The Materials and Structures Research Cluster is offering scholarships for undergraduate students interested in undertaking a research project over the 2014/2015 summer break.

To be eligible applicants must have:

- successfully completed a minimum of 48 credit points
- a weighted average mark (WAM) of 75 or above
- possess well developed skills in the areas of mathematics, physics, computing, and engineering
- be currently enrolled at the University of Sydney, or have completed the equivalent of a Bachelors (Honours I) degree

Eligible engineering students may credit this research experience towards ENGG4000. Please enquire at your School.

The project duration is 12 weeks full-time and must be completed before 31 March 2015.

Applicants will be selected on the basis of academic merit, demonstrated knowledge and interest in the research project topics.

Payments will be made in two instalments with the 1st instalment being paid on commencement and the final payment being made two weeks before project completion.

Applicants must submit a completed application form, their CV, a statement detailing their interest in the research project and suitability for a scholarship, and indicate three project preferences by the closing date to Professor Simon Ringer simon.ringer@sydney.edu.au with the subject line:
