Note: These two options are proposed only for situations where pavers cannot be removed for installation. This method will make the removal of the plaques very difficult but will allow plaques to be installed if paving has been installed prior to the plaques' installation. THIS IS NOT THE PREFERRED METHOD.

Typical Location

Scale 1:20

Graphic Details
Interpretive text title cap X height = 35mm
Interpretive body text cap X height = 25mm
Refer to sheet 2 for construction details.
Note

Golden Jubilee Celebrations 1902
Notification of the Jubilee celebrations was sent to universities throughout the world. Most British and all Australian universities sent representatives, also ninety-six addresses of congratulations were received from universities of the Empire, Europe, North America and Africa. Members and friends of the University provided hospitality for visitors.

In 1851 the University Senate formed a committee to select books even before any professors were appointed. The first volume acquired was a Greek-Latin lexicon. Further books and a book case were purchased from local resident Rev Dr Mackaen in 1852 and a list of desiderata was sent to London. Frederick Hale Forshall "late scholar of Trinity College, Cambridge" was appointed Librarian in 1852. He resigned after 15 months and the position of Librarian lapsed for sixty years.
Note
These two Options are proposed only for situations where pavers cannot be removed for installation.
This method will make the removal of the plaques very difficult but will allow plaques to be installed if paving has been installed prior to the plaques’ installation.
THIS IS NOT THE PREFERRED METHOD.
