This Scholarship was established by the Faculty of Engineering and Information Technologies to provide students with outstanding academic ability the opportunity to undertake a summer project to gain valuable research experience and knowledge to advance their academic careers.

To be eligible an applicant must:

- Be currently enrolled in either a relevant undergraduate or postgraduate masters by coursework program at the University of Sydney or another Australian University,
- have a WAM of 75 or above in their third or fourth year of study, or a WAM of at least 80 or above in their second year of their current undergraduate degree program, or
- have a WAM of at least 75 or above in their current postgraduate coursework degree program, and
- possess and demonstrate well-developed skills and grades in the field relevant to the project they are applying for. Applicants must also demonstrate interest in each of the projects they are applying for.

Selection criteria

Applicants will be assessed on their academic merit, response to the Scholarship application, statement of interest and interview/discussion with the relevant research project supervisor. All applicants must complete the relevant Scholarship application form and email their completed form and other documents to engineering.scholarships@sydney.edu.au. Students not enrolled at the University of Sydney must also attach a copy of their formal tertiary transcripts.

The Scholarship shall be awarded on the recommendation of the Associate Dean (Education) or their nominee and nominated academic staff from the relevant school, research cluster or other area. Providing a student is eligible, the relevant project supervisor is responsible for the final decision.

The Scholarship shall be tenable for 12 weeks only and subject to satisfactory academic progress during the project as determined by the project supervisor. Students undertaking an information technologies project may complete an 8 week project where available, and as agreed to by their research project supervisor.

Students will need to complete a formal project report by the conclusion of their project and provide a presentation.

Students who participate in the Summer Research Scholarship Program do so on a voluntary basis. No employment relationship is created between the participating students and the University.

Please refer to the terms and conditions of this Scholarship for a full list of the conditions that apply.
