Australian Nuclear Science and Technology Organisation Scholarship

Conditions of Award

1. The Australian Nuclear Science and Technology Organisation Scholarship shall be open to international and domestic students who are accepted into the Master of Molecular Imaging course with The University of Sydney, Faculty of Health Sciences.

2. Applicants are required to submit an A4 page statement of their motivation for enrolling in the Master of Molecular Imaging course. Applications will be assessed on the basis of academic merit, as indicated by their academic transcript and curriculum vitae, together with the one page statement.

3. A committee appointed by the Faculty of Health Sciences plus a representative from ANSTO will select the applications. The committee's decision will be final.

4. The scholarship will be awarded to the most promising applicant based on academic achievement demonstrated through applicant’s previous studies and, or research.

5. The recipient must enrol full-time during the tenure of the scholarship and the scholarship shall be terminated if the recipient fails to maintain satisfactory progress towards his/her candidature. The scholarship is not transferable to another discipline or faculty.

6. The scholarship has a value equivalent to the current full-time course fee of the Master of Molecular Imaging. One scholarship will be granted annually.

7. Scholarship recipient’s course fee will be waived for both semesters, subject to continued full-time enrolment and maintaining excellent academic progress.

8. The scholarship will be awarded by the Dean of Faculty of Health Sciences on recommendation of the Committee.

9. The scholarship recipient may be provided with the opportunity to undertake a research project at ANSTO. In such cases, ANSTO may require the scholarship recipient to enter into an agreement covering issues such as security, confidentiality and intellectual property.
