

Lee, D., Hong, C., Han, B. (2017). Graphic user interface (GUI) based cervical, thoracic, and lumbar (C-T-L) spine magnetic resonance image stitching. 2014 IEEE Nuclear Science Symposium and Medical Imaging Conference, Piscataway, New Jersey, USA: IEEE.

2016

Comparison of three EMR models and application to extrapolated semisolid magnetization transfer reference (EMR) nuclear overhauser enhancement (NOE) imaging with Quantitative assessment of amide proton transfer (APT) and magnetic extrapolated semi-solid magnetization transfer reference (EMR) nuclear overhauser enhancement (NOE) imaging with Quantitative assessment of amide proton transfer (APT) and magnetic resonance (MR) imaging.

2015

high-intensity focused ultrasound in a rat glioma model. *ISMRM 23rd Annual Meeting & Exhibition*, Toronto Ontario Canada: N/A.

2014

2013

Lee, D., Hong, C., Park, J., Han, B. (2013). Evaluation of relative somatotopic arrangement and location for corticospinal
tract in the human brain using diffusion tensor tractography and functional MRI. *World Molecular Imaging Congress 2013*, Georgia, USA.

2012

2011

2010

Lee, D., Hong, C., Lee, M., Kim, S., Han, B. (2010). Confirmation of appropriate spatial resolution range for sensitivity map using sense reconstruction based on linear coil array simulation and noise variation. *2010 IEEE Nuclear Science Symposium and Medical Imaging Conference*, Online: (IEEE) Institute of Electrical and Electronics Engineers.

Lee, D., Hong, C., Lee, M., Kim, S., Han, B. (2010). Linear coil array simulation-based evaluation of filtering and polynomial fit
effect according to the spatial resolution for sensitivity map using sense reconstruction. *2010 IEEE Nuclear Science Symposium and Medical Imaging Conference*, Online: (IEEE) Institute of Electrical and Electronics Engineers.

Lee, D., Hong, C., Jang, S., Han, B. (2010). Somatotopic localization of corticospinal tract in the internal capsule without individual variation: combined DTT-fMRI study. *2010 World Molecular Imaging Congress*.
