

## Australian Farm Deaths & Injuries Media Monitors Snapshot January 1 - September 30, 2014

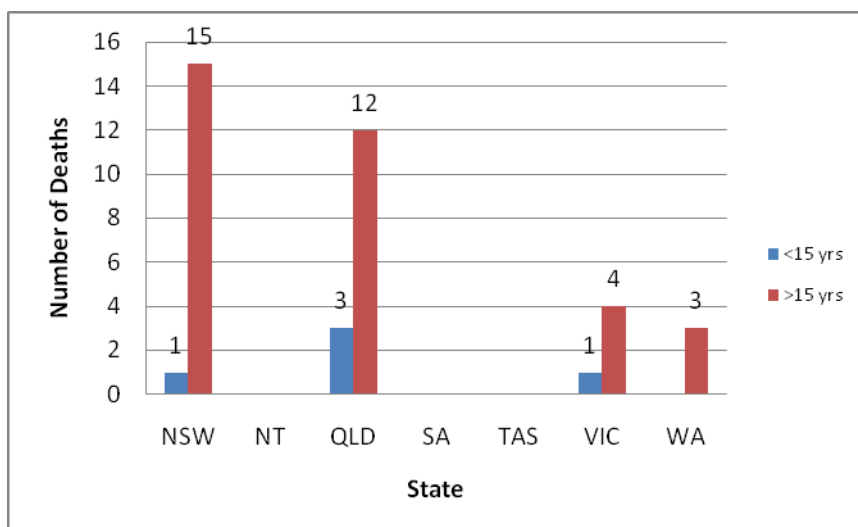

### Background

Australian print media provides an avenue to highlight the prevalence of farm related deaths and injuries. The process of media monitoring has been used by the National Farm Injury Data Centre (NFIDC) since 2005 to assist in the collection of information on farm injury events (fatal and non-fatal). This report focuses predominantly on data involving on-farm injury events reported in the Australian print media for the period January 1<sup>st</sup> to September 30<sup>th</sup> 2014. It also captures non-farm quad related fatality and injury over the same period.

### Deaths

There were approximately 1,386 print media articles received by the NFIDC from iSENTIA during the period. A total of 39 on-farm deaths were reported:

- The overall number of fatal cases (n=39) was lower than that for the corresponding period in 2013 (n=45).
- Five (12.8%) of the 39 deaths involved a child aged 15 years and under.
- Quads (n=9), tractors (n=5) and farm utes (n=5) were reported most frequently, with mobile plant (n=4), trucks (n=3) and 2-wheelers (n=2) also featuring.
- Media monitoring also captures non-farm quad related fatality. There were two additional fatal injury events that occurred off-farm for this period (i.e. there were a total of eleven quad related deaths nationally including farm and non-farm cases).

**Figure 1:** On-farm deaths reported in Australian print media by age and state, Jan-Sept 2014.

**Table 1:** Agents of injury causing death as reported in Australian print media by age, Jan-Sept 2013 and Jan- Sept 2014.

### Non-fatal Injury

There were an additional 67 non-fatal on-farm injury events reported in the Australian print media for the period January 1<sup>st</sup> to September 30<sup>th</sup> 2014.

- Six (9%) of the 67 injury events involved children aged 15 years and under.
- Quad related injury (n=32) accounted for 47.7% of all incidents. This was followed by tractor related incidents (n=7).
- For quads, there were 27 additional injuries that occurred off-farm (i.e. there were a total of 59 quad related non-fatal injuries nationally including farm and non-farm cases).

**Figure 2:** On-farm non-fatal injury events reported in Australian print media, January-Sept 2014.

**Table 2:** Agents of on-farm non-fatal injury as reported in Australian print media, January - September 2014.
