**2015**

A table of contents containing the titles and authors of various scientific articles related to cancer research is provided. The articles cover topics such as human papillomavirus (HPV) genotypes, epigenetic regulation of GBGT1, DNA methylation in colorectal cancer, and the application of a 5-tiered scheme for standardized classification of APC genotypes in proximal and distal colon cancer. The articles also discuss the implications of these findings for clinical practice, such as introducing research initiatives into healthcare and targeting treatment for colorectal cancer. The authors include McHugh, L., Jin, F., Jones, I., Ward, R., et al (2015), and others.
