

Fusion Technology Group

- **job title and description of duties**

Senior Developer and Programmer

- **skills and/or experience required**

Experience of programming applications on the iPhone.

Experience in Developing smart Website in either .NET or PHP

Experience in Developing with a Database in either SQL Server or MySQL

- **hours worked, and flexibility with regard to study/exam timetables**

Flexible but we are trying to get a product out to the market as soon as possible. One alternative is if you can help train the employer we can have two resources on the project and get it out sooner

- **location/suburb of the work**

You can program this at home or at the university. If it is outside home then security arrangements should adhered to. You can also program at my office in Mount Colah, North of Hornsby but unless you live close by it would be less preferable than doing it at home. We will meet either at the University or your home.

- pay rate/basis of payment – visit the [Fair Work online](#) website for pay rates and other employment conditions, or call their help line on 13 13 94

to be discussed

- how to apply and closing date for applications

send letter and resume to ray_camrass@yahoo.com

- your contact details, including email address and phone number for Careers Centre staff (these do not appear with the job advertisement, however they are required for office purposes should we need to contact you).
