

**Sydney Bioinformatics
presents**

Proteomics Workshop

Thursday August 23

Maldi ToF mass spectrum of the tryptic digest of a high molecular weight (85,000) glutenin (DVF10)

This workshop is specifically designed for life science researchers who are interested in or currently conducting proteomic experiments. It will cover basic bioinformatics theory and online resources for the identification and characterization of proteins from MALDI-TOF mass spectrometry. The workshop will include a hands-on tutorial session for practical instruction in techniques of protein identification and characterization.

The workshop is limited to 20 participants.

Registration cost: \$200 (University of Sydney staff/students), \$220 (Academic, Government, not for profit organisations), Corporate rates please contact Sonia for price.

Registration form: Located at <http://www.angis.org.au/education/courses.php> or email scattley@angis.org.au

Date of Course: Thursday August 23, 9.30am — 4.30pm

**Location: Medical Foundation Building, Rm 142
Morning tea, Lunch and Afternoon Tea will be provided**
