BOSCH LIVE CELL ANALYSIS FACILITY
MAMMALIAN CELL CULTURE: A PRACTICAL APPROACH
28th March, 3rd 4th & 6th April 2017

A course designed for beginners to understand the principles and practice of growing and maintaining cells in culture.

Medical Foundation Building (K25)
92-94 Parramatta Road

This workshop consists of a mixture of lectures and practical laboratory training sessions and is held at the Bosch Live Cell Analysis Facility at the Medical Foundation Bldg. (K25). The course provides the knowledge and practical skills required to maintain and preserve mammalian cell cultures: from starting a culture to freezing and storing cells.
