

Publications for Kenneth Mewett

2012

Fernandez, S., Karim, N., Mewett, K., Chebib, M., Johnston, G., Hanrahan, J. (2012). Flavan-3-ol esters: new agents for exploring modulatory sites on GABAA receptors. *British Journal of Pharmacology*, 165(4), 965-977. [More Information]

2011

Ng, C., Kim, H., Gavande, N., Yamamoto, I., Kumar, R., Mewett, K., Johnston, G., Hanrahan, J., Chebib, M. (2011). Medicinal Chemistry of p GABA_C Receptors. *Future Medicinal Chemistry*, 3(2), 197-209. [More Information]

2010

Johnston, G., Chebib, M., Hanrahan, J., Mewett, K. (2010). Neurochemicals for the Investigation of GABA_C Receptors. *Neurochemical Research*, 35(12), 1970-1977. [More Information]

2009

Chebib, M., Gavande, N., Wong, K., Park, A., Premoli, I., Mewett, K., Allan, R., Duke, R., Johnston, G., Hanrahan, J. (2009). Guanidino Acids Act as p1 GABA_C Receptor Antagonists. *Neurochemical Research*, 34(10), 1704-1711. [More Information]

Mewett, K., Fernandez, S., Pasricha, A., Pong, A., Devenish, S., Hibbs, D., Chebib, M., Johnston, G., Hanrahan, J. (2009). Synthesis and biological evaluation of flavan-3-ol derivatives as positive modulators of GABAA receptors. *Bioorganic and Medicinal Chemistry*, 17(20), 7156-7173. [More Information]

2008

Fernandez, S., Mewett, K., Hanrahan, J., Chebib, M., Johnston, G. (2008). Flavan-3-ol derivatives are positive modulators of GABA(A) receptors with higher efficacy for the alpha(2) subtype and anxiolytic action in mice. *Neuropharmacology*, 55(5), 900-907. [More Information]

2007

Chebib, M., Hanrahan, J., Kumar, R., Mewett, K., Morriss, G., Wooller, S., Johnston, G. (2007). (3-Aminocyclopentyl)methylphosphinic acids: Novel GABA(C) receptor antagonists. *Neuropharmacology*, 52(3), 779-787. [More Information]

Nguyen, T., Vo, T., Bui, V., Le, V., Nguyen, T., Bui, C., Pham, N., Pham, H., Pham, T., Chu, P., Allan, R., Mewett, K., Tran, H., Khurana, J., Wang, S., Kennedy, I., Lee, N. (2007). Application of a Cyclodiene-Specific ELISA to Residue Monitoring of Agricultural Produce and the Environment in Vietnam. In I.R. Kennedy; K.R. Solomon; S.J. Gee; A.N.

Crossan; S. Wang; F. Sanchez-Bayo (Eds.), *Rational Environmental Management of Agrochemicals: Risk Assessment, Monitoring, and Remedial Action*, (pp. 245-258). Washington DC, United States: American Chemical Society.

2006

Greenwood, J., Mewett, K., Allan, R., MartÄ-n, B., Pickering, D. (2006). 3-Hydroxypyridazine 1-oxides as carboxylate bioisosteres: A new series of subtype-selective AMPA receptor agonists. *Neuropharmacology*, 51(1), 52-59. [More Information]

Hanrahan, J., Mewett, K., Chebib, M., Matos, S., Eliopoulos, C., Crean, C., Kumar, R., Burden, P., Johnston, G. (2006). Diastereoselective synthesis of (+/-)-(3-aminocyclopentane)alkylphosphinic acids, conformationally restricted analogues of GABA. *Organic and Biomolecular Chemistry*, 4(13), 2642-2649. [More Information]

Johnston, G., Hanrahan, J., Chebib, M., Duke, R., Mewett, K. (2006). Modulation of Ionotropic GABA Receptors by Natural Products of Plant Origin. In S.J. Enna (Eds.), *GABA*, (pp. 285-316). United States: Academic Press. [More Information]

Johnston, G., Hanrahan, J., Chebib, M., Duke, R., Mewett, K. (2006). Modulation of ionotropic GABA receptors by natural products of plant origin. *Advances in Pharmacology*, 54, 285-316. [More Information]

2004

Chebib, M., Hanrahan, J., Mewett, K., Duke, R., Johnston, G. (2004). Ionotropic Gaba Receptors As Therapeutic Targets For Memory And Sleep Disorders. *Annual Reports in Medicinal Chemistry*, 39(1), 13-23. [More Information]

Carland, J., Moore, A., Hanrahan, J., Mewett, K., Duke, R., Johnston, G., Chebib, M. (2004). Mutations Of The 2' Proline In The M2 Domain Of The Human Gabac Rho1 Subunit Alter Agonist Responses. *Neuropharmacology*, 46, 770-781. [More Information]

Duke, R., Chebib, M., Hibbs, D., Mewett, K., Johnston, G. (2004). Synthesis And Resolution Of 2-Methyl Analogues Of GABA. *Tetrahedron-Asymmetry*, 15(11), 1745-1751. [More Information]

2003

Chebib, M., Duke, R., Duke, C., Connor, M., Mewett, K., Johnston, G. (2003). Convulsant actions of Calycanthine. *Toxicology and Applied Pharmacology*, 190(1), 58-64. [More Information]

Johnston, G., Chebib, M., Hanrahan, J., Mewett, K. (2003).

GABA_A receptors as drug targets. *CNS and Neurological Disorders*, 2(4), 260-268.

2002

Campbell, E., Chebib, M., Duke, R., Hall, B., Hanrahan, J., Johnston, G., Mewett, K. (2002). Epigallocatechin gallate, from green tea, and related agents as modulators of human brain GABA receptors. *5th Australia/Japan Symposium on Drug Design and Development*.

Vien, J., Duke, R., Mewett, K., Johnston, G., Shingai, R., Chebib, M. (2002). Trans-4-amino-2-methylbut-2-enoic acid (2-MeTACA) and (+/-)-trans-2-aminomethylcyclopropanecarboxylic acid ((+/-)-TAMP) can differentiate rat rho3 from human rho1 and rho2 recombinant GABA (C) receptors. *British Journal of Pharmacology*, 135(4), 883-889. [More Information]

2001

Hanrahan, J., Mewett, K., Chebib, M., Burden, P., Johnston, G. (2001). An improved, versatile synthesis of the GABA_A antagonists (1,2,5,6-tetrahydropyridin-4-yl)methylphosphinic acid (TPMPA) and (piperidin-4-yl)methylphosphinic acid (P4MPA). *Royal Chemical Society. Journal. Perkin Transactions 1*, 1, 2389-2392. [More Information]
