

Publications for Jennifer Gamble

2017

Liu, R., Lo, L., Lay, A., Zhao, Y., Ting, K., Robertson, E., Sherrah, A., Jarrah, S., Li, H., Zhou, Z., Hambly, B., Jeremy, R., Bannon, P., Vadas, M., Gamble, J., et al (2017).

ARHGAP18 Protects Against Thoracic Aortic Aneurysm Formation by Mitigating the Synthetic and Pro-Inflammatory Smooth Muscle Cell Phenotype. *Circulation Research*, 121(5), 512-524. [More Information]

McRobb, L., McKay, M., Gamble, J., Grace, M., Moutrie, V., Santos, E., Lee, V., Zhao, Z., Molloy, M., Stoodley, M. (2017).

Ionizing radiation reduces ADAM10 expression in brain microvascular endothelial cells undergoing stress-induced senescence. *Aging*, 9(4), 1248-1268. [More Information]

Liu, K., Zhang, X., Xu, W., Chen, J., Yu, J., Gamble, J.,

McCaughan, G. (2017). Targeting the vasculature in hepatocellular carcinoma treatment: Starving versus normalizing blood supply. *Clinical and Translational Gastroenterology*, 8(6), 1-11. [More Information]

Zhao, Y., Ting, K., Li, J., Cogger, V., Chen, J., Johansson-Percival, A., Ngiow, S., Holst, J., Grau, G., Goel, S., McCaughan, G., Vadas, M., Gamble, J., et al (2017). Targeting vascular endothelial-cadherin in tumor-associated blood vessels promotes T-cell-mediated immunotherapy. *Cancer Research*, 77(16), 4434-4447. [More Information]

Lovelace, M., Powter, E., Coleman, P., Zhao, Y., Parker, A., Chang, G., Lay, A., Hunter, J., McGrath, A., Jormakka, M., Bertolino, P., McCaughan, G., Vadas, M., Gamble, J., et al (2017). The RhoGAP protein ARHGAP18/SENEC localizes to microtubules and regulates their stability in endothelial cells. *Molecular Biology of the Cell*, 28(8), 1066-1078. [More Information]

2016

Chen, J., Wang, W., Qi, Y., Kaczorowski, D., McCaughan, G., Gamble, J., Don, A., Gao, X., Vadas, M., Xia, P. (2016).

Deletion of sphingosine kinase 1 ameliorates hepatic steatosis in diet-induced obese mice: Role of PPAR α . *Biochimica et Biophysica Acta. Molecular and Cell Biology of Lipids*, 1861(2), 138-147. [More Information]

Zhang, X., Gee, H., Rose, B., Lee, C., Clark, J., Elliott, M., Gamble, J., Cairns, M., Harris, A., Khoury, S., et al (2016).

Regulation of the tumour suppressor PDCD4 by miR-499 and miR-21 in oropharyngeal cancers. *BMC Cancer*, 16(1), 1-11. [More Information]

Li, J., Zhao, Y., Lu, Y., Ritchie, W., Grau, G., Vadas, M., Gamble, J. (2016). The Poly-cistronic miR-23-27-24 complexes target endothelial cell junctions: differential functional and molecular effects of miR-23a and miR-23b. *Molecular Therapy - Nucleic Acids*, 5(8), 1-12. [More Information]

2015

Powter, E., Coleman, P., Tran, M., Lay, A., Bertolino, P., Parton, R., Vadas, M., Gamble, J. (2015). Caveolae control the anti-inflammatory phenotype of senescent endothelial cells. *Aging Cell*, 14(1), 102-111. [More Information]

Brockhausen, J., Tay, S., Grzelak, C., Bertolino, P., Bowen, D., d'Avigdor, W., Teoh, N., Pok, S., Shackel, N., Gamble, J., Vadas, M., et al (2015). miR-181a mediates TGF- β -induced hepatocyte EMT and is dysregulated in cirrhosis and hepatocellular cancer. *Liver International*, 35(1), 240-253. [More Information]

Sukocheva, O., Wadham, C., Gamble, J., Xia, P. (2015).

Sphingosine-1-phosphate receptor 1 transmits estrogens' effects in endothelial cells. *Steroids*, 104, 237-245. [More Information]

2014

Tay, S., Wong, Y., McDonald, D., Wood, N., Roediger, B., Sierro, F., McGuffog, C., Alexander, I., Bishop, A., Gamble, J., Weninger, W., McCaughan, G., Bertolino, P., Bowen, D.

(2014). Antigen expression level threshold tunes the fate of CD8 T cells during primary hepatic immune responses. *Proceedings of the National Academy of Sciences of the United States of America*, 111(25), E2540-E2549. [More Information]

Chang, G., Lay, A., Ting, K., Zhao, Y., Coleman, P., Powter, E., Formaz-Preston, A., Jolly, C., Bower, N., Hogan, B., Rinkwitz, S., Becker, T., Vadas, M., Gamble, J. (2014).

ARHGAP18: an endogenous inhibitor of angiogenesis, limiting tip formation and stabilizing junctions. *Small GTPases*, 5(3), 1-15. [More Information]

Shackel, N., Vadas, M., Gamble, J., McCaughan, G. (2014).

Beyond Liver Fibrosis: Hepatic Stellate Cell Senescence Links Obesity to Liver Cancer by Way of the Microbiome. *Hepatology*, 59(6), 2413-2415. [More Information]

Tay, S., Wong, Y., Roediger, B., Sierro, F., Lu, B., McDonald, D., McGuffog, C., Meyer, N., Alexander, I., Parish, I., Weninger, W., Bishop, A., Gamble, J., McCaughan, G., Bertolino, P., Bowen, D., et al (2014). Intrahepatic activation of naive CD4+T cells by liver-resident phagocytic cells. *Journal of Immunology*, 193(5), 2087-2095. [More Information]

Wu, L., Meoli, C., Mangiafico, S., Fazakerley, D., Cogger, V., Mohamad, M., Pant, H., Kang, M., Powter, E., Burchfield, J., Gamble, J., Le Couteur, D., James, D., et al (2014). Systemic VEGF-A Neutralization Ameliorates Diet-Induced

Metabolic Dysfunction. *Diabetes*, 63(8), 2656-2667. [More Information]

2013

Lichtenstein, I., Charleston, M., Caetano, T., Gamble, J., Vadas, M. (2013). Active subnetwork recovery with a mechanism-dependent scoring function; with application to angiogenesis and organogenesis studies. *BMC Bioinformatics*, 14, 1-22. [More Information]

Coleman, P., Chang, G., Hutás Attila, G., Grimshaw, M., Vadas, M., Gamble, J. (2013). Age-associated stresses induce an anti-inflammatory senescent phenotype in endothelial cells. *Aging*, 5(12), 913-924. [More Information]

Young, J., Ting, K., Li, J., Moller, T., Dunn, L., Lu, Y., Moses, J., Prado-Lourenco, L., Khachigian, L., Ng, M., Lichtenstein, I., Tran, N., Shackel, N., Kench, J., McCaughan, G., Vadas, M., Gamble, J., et al (2013). Regulation of vascular leak and recovery from ischaemic injury by general and VE-cadherin-restricted miRNA antagonists of miR-27. *Blood*, 122(16), 2911-2919. [More Information]

2012

Thickett, S., Moses, J., Gamble, J., Neto, C. (2012). Micropatterned substrates made by polymer bilayer dewetting and collagen nanoscale assembly support endothelial cell adhesion. *Soft Matter*, 8(39), 9996-10007. [More Information]

Nguyen, L., Jolly, L., Shoubridge, C., Chan, W., Huang, L., Laumonier, F., Raynaud, M., Hackett, A., Field, M., Rodriguez, J., Gamble, J., et al (2012). Transcriptome profiling of UPF3B/NMD-deficient lymphoblastoid cells from patients with various forms of intellectual disability. *Molecular Psychiatry*, 17(11), 1103-1115. [More Information]

2011

Lichtenstein, I., Zomaya, A., Gamble, J., Vadas, M. (2011). Approaches to construction and analysis of microRNA-mediated networks. In Mourad Elloumi, Albert Zomaya (Eds.), *Algorithms in Computational Molecular Biology: Techniques, Approaches and Applications*, (pp. 979-1006). Hoboken, New Jersey, USA: Wiley. [More Information]

Gamble, J., Vadas, M., McCaughan, G. (2011). Sinusoidal endothelium is essential for liver regeneration. *Hepatology*, 54(2), 731-733. [More Information]

2010

Williams, S., Milne, I., Bagley, C., Gamble, J., Vadas, M., Pitson, S., Khew-Goodall, Y. (2010). A Proinflammatory Role for Proteolytically Cleaved Annexin A1 in Neutrophil Transendothelial Migration. *Journal of Immunology*, 185(5), 3057-3063. [More Information]

Coleman, P., Hahn, C., Grimshaw, M., Lu, Y., Li, X.,

Brautigam, P., Beck, K., Stocker, R., Vadas, M., Gamble, J. (2010). Stress-induced premature senescence mediated by a novel gene, SENEX, results in an anti-inflammatory phenotype in endothelial cells. *Blood*, 116(19), 4016-4024. [More Information]

2009

Zhang, X., Cairns, M., Rose, B., O'Brien, C., Shannon, K., Clark, J., Gamble, J., Tran, N. (2009). Alterations in miRNA processing and expression in pleomorphic adenomas of the salivary gland. *International Journal of Cancer*, 124, 2855-2863. [More Information]

Limaye, V., Xia, P., Hahn, C., Smith, M., Vadas, M., Pitson, S., Gamble, J. (2009). Chronic increases in sphingosine kinase-1 activity induce a pro-inflammatory, pro-angiogenic phenotype in endothelial cells. *Cellular and Molecular Biology Letters*, 14(3), 424-441. [More Information]

Wu, B., Midwinter, R., Cassano, C., Beck, K., Wang, Y., Changsirivathanathamrong, D., Gamble, J., Stocker, R. (2009). Heme Oxygenase-1 Increases Endothelial Progenitor Cells. *Arteriosclerosis, Thrombosis, and Vascular Biology*, 29(10), 1537-1542. [More Information]

Gamble, J., Vadas, M. (2009). Insights into defibrotide as therapy for veno-occlusive disease. *Hepatology*, 49(2), 689-690. [More Information]

Li, X., Stankovic, M., Lee, B., Aurrand-Lions, M., Hahn, C., Lu, Y., Imhof, B., Vadas, M., Gamble, J. (2009). JAM-C Induces Endothelial Cell Permeability Through Its Association and Regulation of beta 3 Integrins. *Arteriosclerosis, Thrombosis, and Vascular Biology*, 29(8), 1200-1206. [More Information]

Bonder, C., Sun, W., Matthews, T., Cassano, C., Li, X., Ramshaw, H., Pitson, S., Lopez, A., Coates, P., Proia, R., Vadas, M., Gamble, J. (2009). Sphingosine kinase regulates the rate of endothelial progenitor cell differentiation. *Blood*, 113(9), 2108-2117. [More Information]

Gamble, J., Sun, W., Li, X., Hahn, C., Pitson, S., Vadas, M., Bonder, C. (2009). Sphingosine kinase-1 associates with integrin α V β 3 to mediate endothelial cell survival. *American Journal of Pathology*, 175(5), 2217-2225. [More Information]

Limaye, V., Vadas, M., Pitson, S., Gamble, J. (2009). The effects of markedly raised intracellular sphingosine kinase-1 activity in endothelial cells. *Cellular and Molecular Biology Letters*, 14(3), 411-423. [More Information]

2008

Li, X., Stankovic, M., Bonder, C., Hahn, C., Parsons, M., Pitson, S., Xia, P., Proia, R., Vadas, M., Gamble, J. (2008). Basal and angiopoietin-1-mediated endothelial permeability is regulated by sphingosine kinase-1. *Blood*, 111(7), 3489-3497. [More Information]

Vadas, M., Xia, P., McCaughan, G., Gamble, J. (2008). The

role of sphingosine kinase 1 in cancer: Oncogene or non-oncogene addiction? *Biochimica et Biophysica Acta*, 1781 (9), 442-447. [More Information]

2006

Young, N., Hahn, C., Poh, A., Dong, C., Wilhelm, D., Olsson, J., Muscat, G., Parsons, P., Gamble, J., Koopman, P. (2006). Effect of disrupted SOX18 transcription factor function on tumor growth, vascularization, and endothelial development. *Journal of the National Cancer Institute*, 98(15), 1060-1067. [More Information]

Cook-Johnson, R., Demasi, M., Cleland, L., Gamble, J., Saint, D., James, M. (2006). Endothelial cell COX-2 expression and activity in hypoxia. *Biochimica et Biophysica Acta*, 1761 (12), 1443-1449. [More Information]

Gamble, J., Xia, P., Hahn, C., Drew, J., Drogemuller, C., Brown, D., Vadas, M. (2006). Phenoxodiol, an experimental anticancer drug, shows potent antiangiogenic properties in addition to its antitumour effects. *International Journal of Cancer*, 118(10), 2412-2420. [More Information]

2005

Wang, L., Xing, X., Holmes, A., Wadham, C., Gamble, J., Vadas, M., Xia, P. (2005). Activation of the Sphingosine Kinase-Signaling Pathway by High Glucose Mediates the Proinflammatory Phenotype of Endothelial Cells. *Circulation Research*, 97, 891-899. [More Information]

Hahn, C., Su, Z., Drogemuller, C., Tsykin, A., Waterman, S., Brautigan, P., Yu, S., Kremmidiotis, G., Gardner, A., Solomon, P., Vadas, M., Gamble, J., et al (2005). Expression profiling reveals functionally important genes and coordinately regulated signaling pathway genes during in vitro angiogenesis. *Physiological Genomics*, 22(-), 57-69. [More Information]

Zannettino, A., Holding, C., Diamond, P., Atkins, G., Kostakis, P., Farrugia, A., Gamble, J., To, L., Findlay, D., Haynes, D. (2005). Osteoprotegerin (OPG) is localized to the Weibel-Palade bodies of human vascular endothelial cells and is physically associated with von Willebrand factor. *Journal of Cellular Physiology*, 204(2), 714-723. [More Information]

Limaye, V., Li, X., Hahn, C., Xia, P., Berndt, M., Vadas, M., Gamble, J. (2005). Sphingosine kinase-1 enhances endothelial cell survival through a PECAM-1-dependent activation of PI-3K/Akt and regulation of Bcl-2 family members. *Blood*, 105(8), 3169-3177. [More Information]

2004

Su, Z., Hahn, C., Goodall, G., Reck, N., Leske, A., Davy, A., Kremmidiotis, G., Vadas, M., Gamble, J. (2004). A vascular cell-restricted RhoGAP, p73RhoGAP, is a key regulator of angiogenesis. *Proceedings of the National Academy of Sciences of the United States of America*, 101(33), 12212-12217. [More

Information]

Verrier, E., Wang, L., Wadham, C., Albanese, N., Hahn, C., Gamble, J., Chatterjee, K., Vadas, M., Xia, P. (2004). PPARgamma Agonists Ameliorate Endothelial Cell Activation via Inhibition of Diacylglycerol-Protein Kinase C Signaling Pathway: Role of Diacylglycerol Kinase. *Circulation Research*, 94(11), 1515-1522. [More Information]

Li, X., Hahn, C., Parsons, M., Drew, J., Vadas, M., Gamble, J. (2004). Role of protein kinase C η in thrombin-induced endothelial permeability changes: inhibition by angiopoietin-1. *Blood*, 104(6), 1716-1724. [More Information]

2003

Stein, B., Gamble, J., Pitson, S., Vadas, M., Khew-Goodall, Y. (2003). Activation of Endothelial Extracellular Signal-Regulated Kinase Is Essential for Neutrophil Transmigration: Potential Involvement of a Soluble Neutrophil Factor in Endothelial Activation. *Journal of Immunology*, 171(11), 6097-6104.

Carr, J., Hocking, H., Bunting, K., Wright, P., Davidson, A., Gamble, J., Burrell, C., Li, P. (2003). Supernatants from dengue virus type-2 infected macrophages induce permeability changes in endothelial cell monolayers. *Journal of Medical Virology*, 69(4), 521-528. [More Information]

Wadham, C., Gamble, J., Vadas, M., Khew-Goodall, Y. (2003). The protein tyrosine phosphatase Pez is a major phosphatase of adherens junctions and dephosphorylates β -catenin. *Molecular Biology of the Cell*, 14(6), 2520-2529. [More Information]
