

Public Health publications with 100 or more citations

This report includes papers, books and reports with more than 100 citations, authored by staff of Sydney Public Health (the School of Public Health, the George Institute and the Clinical Trials Centre) as at July 2009.

Data from the Institute of Scientific Information below show that just 0.33% of papers published by authors from Australian institutions in journals categorised by ISI as being in the Public, Environmental and Occupational Health category have been cited more than 100 times in the past 10 years. This gives some idea of the meaning of having a paper cited over 100 times.
