ARE YOU A MAN AGED 21 YEARS OR OLDER?

Do you have haemochromatosis?

Or iron deficiency?

Or normal iron stores?

We are seeking men aged 21 years or over to participate in a study to look at Fibroblast Growth Factor 23, a blood marker of bone metabolism and its association with body iron stores.

Participating in the study involves:

1. Giving a single blood sample
2. Providing a single fasting urine specimen
3. Having a check of bone density and body composition by an X-ray technique called DEXA
4. Having a check of your weight

Participating will involve 1-2 visits for a total of up to 2 hours.

If you are interested in participating in this study, please contact:

Associate Professor Emily Hibbert
Tel: 4734 3294 or
Email: emily.hibbert@sydney.edu.au

All calls will be treated with the strictest confidence. This research study has been approved by the Nepean Blue Mountains Local Health District Human Research Ethics Committee.
