

Graduate Developer

- * Have a passion for developing kick-arse products?
- * Do you live and breathe innovation?
- * Want to surround yourself with the brightest and best, minds, culture and perks?

Then Atlassian wants you!

Start your career in Computer Science and Software Engineering at the top! At Atlassian you will transform the way millions of users, developers and businesses around the world create products from concept to launch.

As a Graduate at Atlassian, you will be sent to the Hack House and spend a week being mentored by the brightest and the best, hacking code, building new features and surfing. See what this years Hackers are getting up to: <http://www.atlassian.com/company/careers/hack-house>

Don't settle for the average job, do the things you love, at a place you'll love. We are a 10 year young software development company, revolutionising the way software is sold and used by businesses world-wide. Join us to build products for the brightest and the best! Our innovative software development products are used by over 17,000 customers globally, including NASA, Pixar, Disney and Sony. You are different and unique, so join a different kind of software company - one that listens to clients, thrives on innovation and solves customer problems with brilliance and flair!

Atlassian is Australia's fastest growing global software company, and from day one you will be a valued member of the team. What you build will make a lasting impact on the software development world. If improving everything is your natural reflex - we want your opinion - on everything we do!

What makes an Atlassian, an Atlassian?

Atlassians are people who cannot stand for mediocracy, no matter where we are or what we do. We want to be the work smarter, dream bigger and achieve greater things. Atlassians are passionate about adding value to every community they are involved in, from the IT industry, to local communities we are people who love "being the change we seek!". If this is you, join the team!

Once part of the team you will spend 20% of your time on creative ideas of your own choice and 100% of the time surrounded by the crème de la crème, the brightest people in their field.

Your Career at Atlassian:

- * You will develop features and products that will ship, ...to million of users ...fast!
- * Have a direct impact on the way millions of developers and teams do their work
- * Developing hands-down top quality server-side and client side code

- * Participate from day one in key planning and decision making for product features, sharing with the team your phenomenal ideas
- * Rise to the challenge to ever improve by writing unit tests to spot defects as they occur
- * Build and improve both open source Atlassian components and components from external projects
- * Kick Sherlock's butt and solve any problem in your way
- * Learn and love learning! The steeper the curve the better because you always want to improve
- * Impact the future in which developers and businesses create products from concept to launch

Requirements:

- * Graduating or recent graduate of a Computer Science, Software Engineering or equivalent degree
- * Enjoy using a variety of languages and development tools
- * Team player
- * Good communicator
- * Great time management skills

Not just a job

We understand what busy complex lives people have, which is why we provide a very casual and flexible environment to work in. Our team has the opportunity to choose hours that fit with their lifestyle and commute, even occasionally working from home. We also know that sometimes you just need a little more time for your life away from work - which is why, besides our standard annual leave entitlements, we provide our staff 5 days paid volunteer leave and paid parental leave.

Watch our videos on Atlassian culture and the amazing things you can achieve as a Graduate developer: <http://www.atlassian.com/company/careers/graduates> and check out what happens at the Atlassian Hack House: <http://www.atlassian.com/company/careers/hack-house>
