

The Business Statistics and Econometrics group at the School of Economics, Australian School of Business, University of New South Wales, is looking to hire a programmer to develop data analysis software. The appointment can be on a full time or part time basis.

The successful person will preferably be based in Sydney.

The required skills include

1. Good knowledge and experience in programming in Python, C and interface to inter-connect them.
2. Knowledge of Matlab
3. Knowledge of recent trends in the use of the GPUs for computational purposes (knowledge of CUDA-C and/or LibLacket library for C and/or Python).
4. Reasonable level of mathematical and statistical skills enabling transformation of the formulas and equation from the specialized literature into an efficient program code.

We offer a competitive salary and good working environment.

Interested candidates should email their CVs and cover letters addressing required skills to Robert Kohn.
