Project managers help organisations deliver new products, services and infrastructure. They manage and implement new systems and processes and they effect change within organisations.

Your studies
This degree will provide you with the fundamental project management skills, theories and methods required in today’s complex business environment.

Subjects include:
- project finance
- statistics
- analytics
- risk management
- organisational behaviour
- psychology.

These subjects are integrated with units of study from your chosen stream:
- Civil Engineering Science
- Built Environment
- Software.

Your career
Career opportunities are varied as project management skills are transferable across industries.

Graduates will be highly sought after and could work in professional roles in:
- property development
- construction
- mining
- IT
- banking and finance
- not-for-profit organisations
- state or federal government
- defence.

You could also work in consultancy roles in the engineering, water, health, the arts, education or energy sectors.

Sample course table only. Refer to sydney.edu.au/courses for full information.
Project Management at Sydney

Project management is a highly regarded discipline. ‘On-the-job’ training often fails to meet the needs of organisations or provide the fundamental skills required to manage big projects in a complex environment.

Unique and unequalled

This degree is unlike any other project management course in Australia.

We take a complex systems approach to investigate projects from a holistic viewpoint. It will provide you with skills that you can apply across any industry.

Broad career options

Project management skills and methods can be applied to a variety of organisational and humanitarian situations, including disease and disaster recovery scenarios that require an innovative and dynamic approach.

Honours

Bachelor of Project Management students, may, upon completion of their degree requirements, qualify to enrol in the Bachelor of Project Management Honours program.

To qualify for the award of the Bachelor of Project Management with Honours, a student must successfully complete an additional year of study (the Honours year).

Combined degrees

This degree is also an ideal complement to a Bachelor of Engineering Honours or a Bachelor of Arts.

“Combined with my engineering degree, my project management studies will open more doors, fast-tracking my career and the projects I can work on. This degree will create so many more career opportunities, more variety and a better understanding of the industry.”

Dana King
Bachelor of Engineering (Aeronautical) and Bachelor of Project Management

Scholarships

We offer more than 500 University-wide scholarships to undergraduates every year. The Faculty of Engineering and Information Technologies also offers a variety of entry, merit and industry scholarships.
