We’re looking for an app developer.
Spartle is a revolutionary startup which is developing the first productivity app utilising a geographical interface in order to enable users to easily locate products and services in their area. The team, currently participating in the renowned Sydney Genesis Startup Competition, is looking for a talented and passionate iOS app developer with an innovative streak. By joining us as a partner you will be co-founding your own company. In addition, you will be responsible for developing, deploying and maintaining the app whilst undertaking a key managerial role. The ideal candidate should fulfil the following criteria.

**TECHNICAL:**
- Completed or working towards a relevant degree (e.g. computer science or software engineering)
- Knowledge of iOS SDK, XCode, Objective C and Swift
- Have experience with test automation
- Have experience with relational databases and optimisation, as well as developing client server applications and writing server side logic
- Good understanding of front-end technologies, such as HTML5 and CSS3

**PERSONAL:**
- Competent at solving complex problems with consistent accuracy
- Evidence of leadership capacity and experience
- A ‘bigger picture’ type of person: keeping the vision at the forefront of your work
- Excellent communication skills and a proactive team player
- A drive to constantly upgrade your skills and perform at your best

*Does this sound like you? Send us your CV and cover letter to spartle.main@gmail.com and we will be in touch! General information regarding Sydney Genesis can be found on the Business School website — for specific questions, please contact us via email. Applications are due 6th May 2016.*
