Research Period Three and Four
Friday 19 August 2016
Applications close
Friday 2 September 2016
Offers made

The JRE Engineering Cadetship Grants were established in 2012 to support the research and research training activities of students enrolled in a higher degree research (HDR) program in the Faculty of Engineering and Information Technologies, and who participate in a Cadetship with a business that requires involvement in Research & Development (R&D) activities. This initiative is funded by the Australian Government through the Department of Education and Training.

To be considered for the Cadetship Grant applicants must be:

- a domestic student;
- enrolled on a full-time or part-time basis;
- undertaking a PhD or Master of Philosophy;
- in receipt of a Research Training Scheme (RTS) funded place; and
- engaged in a Cadetship

You must provide an initial proposal outlining how you intend to utilise the grant amount for the year of application. You must also complete the relevant application form which is certified by your employer.

Awarding of a Cadetship Grant shall be made on the recommendation of the Faculty Associate Dean (Research) based on the level and relevance of the applicant’s involvement in research and development activities.

A Cadetship Grant is valued at $5,000 per annum indexed in accordance with section 6.1 in the JRE Conditions of Grant, to cover costs associated with field work, conference, software, training and equipment and is tenable for up to four years for PhD and up to two years for Master of Philosophy candidates.

Grant applications should be submitted via email to: engineering.scholarships@sydney.edu.au
