

Can you help with a research study investigating reading abilities in primary-school-aged children with Autism?

This study will be conducted over 2008/2009 by researchers at the University of Sydney (HREC approval number: 10969).

We aim to test around 50 children between 5 and 12 years of age.

Testing will involve a single 1.5 hour individual assessment conducted at the Speech Pathology Clinic at the University of Sydney Lidcombe campus (or a mutually-agreeable location).

A number of non-invasive tests will be conducted including reading and listening tests. More details about the tests are provided in the Information Sheet.

If you are interested in participating and would like copies of the Information Sheet/Consent Form and a testing appointment please email Kirsten Stokes:
ksto4686@usyd.edu.au

Also please feel free to contact Dr Joanne Arciuli (Chief Investigator) or David Trembath (Co-Investigator) on: (02)9351-9450
