Bosch Institute Facilities User Group Meeting

Thursday 29th May 2014

2.00pm  Natalia Brzozowska “Repeated low-dose Δ9-THC promotes long-term reductions in the acute neurobehavioural effects of the atypical antipsychotic risperidone”
Bosch Mass Spectrometry Facility

2.20pm  Dr. Aviva Levina “New techniques for protein analysis: applications of Peggy and BLItz in bioinorganic chemistry”
Molecular Biology Facility

2.40pm  Ryan Farr “Pancreatic non-coding RNAs: from cradle to grave”
Molecular Biology Facility

3.00pm  Sarasa Mohammadi “Using Behavioural Tests to Dissect Pain Pathways”
Animal Behavioural Facility

3.20pm  Break

3.30pm  Dr. Siva Purushothuman “Brain neuroprotective strategies: An insight into imaging and post-imaging analysis”
Advanced Microscopy Facility

3.50pm  Tasnim Rahman “Enrichment affecting Hippocampal development”
Advanced Microscopy Facility

4:10pm  Cho Zin Soe “New macrocyclic dihydroxamic acid siderophore from Shewanella putrefaciens using precursor-directed biosynthesis”
Bosch Mass Spectrometry Facility

4:30pm  Jia Hao Yeo *Title TBA*
Live Cell Analysis Facility

All welcome. Light Refreshments available.

Location: Anderson Stuart Bldg, N248 Lecture Theatre
RSVP: Wednesday 28th May 2014 to sheng.hua@sydney.edu.au
