MR Skilton, M Phang. From the alpha to the omega-3: breaking the link between impaired fetal growth and adult cardiovascular disease (review). Nutrition (published online 14/01/16).

Seimon RV, Shi YC, Slack K, Fernando HA, Nguyen AD, Zhang L, Lin S, Enrequez RF, Lau J, Herzog H, Sainsbury A. Intermittent moderate energy restriction improves weight loss efficiency in diet-induced obese mice. *PLoS ONE*, 11(1): e0145157, 2016 Note: This article was the number one featured article in the 5th February 2016 issue of Obesity & Energetic Offerings, an international newsletter of relevance to researchers and clinicians in the field, supported by University of Alabama at Birmingham and curated predominantly by Professor David B Allison, PhD.

Chan SP, Colagiuri S. Systematic review and meta-analysis of the efficacy and hypoglycemic safety of gliclazide versus other insulinotropic agents. [Article in Press]; Diabetes Res Clin Pract. 2015 110 (1) (pp 75-81), 2015. PMID: 26361859

Da Luz FQ, Hay P, Gibson AA, Touyz SW, Swinbourne JM, Roekenes JA, Sainsbury A: Does severe dietary energy restriction increase binge eating in overweight or obese individuals? A systematic review. Obesity Reviews, 16(8): 652-665, 2015. Note: Media stories mentioning this article gained over 3.7 million reads in June 2015. As such, Amanda Salis (publishing as Sainsbury) was the top media commentator of the University of Sydney in that month. Moreover, this article was selected by the British Journal of Obesity for their quarterly digest of what they see as the most important papers on obesity for health care practitioners in Britain in the past few months. These facts attest to the international clinical significance of this research. Moreover, the paper also won the title of "Best Publication of 2015" from the School of Psychology at the University of Sydney for my PhD student Felipe Q da Luz, who wrote the paper under my supervision.
