistry.

The Graduate Certificate in Clinical Dentistry offers specialised training in advanced restorative dentistry.
Embarking on a research degree at Sydney is an opportunity to work alongside some of the world’s brightest and most accomplished academics. We offer exceptional facilities, and we have an innovative edge and the drive to challenge traditional ways of thinking.

You can undertake postgraduate studies in oral health, or a Master of Philosophy or Doctor of Philosophy in dentistry.

You will have the support you need to contribute to research that makes a meaningful, real-world impact.

Learn more about our research degrees:

### Australian Qualifications Framework

The Australian Qualifications Framework (AQF) provides national standards for qualifications in the education and training system. The University of Sydney’s Master of Philosophy (MPhil) is the second-highest qualification on the framework, and the Doctor of Philosophy (PhD) is the highest qualification.

*Entry requirements are subject to change annually. Please refer to the website for current entry requirements: sydney.edu.au/dentistry/discover

*International postgraduate coursework students need to meet the requirements of the Australian Health Practitioner Regulation Agency (AHPRA) for limited registration. For more information, please see: www.ahpra.gov.au
Study oral health therapy

Study our Bachelor of Oral Health (BOH) and graduate to become an oral health therapist registered with the Dental Board of Australia.

As an integral part of the dental team, oral health therapists work alongside dentists and specialists to provide dental care and oral health promotion in the public and private sectors, and within the community at large.

Oral health therapists provide treatment to patients of all ages, focusing on oral health maintenance. Their primary purpose is to address the risk factors associated with dental caries and periodontal disease. They assess patients’ oral health through clinical examination and radiographs, provide treatment services and identify conditions requiring referral.

The BOH is a full-time, three-year degree.

Graduate opportunities

Graduates of our BOH set the benchmark for oral health graduates Australia wide. They are highly sought after, especially by public sector service providers and dentists in private practice, who are increasingly looking for practitioners with dual qualifications in dental hygiene and dental therapy.

Entry requirements

Applicants to our BOH are assessed according to their performance in three areas:

- satisfactory completion of a Personal Qualities Assessment test (PQA). The PQA is designed to test mental agility and cognition, personality, moral orientation and decision-making – essential qualities for candidates entering the program.
- satisfactory completion of Multiple Mini-Interviews (MMI), a series of short interviews in which applicants move between interview stations.
- meeting the minimum Australian Tertiary Admission Rank (ATAR) required for the course, or satisfactory record of previous tertiary study. If you do not have an ATAR or a previous tertiary qualification, but are older than 21, you may be eligible to apply through the Mature-Age Entry Scheme.

- sydney.edu.au/dentistry/discover
“From the beginning, the Bachelor of Oral Health was set to be a challenging yet rewarding experience—and it surely is. The course has an extensive theoretical component, giving me a thorough knowledge of the complexities of the mouth.

“Emphasis on early clinical exposure and the integration of oral health promotion is perhaps the facet of the course that appealed to me most. Being based primarily at Westmead Centre for Oral Health and various other clinics throughout Sydney, I’ve been able to develop and demonstrate my skills effectively in practice.

“I also feel like part of an extended family. Each and every member of the course provides support when needed and together we are an open and welcoming community—it’s an extra benefit of the course.”

Tan George Nguyen
2015 graduate, Bachelor of Oral Health

“From the first week of the course, students spend time in the simulation clinic, becoming familiar with the anatomy of the oral cavity, the instruments and patient positioning. In second semester, they get the opportunity to look into one another’s mouths and, by the second year, students are treating patients in public dental health clinics.

“We teach students to search the literature for evidence to support their treatment decisions before treating a patient. Teaching in this way is key to best practice and sets the foundation for lifelong learning.”

Dr Kimberly Mathieu Coulton
Academic Coordinator and Head of Program
Bachelor of Oral Health
Study dentistry

Study our Doctor of Dental Medicine (DMD) and graduate to become a dentist, eligible for registration with the Dental Board of Australia.

Our four-year, full-time, graduate-entry course offers you the opportunity to develop skills through practice-based learning and will expose you to new dental technologies and research. The DMD will train you to draw on evidence to treat patients effectively and respond to the changing oral health needs of the community. It will instil a dedication for lifelong learning, self-development and self-evaluation.

Our program has evolved to respond to changing market demands for newly graduated dentists who can confidently and ethically assume clinical practice and leadership positions or continue with further research if they wish.

The Doctor of Dental Medicine will allow you to:
- understand how to make treatment decisions that are most appropriate for patients as individuals
- gain confidence in treating patients through simulation and practice-based experience
- develop leadership skills to enable contribution to the dental community
- crystallise professional values and ethics, social conscience and cultural awareness
- make informed decisions by critiquing research and evidence.

Entry requirements
- a bachelor’s degree with a credit average or higher
- satisfactory performance in a medical admissions test (GAMSAT only for domestic applicants; GAMSAT, MCAT, CDAT, DAT for international applicants)
- satisfactory completion of the prerequisite unit of study: Human Biology
- satisfactory performance in an interview.

Graduate opportunities
As a graduate of our DMD, you are eligible for immediate registration with the Dental Board of Australia, which allows you to go straight into practice. If you are a Canadian student, you can undertake the examination of the National Examining Board of Canada, allowing registration and practice in your home country.

Our highly sought after dentists have opportunities in:
- private practice as an assistant dentist
- public dental practice – hospitals, schools, departments of health
- defence forces
- academic pursuits – for example, research and specialisation
- specialisation (on completion of a professional and research experience and additional academic studies).
Double degree dentistry

Bachelor of Science (Advanced)/Doctor of Dental Medicine (entry from high school)

We offer a small number of high school leavers who have achieved outstanding results a place in the double degree program.

Our seven-year, full-time program provides you with the opportunity to study the Bachelor of Science (Advanced) program before entering the DMD. This combination of science and dentistry offers you the opportunity to develop a strong background in the sciences, with some flexibility for you to study units from other faculties.

Entry requirements
− ATAR (expected to be 99.5 or above).
− satisfactory performance in an interview.

How to apply
You will need to apply for the double degree dentistry course at the first opportunity after graduating from high school, regardless of when your results are available. Domestic students need to apply through the Universities Admissions Centre (UAC). International applicants should visit our website for details about how to apply.

− sydney.edu.au/dentistry/discover

“I’ve always wanted to work in the health community. I feel that oral health is misunderstood and poorly addressed within Australia. There are opportunities for both disciplinary research as well as frontline healthcare delivery.”

Benjamin Ross
First-year student
Doctor of Dental Medicine

“My favourite part of this degree is getting hands-on experience really early. By the end of our second year we’re already seeing our own patients and managing our own treatment plans.

“Because of the responsibility and control we are given during our studies, we leave university with the skills needed to be successful in the community.”

Bhavisha Thankey
Fourth-year student
Doctor of Dental Medicine
Key dates for admission

Bachelor of Oral Health

**Late September**
Applications need to be submitted to UAC for:
- domestic and international students completing Year 12 in Australia
- international students who are undertaking New Zealand National Certificate of Education Achievement Level 3.

**October**
Registration for the PQA test closes.

**November**
PQA test takes place.

**December**
Interviews take place.

**January**
Offers and enrolments.

**February**
Classes begin.

Doctor of Dental Medicine

**Domestic students**

**Late January/early February**
GAMSAT registrations close.

**Mid-March**
GAMSAT is held.

**Mid-May**
Online applications open.
GAMSAT results are released.

**Early to mid-June**
UAC Qualification Assessment applications close.
Online applications close.

**Late August – early September**
Interviews take place.

**International students**

**Mid-May**
Online applications open.

**Early to mid-June**
Applications close.

**Early August**
Interviews take place.

Postgraduate coursework

**September**
Applications open in early September for admission in the following year.

**March**
Applications close at midnight on 31 March.

**May**
Interviews and/or assessments take place. First-round offers are made.

**July**
Second-round offers are made.

To find out about other important University dates, please visit: sydney.edu.au/dates

Double degree Dentistry

For key dates for the Double Degree Dentistry program please visit our website:
- sydney.edu.au/dentistry/discover

The admission timeline may be subject to change. Applicants should note that the most up-to-date information on dates is on the website.
Additional information

NSW Department of Health statutory requirements

All students of health and medical-related courses need to provide evidence to show that they meet certain conditions.

These include a criminal record check, prohibited employment declaration and current vaccinations.

For more information, please visit:
- sydney.edu.au/dentistry/discover

Credit for previous studies

You may be eligible for credit if your previous studies are assessed as directly equivalent to our units of study. Credit arrangements vary by course.

You need to apply when completing your online course application. To find out more about course-specific requirements, visit your faculty website.

For more information, please visit:
- sydney.edu.au/study/credit

“Being based primarily at Sydney Dental Hospital has huge advantages. It’s a working dental hospital so we see real patients with real problems. This calls for students to provide the highest quality patient-centred care – a skill vital for practice.

“Dentistry is a career that requires life-long enquiry and I believe the course instils this in our students.”

Dr Susie Dracopoulos
Doctor of Dental Medicine Year Coordinator
Fees and costs
Undergraduate

Domestic students
All domestic undergraduate students are eligible for a Commonwealth-supported place, if you are a citizen of Australia or New Zealand (including dual citizens) or hold an Australian permanent resident visa or an Australian humanitarian visa.

As a CSP student, your tuition fees will be subsidised by the Australian Government. You will pay the remainder, called a ‘student contribution’. The amount you contribute depends on the units of study you choose. Student contribution amounts are reviewed annually by the University, and will increase each year of your period of study (subject to a maximum determined by the government), effective at the start of each calendar year.

Eligible CSP students can obtain a full or part HECS-HELP loan for their student contribution, either paid upfront or repaid when your income exceeds a certain amount. For details, visit www.studyassist.gov.au

International students
Tuition fees for international students vary between courses, and the year that you undertake your study in the course. Check indicative tuition fees for your chosen course on sydney.edu.au/courses

Please note that all tuition fees shown on sydney.edu.au/courses for international students are:

- quoted in Australian dollars and correct at time of publication
- indicative tuition fees for year 1, in the listed calendar year only

- from 2017, set for each course based on 48 credit points per year, or 1.0 Equivalent Full-Time Student Load (1.0 EFTSL). If your study load for the year is more or less than 1.0 EFTSL, your tuition fee will differ.

Combined undergraduate degree tuition fees
For international students, for combined undergraduate degrees commencing in 2017, a single course tuition fee applies for the duration of your study in the combined degree, regardless of the units of study that are undertaken as part of your combined degree. Importantly, the single course tuition fee is subject to annual review and will increase each year of your study in the combined degree.

Double degree tuition fees (undergraduate to postgraduate)
- price differentiation
For double degrees, where domestic and international students complete undergraduate and postgraduate qualifications under one set of course resolutions, a higher tuition fee rate will apply to the postgraduate degree.

Annual review
Importantly, tuition fees are subject to annual review by the University and will increase each year, effective at the start of each calendar year.

Other costs
In addition to fees, you should budget for:

- additional course costs.
  Some costs are significant for faculty-specific materials and textbooks, tools, protective clothing, and equipment.

For more information about additional costs, visit your faculty’s website at sydney.edu.au/faculties
- the Student Services and Amenities (SSA) fee.

The following costs are specific to international students:

- health insurance through the Overseas Student Health Cover (OSHC) scheme. This is an Australian Government requirement for student visa holders: sydney.edu.au/pg-int-health
- education expenses for students’ children: schools.nsw.edu.au/international
- living expenses such as food and rent: sydney.edu.au/study/finances-fees-costs/living-costs.html

More information
For more information about course-related and other incidental costs, financial assistance, loans, upfront tuition fee payments (international students) and scholarships, please visit: sydney.edu.au/study/finances-fees-costs.html

Contact us if you have other questions about fees or need more information:
- sydney.edu.au/contact-us

Method of payment
There are several ways you can pay the fees that apply to your study. A surcharge of 0.8 percent will apply for payments made by Visa or MasterCard. The surcharge is subject to review and may change. Information about payment methods and the surcharge is set out at: sydney.edu.au/study/finances-fees-costs/fees-and-loans/paying-your-fees.html
Fees and costs
Doctor of Dental Medicine and postgraduate

Domestic students
Most domestic students undertaking postgraduate coursework degrees at the University of Sydney study in a fee-paying place. However, domestic postgraduate students in the Doctor of Dental Medicine have the opportunity to compete for a limited number of Commonwealth-supported places (CSPs).

The student contribution amounts and, where applicable, tuition fees on sydney.edu.au/courses are an estimate only of the fees payable in the advertised calendar year of study. The Doctor of Dental Medicine is only offered as a full-time program. Fees are based on a full-time student enrolment load of 48 credit points per year (1.0 EFTSL). If, under special circumstances, your study load for the year is more or less than 1.0 EFTSL your tuition fee will differ.

Annual review
Importantly, for students with Commonwealth-supported places, the student contribution amounts are reviewed annually by the University, and will increase each year of your period of study (subject to a maximum student contribution amount determined by the Australian Government), effective at the start of each calendar year. For more information, visit www.studyassist.gov.au

The University’s tuition fees for domestic and international fee-paying postgraduate students are subject to annual review, and will increase each year of your period of study, effective at the start of each calendar year.

Other costs
In addition to fees, you should budget for:
- additional course costs.
  To find out more about ancillary costs for Dentistry programs, please visit sydney.edu.au/dentistry/study/important-information.php
- the Student Services and Amenities (SSA) fee.

International students
The tuition fees on sydney.edu.au/courses are an estimate only of the fees payable in the advertised calendar year of study. The Doctor of Dental Medicine is only offered as a full-time program. Fees are based on a full-time student enrolment load of 48 credit points per year (1.0 EFTSL). If, under special circumstances, your study load for the year is more or less than 1.0 EFTSL your tuition fee will differ.

The following costs are specific to international students:
- health insurance through the Overseas Student Health Cover scheme. This is an Australian Government requirement for student visa holders: sydney.edu.au/pg-int-health
- education expenses for students’ children: schools.nsw.edu.au/international
- living expenses such as food and rent: sydney.edu.au/study/finances-fees-costs/living-costs.html

Double degrees – price differentiation
For students enrolling in a double degree course, for example, a Bachelor of Science (Advanced) and Doctor of Dental Medicine, tuition fees and student contribution amounts for the postgraduate component of the degree will be higher than the undergraduate component of the degree. When you are calculating the likely total cost of your course please carefully factor in this price differentiation.

More information
For more information about course-related and other incidental costs, financial assistance, loans, upfront tuition fee payments (international students) and the availability of scholarships, please visit:
- sydney.edu.au/study/finances-fees-costs.html

If you have other specific questions about fees or need more information, please get in touch with us:
- sydney.edu.au/contact-us
Forest Stewardship Council (FSC) is a globally recognised certification overseeing all fibre-sourcing standards. It provides guarantees for the consumer that products are made of woodchips from well-managed forests, other controlled sources and reclaimed material with strict environmental, economic, and social standards.
