I am a visiting scholar from the Philippines and am an Associate active consultant in the Department of Obstetrics and Gynecology at St.Lukes Medical Center since 2003. I am also a practicing OB-Gynae sonologist in the said institution. My interest in sonology made me want to learn how to do pelvic floor ultrasound because the technique is not yet done in my country.

Working with Prof. Dietz and the team was indeed a wonderful learning experience. I had no prior knowledge how to do the pelvic floor scan but with practice, I know I can do better. Many thanks to Prof. Dietz, Prof. Clara Shek and Dr Ixora Kamisan –Atan, most especially Dr Rodrigo Guzman ,for their patience in teaching me .
