

Software Engineer

Terem Technologies

Terem Technologies is a small, fast-growing professional software services organisation based in Martin Place. With a focus on quality and outstanding relationships, Terem's edge is gained through engineering software the right way, with the right technology and the best delivery process.

Terem has a part-time contract available for someone who is passionate about software engineering. Prior experience in a corporate environment is not essential. The right applicant will be able to demonstrate their expertise with example as well as a willingness to learn.

The role is ideal for a university student. It is three days a week with the potential to grow into a full time position for the right candidate. Hours are flexible with the opportunity to work from home. The successful candidate will:

- Report to and work alongside an executive director
- Receive structured mentoring from someone with ten years experience in the industry
- Work on a wide variety of projects from building websites to developing back-end services to creating new products
- Learn and apply a world class software development process
- Have the opportunity to do architecture
- Have the opportunity to progress to a client facing role

The successful candidate will be the kind of person who tests new frameworks and discovers new technologies in their spare time. They will be passionate about building technology the right way and will get a thrill out of finding a technology solution for something that "can't be done". The successful candidate will have the following essential qualities:

- Fluent in at least two languages (C#, Java, PHP, Ruby, Python or Java Script)
- Able and keen to learn a new language or technology quickly
- Self motivated
- Able to take initiative
- Focused on quality
- A good communicator with outstanding presentation skills
- A permanent resident or citizen
- Able to start immediately
- The hourly rate is \$20-\$60 depending on expertise.

Please send your CV to careers@terem.com.au. If you have any personal or other software development projects you have worked on, please include details of these.

Applicants will be notified of the result after the job application closes.

Job applications close Friday 9th March 2012.
