

Centenary Colloquium

CENTENARY
INSTITUTE

“Opportunities in microRNA research”

30 January 2007

10am – 5pm

Centenary Institute Lecture Theatre

Building 93 Missenden Road

Camperdown NSW 2050

Limited to first 100 registrants.

COLLOQUIUM THEME

Non-coding RNAs are major drivers of cellular phenomena including development and neoplasia, and have become one of the hottest areas in biology. This colloquium will present some of the latest concepts on the generation and mode of action of non-coding RNAs, in particular microRNAs and their relevance to cancer medicine and cell biology.

INVITED SPEAKERS

John Mattick Institute for Molecular Biosciences, **Thomas Preiss** Victor Chang Cardiac Research Institute, **Ken Pang** Austin Research Institute, **John Rasko** Centenary Institute, **Jennifer Gamble** Centenary Institute, **Ross Tellam** CSIRO, **Greg Goodall** and **Yeesim Khew-Goodall** Institute of Medical and Veterinary Science, **Frances Shannon** The John Curtin School of Medical Research.

ORGANISERS

J Rasko, G Goodall, M Vadas

ENQUIRIES

Nick Pearce

A/General Manager, Business Development Manager
