

Publications for Frank Lovicu

2019

Das, S., Wikstrom, P., Walum, E., Lovicu, F. (2019). A novel NADPH oxidase inhibitor targeting Nox4 in TGF β 2-induced lens epithelial to mesenchymal transition. *Experimental Eye Research*, 185, 1-5. [More Information]

Shu, D., Lovicu, F. (2019). Enhanced EGF receptor-signaling potentiates TGF β 2-induced lens epithelial-mesenchymal transition. *Experimental Eye Research*, 185, 107693. [More Information]

Shu, D., Wojciechowski, M., Lovicu, F. (2019). ERK1/2-mediated EGFR-signaling is required for TGF β 2-induced lens epithelial-mesenchymal transition. *Experimental Eye Research*, 178, 108-121. [More Information]

Susanto, A., Zhao, G., Wazin, F., Feng, Y., Rasko, J., Bailey, C., Lovicu, F. (2019). Spred negatively regulates lens growth by modulating epithelial cell proliferation and fiber differentiation. *Experimental Eye Research*, 178, 160-175. [More Information]

2018

Dawes, L., Shelley, E., McAvoy, J., Lovicu, F. (2018). A role for Hippo/YAP-signaling in FGF-induced lens epithelial cell proliferation and fibre differentiation. *Experimental Eye Research*, 169, 122-133. [More Information]

Tam, O., Pennisi, D., Wilkinson, L., Little, M., Wazin, F., Wan, V., Lovicu, F. (2018). Crim1 is required for maintenance of the ocular lens epithelium. *Experimental Eye Research*, 170, 58-66. [More Information]

Wojciechowski, M., Shu, D., Lovicu, F. (2018). ERK1/2-Dependent Gene Expression Contributing to TGF β -Induced Lens EMT. *Current Eye Research*, 43(8), 986-997. [More Information]

Zhao, G., Bailey, C., Feng, Y., Rasko, J., Lovicu, F. (2018). Negative regulation of lens fiber cell differentiation by RTK antagonists Spry and Spred. *Experimental Eye Research*, 170, 148-159. [More Information]

Shirai, K., Tanaka, S., Lovicu, F., Saika, S. (2018). The murine lens: A model to investigate in vivo epithelial $\frac{1}{2}$ mesenchymal transition. *Developmental Dynamics*, 247(3), 340-345. [More Information]

2017

Iyengar, L., Lovicu, F. (2017). Aqueous humour-induced lens epithelial cell proliferation requires FGF-signalling. *Growth Factors*, 35(4-5), 131-143. [More Information]

e Information]

Shu, D., Wojciechowski, M., Lovicu, F. (2017). Bone Morphogenetic Protein-7 Suppresses TGF β 2-Induced Epithelial-Mesenchymal Transition in the Lens: Implications for Cataract Prevention. *Investigative Ophthalmology and Visual Science*, 58(2), 781-796. [More Information]

Wojciechowski, M., Mahmutovic, L., Shu, D., Lovicu, F. (2017). ERK1/2 signaling is required for the initiation but not progression of TGF β (beta)-induced lens epithelial to mesenchymal transition (EMT). *Experimental Eye Research*, 159, 98-113. [More Information]

Shu, D., Ong, K., Lovicu, F. (2017). Histopathology of Subcapsular Cataract in a Patient with Atopic Dermatitis. *Optometry and Vision Science*, 94(2), 270-276. [More Information]

McAvoy, J., Dawes, L., Sugiyama, Y., Lovicu, F. (2017). Intrinsic and extrinsic regulatory mechanisms are required to form and maintain a lens of the correct size and shape. *Experimental Eye Research*, 156, 34-40. [More Information]

Shu, D., Lovicu, F. (2017). Myofibroblast transdifferentiation: The dark force in ocular wound healing and fibrosis. *Progress in Retinal and Eye Research*, 60, 44-65. [More Information]

Kichkin, E., Visvanathan, A., Lovicu, F., Shu, D., Das, S., Reddel, S., McCann, E., Zhang, K., Williams, K., Blair, I., Phillips, W. (2017). Postnatal Development of Spasticity Following Transgene Insertion in the Mouse (beta)IV Spectrin Gene (SPTBN4). *Journal of Neuromuscular Diseases*, 4(2), 159-164. [More Information]

2016

Lovicu, F., Shin, E., McAvoy, J. (2016). Fibrosis in the lens. Sprouty regulation of TGF β -signaling prevents lens EMT leading to cataract. *Experimental Eye Research*, 142, 92-101. [More Information]

Sugiyama, Y., Shelley, E., Yoder, B., Kozmik, Z., May-Simera, H., Beales, P., Lovicu, F., McAvoy, J. (2016). Non-essential role for cilia in coordinating precise alignment of lens fibres. *Mechanisms of Development*, 139, 10-17. [More Information]

Das, S., Lovicu, F., Collinson, E. (2016). Nox4 plays a Role in TGF β (beta)-dependent lens epithelial to mesenchymal transition. *Investigative Ophthalmology and Visual Science*, 57(8), 3665-3673. [More Information]

Audette, D., Anand, D., So, T., Rubenstein, T., Lachke, S., Lovicu, F., Duncan, M. (2016). Prox1 and fibroblast growth factor receptors form a novel regulatory loop controlling lens

fiber differentiation and gene expression. *Development*, 143(2), 318-328. [More Information]

2015

Assinder, S., Beniamen, D., Lovicu, F. (2015). Cosuppression of Sprouty and Sprouty-Related Negative Regulators of FGF Signalling in Prostate Cancer: A Working Hypothesis. *BioMed Research International*, 2015, 1-10. [More Information]

Zhao, G., Wojciechowski, M., Jee, S., Boros, J., McAvoy, J., Lovicu, F. (2015). Negative regulation of TGF β -induced lens epithelial to mesenchymal transition (EMT) by RTK antagonists. *Experimental Eye Research*, 132, 9-16. [More Information]

Shin, E., Zhao, G., Wang, K., Lovicu, F. (2015). Sprouty gain of function disrupts lens cellular processes and growth by restricting RTK signaling. *Developmental Biology*, 406(2), 129-146. [More Information]

2014

Dawes, L., Sugiyama, Y., Lovicu, F., Harris, C., Shelley, E., McAvoy, J. (2014). Interactions between lens epithelial and fiber cells reveal an intrinsic self-assembly mechanism. *Developmental Biology*, 385(2), 291-303. [More Information]

Lovicu, F., Iyengar, L., Dawes, L., McAvoy, J. (2014). Lens Epithelial Cell Proliferation. In Shizuya Saika, Liliana Werner, Frank J. Lovicu (Eds.), *Lens Epithelium and Posterior Capsular Opacification*, (pp. 59-80). Tokyo, Japan: Springer. [More Information]

Saika, S., Werner, L., Lovicu, F. (2014). *Lens Epithelium and Posterior Capsular Opacification*. Tokyo, Japan: Springer. [More Information]

2013

Wang, C., Dawes, L., Liu, Y., Wen, L., Lovicu, F., McAvoy, J. (2013). Dexamethasone influences fgf-induced responses in lens epithelial explants and promotes the posterior capsule coverage that is a feature of glucocorticoid-induced cataract. *Experimental Eye Research*, 111, 79-87. [More Information]

Sugiyama, Y., Shelley, E., Wen, L., Stump, R., Shimono, A., Lovicu, F., McAvoy, J. (2013). Sfrp1 and Sfrp2 are not involved in Wnt/ β -catenin signal silencing during lens induction but are required for maintenance of Wnt/ β -catenin signaling in lens epithelial cells. *Developmental Biology*, 384(2), 181-193. [More Information]

Dawes, L., Sugiyama, Y., Tanedo, A., Lovicu, F., McAvoy, J. (2013). Wnt-Frizzled signaling is part of an FGF-induced cascade that promotes lens fiber differentiation. *Investigative Ophthalmology and Visual Science*, 54(3), 1582-1590. [More Information]

2012

Cheung, F., Lovicu, F., Reichardt, J. (2012). Current progress in using vitamin D and its analogs for cancer prevention and treatment. *Expert Review of Anticancer Therapy*, 12(6), 811-837. [More Information]

Madakashira, B., Kobrinski, D., Hancher, A., Arneman, E., Wagner, B., Wang, F., Shin, H., Lovicu, F., Reneker, L., Robinson, M. (2012). Frs2(alpha) enhances fibroblast growth factor-mediated survival and differentiation in lens development. *Development*, 139(24), 4601-4612. [More Information]

Shin, E., Basson, M., Robinson, M., McAvoy, J., Lovicu, F. (2012). Sprouty Is a Negative Regulator of Transforming Growth Factor β -induced Epithelial-to-Mesenchymal Transition and Cataract. *Molecular Medicine*, 18, 861-873. [More Information]

2011

Sugiyama, Y., Lovicu, F., McAvoy, J. (2011). Planar cell polarity in the mammalian eye lens. *Organogenesis*, 7(3), 191-201. [More Information]

Kallifatidis, G., Boros, J., Shin, E., McAvoy, J., Lovicu, F. (2011). The fate of dividing cells during lens morphogenesis, differentiation and growth. *Experimental Eye Research*, 92(6), 502-511. [More Information]

Lovicu, F., McAvoy, J., de Iongh, R. (2011). Understanding the role of growth factors in embryonic development: insights from the lens. *Philosophical Transactions of the Royal Society B*, 366(1568), 1204-1218. [More Information]

2010

West-Mays, J., Pino, G., Lovicu, F. (2010). Development and Use of the Lens Epithelial Explant System to Study Lens Differentiation and Cataractogenesis. *Progress in Retinal and Eye Research*, 29(2), 135-143. [More Information]

Wang, Q., McAvoy, J., Lovicu, F. (2010). Growth Factor Signaling in Vitreous Humor-Induced Lens Fiber Differentiation. *Investigative Ophthalmology and Visual Science*, 51(7), 3599-3610. [More Information]

Alibardi, L., Lovicu, F. (2010). Immunolocalization of FGF1 and FGF2 in the regenerating tail of the lizard *Lampropholis guichenoti*: Implications for FGFs as trophic factors in lizard tail regeneration. *Acta histochemica*, 112(5), 459-473. [More Information]

Sugiyama, Y., Stump, R., Nguyen, A., Wen, L., Chen, Y., Murdoch, J., Lovicu, F., McAvoy, J. (2010). Secreted frizzled-related protein disrupts PCP in eye lens fiber cells that have polarised primary cilia. *Developmental Biology*, 338(2), 193-201. [More Information]

Newitt, P., Boros, J., Madakashira, B., Robinson, M., Reneker, L., McAvoy, J., Lovicu, F. (2010). Sef is a negative regulator of fiber cell differentiation in the ocular lens. *Differentiation*, 80(1), 53-67. [More Information]

2009

Iyengar, L., Patkunanathan, B., McAvoy, J., Lovicu, F. (2009). Growth factors involved in aqueous humour-induced lens cell proliferation. *Growth Factors*, 27(1), 50-62. [More Information]

Wang, Q., Stump, R., McAvoy, J., Lovicu, F. (2009). MAPK/ERK1/2 and PI3-kinase signalling pathways are required for vitreous-induced lens fibre cell differentiation. *Experimental Eye Research*, 88(2), 293-306. [More Information]

Chong, C., Stump, R., Lovicu, F., McAvoy, J. (2009). TGF β promotes Wnt expression during cataract development. *Experimental Eye Research*, 88(2), 307-313. [More Information]

2008

Lovicu, F., McAvoy, J. (2008). Epithelial explants and their application to study developmental processes in the lens. In P A Tsonis (Eds.), *Animal Models in Eye Research*, (pp. 134-147). United States: Academic Press.

O'Connor, M., Wederell, E., de Iongh, R., Lovicu, F., McAvoy, J. (2008). Generation of transparency and cellular organization in lens explants. *Experimental Eye Research*, 86(5), 734-745. [More Information]

Chen, Y., Stump, R., Lovicu, F., Shimono, A., McAvoy, J. (2008). Wnt signaling is required for organization of the lens fiber cell cytoskeleton and development of lens three-dimensional architecture. *Developmental Biology*, 324(1), 161-176. [More Information]

2007

Jamieson, R., Farrar, N., Stewart, K., Perveen, R., Mihelec, M., Carette, M., Grigg, J., McAvoy, J., Lovicu, F., Tam, P., et al (2007). Characterization of a familial t(16;22) balanced translocation associated with congenital cataract leads to identification of a novel gene, TMEM114, expressed in the lens and disrupted by the translocation. *Human Mutation*, 28(10), 968-977. [More Information]

Pennisi, D., Wilkinson, L., Kollé, G., Sohaskey, M., Gillinder, K., Piper, M., McAvoy, J., Lovicu, F., Little, M. (2007). Crim1(KST264/KST264) mice display a disruption of the Crim1 gene resulting in perinatal lethality with defects in multiple organ systems. *Developmental Dynamics*, 236(2), 502-511. [More Information]

Iyengar, L., Wang, Q., Rasko, J., McAvoy, J., Lovicu, F. (2007). Duration of ERK1/2 phosphorylation induced by FGF or ocular media determines lens cell fate. *Differentiation*, 75(7), 662-668. [More Information]

Thompson, J., Lovicu, F., Ziman, M. (2007). Pax7 and superior collicular polarity: insights from Pax6 (Sey) mutant mice. *Experimental Brain Research*, 178(3), 316-325. [More Information]

Markus, A., Goy, C., Adams, D., Lovicu, F., Morris, B. (2007). Renin Enhancer Is Crucial for Full Response in Renin Expression to an In Vivo Stimulus. *Hypertension*, 50, 933-938. [More Information]

2006

Chen, Y., Stump, R., Lovicu, F., McAvoy, J. (2006). A role for Wnt/planar cell polarity signaling during lens fiber cell differentiation? *Seminars in Cell and Developmental Biology*, 17(6), 712-725. [More Information]

Iyengar, L., Patkunanathan, B., Lynch, O., McAvoy, J., Rasko, J., Lovicu, F. (2006). Aqueous humour- and growth factor-induced lens cell proliferation is dependent on MAPK/ERK1/2 and Akt/PI3-K signalling. *Experimental Eye Research*, 83(3), 667-678. [More Information]

Lovicu, F. (2006). Cell Signaling in Lens Development. *Seminars in Cell and Developmental Biology*, 17(6), 675-675. [More Information]

Symonds, J., Lovicu, F., Chamberlain, C. (2006). Differing effects of dexamethasone and diclofenac on posterior capsule opacification-like changes in a rat lens explant model. *Experimental Eye Research*, 83(4), 771-782. [More Information]

Stump, R., Lovicu, F., Ang, S., Pandey, S., McAvoy, J. (2006). Lithium stabilizes the polarized lens epithelial phenotype and inhibits proliferation, migration, and epithelial mesenchymal transition. *Journal of Pathology*, 210(2), 249-257. [More Information]

Symonds, J., Lovicu, F., Chamberlain, C. (2006). Posterior capsule opacification-like changes in rat lens explants cultured with TGF β and FGF: effects of cell coverage and regional differences. *Experimental Eye Research*, 82(4), 693-699. [More Information]

Adams, D., Head, G., Markus, A., Lovicu, F., Van Der Weyden, L., KÄntgen, F., Arends, M., Thiru, S., Mayorov, D., Morris, B. (2006). Renin enhancer is critical for control of renin gene expression and cardiovascular function. *Journal of Biological Chemistry*, 281(42), 31753-31761. [More Information]

Boros, J., Newitt, P., Wang, Q., McAvoy, J., Lovicu, F. (2006). Sef and Sprouty expression in the developing ocular lens: Implications for regulating lens cell proliferation and differentiation. *Seminars in Cell and Developmental Biology*, 17(6), 741-752. [More Information]

2005

Lovicu, F., McAvoy, J. (2005). Growth factor regulation of lens development. *Developmental Biology*, 280(1), 1-14. [More Information]

de Iongh, R., Wederell, E., Lovicu, F., McAvoy, J. (2005). Transforming growth factor-beta-induced epithelial-mesenchymal transition in the lens: a model for cataract formation. *Cells Tissues Organs*, 179(1-2), 43-55. [More Information]

2004

Lovicu, F., Steven, P., Saika, S., McAvoy, J. (2004). Aberrant Lens Fiber Differentiation In Anterior Subcapsular Cataract Formation: A Process Dependent On Reduced Levels Of Pax6. *Investigative Ophthalmology and Visual Science*, 45(6), 1946-1953. [More Information]

Lovicu, F., Ang, S., Chorazyczewska, M., McAvoy, J. (2004). Deregulation Of Lens Epithelial Cell Proliferation And Differentiation During The Development Of Tgf?-Induced Anterior Subcapsular Cataract. *Developmental Neuroscience*, 26(5-6), 446-455. [More Information]

Lovicu, F. (2004). *Development of the Ocular Lens*. Canada: Cambridge University Press.

Chen, Y., Stump, R., Lovicu, F., McAvoy, J. (2004). Expression Of Frizzleds And Secreted Frizzled-Related Proteins (Sfrps) During Mammalian Lens Development. *International Journal of Developmental Biology*, 48(8-9), 867-877. [More Information]

Ang, S., Stump, R., Lovicu, F., McAvoy, J. (2004). Spatial And Temporal Expression Of Wnt And Dickkopf Genes During Murine Lens Development. *Gene Expression Patterns*, 4(3), 289-295. [More Information]

Robinson, M., Lovicu, F. (2004). The Lens: Historical And Comparative Perspectives. In Frank Lovicu, Michael Robinson (Eds.), *Development of the Ocular Lens*, (pp. 3-26). Canada: Cambridge University Press.

Thompson, J., Lovicu, F., Ziman, M. (2004). The Role Of Pax7 In Determining The Cytoarchitecture Of The Superior Colliculus. *Development, Growth and Differentiation*, 46(3), 213-218. [More Information]

2003

Stump, R., Ang, S., Chen, Y., von Bahr, T., Lovicu, F., Pinson, K., De Iongh, R., Yamaguchi, T., Sassoon, D., McAvoy, J. (2003). A role for Wnt/Beta-catenin signaling in lens epithelial differentiation. *Developmental Biology*, 259(1), 48-61. [More Information]

Yager, M., Hughes, J., Lovicu, F., Gunning, P., Weinberger, R., O'Neill, G. (2003). Functional analysis of the actin-binding protein, tripomyosin 1, in neuroblastoma. *British Journal of Cancer*, 89(5), 860-863. [More Information]

2002

Maruno, K., Lovicu, F., Chamberlain, C., McAvoy, J. (2002).

Apoptosis is a feature of TGFb-induced cataract. *Clinical and Experimental Optometry*, 85(2), 76-82.

Kok, A., Lovicu, F., Chamberlain, C., McAvoy, J. (2002). Influence of platelet-derived growth factor on lens epithelial cell proliferation and differentiation. *Growth Factors*, , 27-34. [More Information]

Bradbury, R., Cropley, J., Kifor, O., Lovicu, F., De Iongh, R., Kable, E., Brown, E., Seely, E., Peat, B., Conigrave, A. (2002). Localization of the extracellular Ca²⁺-sensing receptor in the human placenta. *Placenta*, 23(2-3), 192-200. [More Information]

Lovicu, F., Schulz, M., Hales, A., Vincent, L., Overbeek, P., Chamberlain, C., McAvoy, J. (2002). TGFb induces morphological and molecular changes similar to human anterior subcapsular cataract. *British Journal of Ophthalmology*, 86(2), 220-226.

2001

Lovicu, F., McAvoy, J. (2001). FGF-induced lens cell proliferation and differentiation is dependent on MAPK (ERK1/1) signalling. *Development*, 128 (24), 5075-5084.

Lovicu, F., Zhao, S., Hung, F., Colvin, J., White, A., Dai, W., Ornitz, D., Overbeek, P. (2001). Patterning the optic neuroepithelium by FGF signaling and Ras activation. *Development*, 128 (24), 5051-5060.

De Iongh, R., Lovicu, F., Hardeman, E., McAvoy, J., Overbeek, P., Schneider, M., Joya, J. (2001). Requirement for TGFb receptor signalling during terminal lens fiber differentiation. *Development*, 128, 3995-4010.
