Development consent

Section 89E of the Environmental Planning and Assessment Act 1979

As delegate of the Minister for Planning, under delegation dated 11 October 2017, I approve the development referred to in schedule 1, subject to the conditions in schedule 2.

These conditions are required to:
- prevent, minimise, and/or offset adverse environmental impacts including economic and social impacts;
- set standards and performance measures for acceptable environmental performance;
- require regular monitoring and reporting; and
- provide for the ongoing environmental management of the development.

David Gainsford
Executive Director
Priority Projects Assessments

Sydney 23rd February 2018

SCHEDULE 1

Application No.: SSD 7894
Applicant: The University of Sydney
Consent Authority: Minister for Planning
Land: The University of Sydney, Camperdown Campus (Part Lot 1 DP 1171804)

Development: Construction of a museum at the University of Sydney, Camperdown campus, including:
   a) bulk excavation;
   b) construction of a six level building (including plant level and two basement levels) with 7,740 sqm of gross floor area comprising gallery space, education areas, research areas, collection storage space, workshop areas, offices, study rooms, a 130 seat auditorium, café, museum shop, terrace areas, loading dock and plant rooms;
   c) civil and landscaping works, including removal of 18 trees;
   d) building identification signage; and
   e) utilities and services infrastructure upgrades and augmentation.
## DEFINITIONS

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
</table>
| Advisory Notes              | Advisory information relating to the consent but do not form a part of this consent.
<p>| Applicant                   | The University of Sydney, or any person carrying out any development to which this consent applies. |
| Application                 | The development application and the accompanying drawings plans and documentation described in Condition A2. |
| BCA                         | Building Code of Australia                                                |
| Building works              | Professionals that are accredited by the Building Professionals Board to issue construction, occupation, subdivision, strata, compliance and complying development certificates under the EP&amp;A Act, Strata Schemes (Freehold Development) Act 1973 and Strata Schemes (Leasehold Development) Act 1986 or in the case of Crown development, a person qualified to conduct a Certification of Crown Building works. |
| Certifying Authority        | Professionals that are accredited by the Building Professionals Board to issue construction, occupation, subdivision, strata, compliance and complying development certificates under the EP&amp;A Act, Strata Schemes (Freehold Development) Act 1973 and Strata Schemes (Leasehold Development) Act 1986 or in the case of Crown development, a person qualified to conduct a Certification of Crown Building works. |
| Conditions of this consent  | The conditions contained in Schedule 2 of this document.                 |
| Construction                | All physical work to enable operation, including but not limited to demolition of buildings or works, the carrying out of works, including bulk earthworks, and erection of buildings and other infrastructure. |
| Council                     | City of Sydney Council                                                    |
| Day time                    | The period from 7 am to 6 pm on Monday to Saturday, and 8 am to 6 pm on Sundays and Public Holidays. |
| Department                  | The Department of Planning and Environment                                 |
| Development                 | The development described in the EIS and Response to Submissions, including the works and activities comprising construction and operation of the museum, as modified by the conditions of this consent. |
| Environmental Impact        | The Environmental Impact Statement titled Chau Chak Wing Museum SSDA 7894 |
| EPA                         | Environmental Protection Authority                                        |
| EPBC Act                    | Environment Protection and Biodiversity Conservation Act 1999             |
| EP&amp;A Act                    | Environmental Planning and Assessment Act 1979                           |
| EP&amp;A Regulation             | Environmental Planning and Assessment Regulation 2000                    |
| Evening                     | The period from 6 pm to 10 pm                                             |
| Incident                    | An occurrence or set of circumstances that causes, or threatens to cause, significant harm to the environment, community or any member of the community, being actual or potential harm to the health or safety of human beings or to threatened species, endangered ecological communities or ecosystems that is not trivial. |
| Material harm               | Is harm that: (a) involves actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial, or (b) results in actual or potential loss or property damage of an amount, or amounts in aggregate, exceeding $10,000, (such loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good harm to the environment). |
| Minister                    | Minister for Planning, or nominee                                         |
| NCC                         | National Construction Code                                                |
| Night time                  | The period from 10 pm to 7 am on Monday to Saturday, and 10 pm to 8 am on Sundays and Public Holidays. |
| OEH                         | Office of Environment and Heritage, or its successor                       |
| Operation                   | The carrying out of the approved purpose of the development upon completion of construction. |
| Reasonable                  | Means applying judgement in arriving at a decision, taking into account: mitigation benefits, costs of mitigation versus benefits provided, community views, and the nature and extent of potential improvements. |</p>

SCHEDULE 2

PART A  ADMINISTRATIVE CONDITIONS

Obligation to Minimise Harm to the Environment

A1. In addition to meeting the specific performance measures and criteria in this consent, all reasonable and feasible measures must be implemented to prevent, and if prevention is not reasonable and feasible, minimise, any material harm to the environment that may result from the construction and operation of the development.

Terms of Consent

A2. The development may only be carried out:
   a) in compliance with the conditions of this consent;
   b) in accordance with all written directions of the Secretary;
   c) generally in accordance with the EIS as amended by the RtS and RtS Supplementary Information; and
   d) in accordance with the approved plans in the table below:

A3. Consistent with the requirements in this consent, the Secretary may make written directions to the Applicant in relation to:

a) the content of any strategy, study, system, plan, program, review, audit, notification, report or correspondence submitted under or otherwise made in relation to this consent, including those that are required to be, and have been, approved by the Secretary; and

b) the implementation of any actions or measures contained in any such document referred to in (a) above.

The conditions of this consent and directions of the Secretary prevail to the extent of any inconsistency, ambiguity or conflict between them and a document listed in condition A2(c) or A2(d). In the event of an inconsistency, ambiguity or conflict between any of the documents listed in condition A2(c) and A2(d), the most recent document prevails to the extent of the inconsistency, ambiguity or conflict.

Note: For the purposes of this condition, there will be an inconsistency between documents if it is not possible to comply with both documents, or in the case of a condition of consent or direction of the Secretary, and a document, if it is not possible to comply with both the condition or direction, and the document.

Inconsistency between documents

A4. If there is any inconsistency between the plans and documentation referred to above the most recent document shall prevail to the extent of the inconsistency. However, conditions of this consent prevail to the extent of any inconsistency. Where there is an inconsistency between approved elevations and plans, the elevations prevail.

Design Quality Excellence

A5. In order to ensure the design quality excellence of the development is retained:

a) the design architect (Johnson Pilton Walker) is to have direct involvement in the design documentation, contract documentation and construction stages of the project;

b) the design architect is to have full access to the site and is to be authorised by the Applicant to respond directly to the consent authority where information or clarification is required in the resolution of the design issues throughout the life of the project; and

c) evidence of the design architect’s commission is to be provided to the Secretary prior to certification of any building works, except for site preparatory works.

A6. The design architect for the project must not change without prior approval of the Secretary.
Evidence of consultation

A7. Where conditions of this consent require consultation with an identified party, the Applicant must:

a) consult with the relevant party prior to submitting the subject document for approval; and

b) provide details of the consultation undertaken including:

i) a description of how matters raised by those consulted have been resolved to the satisfaction of both the Applicant and the party consulted; and

ii) details of any disagreement remaining between the party consulted and the Applicant and how the Applicant has addressed the matters not resolved.

Lapsing of approval

A8. This consent will lapse five years from the date of consent unless the works associated with the development have physically commenced.

Prescribed Conditions

A9. The Applicant must comply with all relevant prescribed conditions of development consent under Part 6, Division 8A of the EP&A Regulation.

Secretary as Moderator

A10. In the event of a dispute between the Applicant and a public authority, in relation to an applicable requirement in this approval or relevant matter relating to the Development, either party may refer the matter to the Secretary for resolution. The Secretary’s resolution of the matter shall be binding on the parties.

Long Service Levy

A11. For work costing $25,000 or more, a Long Service Levy must be paid. For further information please contact the Long Service Payments Corporation Helpline on 131 441.

Legal Notices

A12. Any advice or notice to the consent authority shall be served on the Secretary.

Review of Strategies, Plans and Programs

A13. Within three months of:

a) the submission of a compliance report under conditions of this consent;

b) the submission of an incident report under conditions of this consent;

c) the submission of an Independent Environmental Audit under conditions of this consent;

d) the approval of any modification to the conditions of this consent; or

e) the issue of a direction of the Secretary under condition A3, the strategies, plans and programs required under this consent must be reviewed, and the Department must be notified in writing that a review is being carried out.

A14. If necessary to either improve the environmental performance of the development, cater for a modification or comply with a direction, the strategies, plans and programs required under this consent must be revised and submitted:

a) to the Secretary’s satisfaction if previously approved by the Secretary; or

b) to the Secretary for information.
Where revisions are required, the revised document must be submitted to the Secretary within six weeks of the review.

*Note: This is to ensure the strategies, plans and programs are updated on a regular basis and to incorporate any recommended measures to improve the environmental performance of the development.*

**Incident Notification, Reporting and Response**

A15. The Department must be notified in writing to compliance@planning.nsw.gov.au within 24 hours after the Applicant becomes aware of an incident. The notification must identify the development (including the development application number and the name of the development if it has one), and set out the location and nature of the incident.

A16.

a) A written incident notification must also be emailed to the Department at the following address: compliance@planning.nsw.gov.au within seven days after the Applicant becomes aware of an incident. Notification is required to be given under this condition even if the Applicant forms the view that an incident has not occurred.

b) Written notification of an incident must:
   i) identify the development and application number;
   ii) provide details of the incident (date, time, location, a brief description of what occurred and why it is classified as an incident);
   iii) identify how the incident was detected;
   iv) identify when the Applicant became aware of the incident;
   v) identify any actual or potential non-compliance with conditions of consent;
   vi) describe what immediate steps were taken in relation to the incident;
   vii) identify further action(s) that will be taken in relation to the incident; and
   viii) identify a project contact for further communication regarding the incident.

A17.

a) Within 30 days of the date on which the incident occurred or as otherwise agreed to by the Secretary, the Applicant must provide the Secretary and any relevant public authorities (as determined by the Secretary) with a detailed report on the incident addressing all requirements for such reporting set out in A15(b), and such further reports as may be requested.

b) The Incident Report must include:
   i) a summary of the incident;
   ii) outcomes of an incident investigation, including identification of the cause/s of the incident;
   iii) details of the corrective and preventative actions that have been, or will be, implemented to address the incident and prevent recurrence; and
   iv) details of any communication with other stakeholders regarding the incident.

**Non-compliance Notification and Reporting**

A18. The Department must be notified in writing to compliance@planning.nsw.gov.au within seven days after the Applicant becomes aware of any non-compliance. The Certifying Authority must also notify the Department in writing to compliance@planning.nsw.gov.au within seven days after they identify any non-compliance.
A19. The notification must identify the development and the application number for it, set out the condition of consent that the development is non-compliant with, the way in which it does not comply and the reasons for the non-compliance (if known) and what actions have been, or will be, undertaken to address the non-compliance.

Monitoring and Environmental Audits

A20. Any condition of this consent that requires the carrying out of monitoring or an environmental audit, whether directly or by way of a plan, strategy or program, is taken to be a condition requiring monitoring or an environmental audit under Division 2B of Part 6 of the EP&A Act. This includes conditions in respect of incident notification, reporting and response, non-compliance notification and independent environmental auditing.

Note: For the purposes of this condition, as set out in the EP&A Act, “monitoring” is monitoring of the development to provide data on compliance with the consent or on the environmental impact of the development, and an “environmental audit” is a periodic or particular documented evaluation of the development to provide information on compliance with the consent or the environmental management or impact of the development.

Applicability of Guidelines

A21. References in the conditions of this consent to any guideline, protocol, Australian Standard or policy are to such guidelines, protocols, Standards or policies in the form they are in as at the date of this consent.

However, consistent with the conditions of this consent and without altering any limits or criteria in this consent, the Secretary may, when issuing directions under this consent in respect of ongoing monitoring and management obligations, require compliance with an updated or revised version of such a guideline, protocol, Standard or policy, or a replacement of them.
PART B PRIOR TO COMMENCEMENT OF WORKS

Notice of Commencement of Works

B1. The Department, Certifying Authority and Council must be notified in writing of the dates of commencement of physical work and operation at least 48 hours before those dates.

If the construction or operation of the development is to be staged, the Department, Certifying Authority and Council must be notified in writing at least 48 hours before the commencement of each stage, of the date of commencement and the development to be carried out in that stage.

Certified Plans

B2. Plans certified in accordance with section 109R of the EP&A Act are to be submitted to the Certifying Authority and the Department prior to commencement of each stage of the construction works and must include details as required by any of the following conditions.

Reflectivity

B3. The building materials used on the facades of the structure must have a maximum normal specular reflectivity of visible light of 20 per cent and must be designed so as not to result in glare that causes any discomfort or threatens the safety of pedestrians or drivers. A statement demonstrating compliance with these requirements or where compliance cannot be met a report that demonstrates that the exceedance would not result in glare that causes any discomfort or threatens the safety of pedestrians or drivers is to be submitted to the satisfaction of the Certifying Authority prior to the commencement of above ground works.

Outdoor Lighting

B4. All outdoor lighting within the site must comply with, where relevant, AS 1158.3.1:2005 Pedestrian Area (Category P) Lighting and AS 4282-1997 Control of the Obtrusive Effects of Outdoor Lighting. Details demonstrating compliance with these requirements are to be submitted to the satisfaction of the Certifying Authority prior to the commencement of above ground works.

Access for People with Disabilities

B5. The works that are the subject of this application must be designed and constructed to provide access and facilities for people with a disability in accordance with the Building Code of Australia (BCA). The Certifying Authority must ensure that evidence of compliance with this condition from an appropriately qualified person is provided and that the requirements are referenced on any certified plans.

Bicycle Parking and End-of-Trip Facilities

B6. Plans demonstrating compliance with the following requirements for bicycle parking shall be submitted to the satisfaction of the Certifying Authority:
   a) the provision of a minimum of eight bicycle parking spaces are to be provided at the front entrance of the museum for visitors and a minimum of four bicycle parking spaces are to be located in the loading dock for staff;
   b) the layout, design and security of bicycle facilities shall comply with the all applicable minimum requirements of AS 2890.3:2015 Parking facilities – Bicycle parking, and be located in secure, convenient and accessible areas close to the main entries and incorporating adequate lighting and opportunities for passive surveillance; and
   c) the provision of end-of-trip facilities for staff including shower, changeroom and lockers.
Erosion and Sedimentation Control

B7. Soil erosion and sediment control measures must be designed in accordance with the document *Managing Urban Stormwater – Soils & Construction Volume 1* (Landcom, 2004). Details are to be submitted to the satisfaction of the Certifying Authority prior to the commencement of any works.

Pre-Construction Dilapidation Reports

B8. The Applicant is to engage a qualified structural engineer to prepare a **Pre-Construction Dilapidation Report** detailing the current structural condition of all retained existing and adjoining buildings within the site, infrastructure and roads within the ‘zone of influence’. Any entry into private land is subject to the consent of the owner(s) and any inspection of buildings on privately affected land must include details of the whole building where only part of the building falls within the ‘zone of influence’. The report must be submitted to the satisfaction of the Certifying Authority prior to the commencement of any works. A copy of the report is to be forwarded to Council.

In the event that access for undertaking a **Pre-Construction Dilapidation Report** is denied by an adjoining owner, the applicant must demonstrate, in writing, to the satisfaction of the Secretary that all reasonable steps have been taken to obtain access and advise the affected property owner of the reason for the report and that these steps have failed.

Car Parking and Service Vehicle Layout

B9. Plans demonstrating compliance with the following traffic and parking requirements must be submitted to the satisfaction of the Certifying Authority prior to the commencement of above ground works:

   a) all vehicles should enter and leave the Subject Site in a forward direction. In the event that site constraints do not permit heavy rigid vehicles to enter and leave in a forward direction, then all reversing movements should be undertaken under the control of certified traffic controllers to ensure public safety when vehicles are reversing;

   b) all construction vehicles (excluding worker vehicles) are to be contained wholly within the site or designated work zone and vehicles must enter the site and/or work zone before stopping;

   c) all works/ regulatory signposting associated with the proposed development must be at no cost to the relevant roads authority; and

   d) the swept path of the longest vehicle entering and exiting the Subject Site in association with the new work, as well as manoeuvrability through the Subject Site, must be in accordance with AUSTROADS. In this regard, a plan must be submitted to the certifying authority for approval, which shows that the proposed development complies with this requirement.

Structural Details

B10. Prior to the commencement of works, the Applicant must submit for the approval of the Certifying Authority structural drawings prepared and signed by a suitably qualified practising Structural Engineer that demonstrates compliance with:

   a) the relevant clauses of the BCA; and

   b) this development consent.

Mechanical Plant and Equipment

B11. Prior to the commencement of works, the Applicant must demonstrate that the mechanical plant and equipment is designed to meet the following criteria:

   a) does not generate noise (measured at the most affected or potentially affected residence) that exceeds:
i) 53 dBA \( \text{LAeq(period)} \) for the daytime and evening periods, and
ii) 45 dBA \( \text{LAeq(15minute)} \) for the night time period; and

b) does not generate noise that exhibits tonal, low frequency or other annoying characteristics.

Details are to be provided by a qualified acoustic engineer to the Certifying Authority prior to commencement of work.

**Mechanical Ventilation**

B12. All mechanical ventilation systems must be installed in accordance with Part F4.5 of the BCA and must comply with the AS 1668.2-2012 *The use of ventilation and air-conditioning in buildings – Ventilation design for indoor air containment control* and AS 3666.2:2011 *Air-handling and water systems of buildings* to ensure adequate levels of health and amenity to the occupants of the building and to ensure environment protection. Details must be submitted for the approval of the Certifying Authority prior to the commencement of above ground works.

**Warm Water Systems and Cooling Systems**

B13. The installation, operation and maintenance of warm water systems and water cooling systems (as defined under the Public Health Act 2010) must comply with the Public Health Act 2010, Public Health Regulation 2012 and Parts 1 and 2 (or Part 3 if a Performance-based water cooling system) of AS/NZS 3666.2:2011 *Air handling and water systems of buildings – Microbial control – Operation and maintenance* and the NSW Health Code of Practice for the Control of Legionnaires’ Disease.

**Storage and Handling of Waste**

B14. The building plans and specifications must demonstrate, for the approval of the Certifying Authority, that an appropriate area will be provided within the premises for the storage of garbage bins, recycling containers and all waste and recyclable material generated by the premises. Requirements of these storage areas must:

a) ensure all internal walls of the storage area are rendered to a smooth surface, coved at the floor/wall intersection, graded and appropriately drained with a tap in close proximity to facilitate cleaning;

b) include provision for the separation and storage, in appropriate categories, of material suitable for recycling; and

c) include provision for separate storage and collection of organic/food waste.

**Food Standards**

B15. The fitout of the food premises shall be carried out in accordance with AS 4674 *Design, construction and fit-out of food premises*. Details of compliance with the relevant provisions of the food code shall be prepared by a suitably qualified person and submitted to the satisfaction of the Certifying Authority prior to the commencement of works, except site preparatory works.

**Stormwater and Drainage Works Design**

B16. Final design plans of the stormwater drainage systems, prepared by a qualified practicing professional and in accordance with the requirements of Council, must be submitted to the Certifying Authority prior to the commencement of any works. The hydrology and hydraulic calculations must be based on models described in the current edition of Australian Rainfall and Runoff.
Road Design

B17. Kerb and gutter, stormwater drainage, full road width pavement including traffic facilities (vehicle crossings, if applicable) and paved footpaths must be constructed along the area where road works are to be undertaken. In relation to public roads or classified road (as defined under the Roads Act 1993), all roads and traffic facilities must be designed to meet the requirements of Council and RMS (if applicable) and obtain the necessary permits and approvals from the relevant road authority, prior to the commencement of road or pavement construction works.

Construction Environmental Management Plan

B18. a) Prior to the commencement of construction works, a Construction Environmental Management Plan (CEMP) must be submitted for the approval of the Certifying Authority. The CEMP must address, but not be limited to, the following matters where relevant:
   i) hours of work;
   ii) 24 hour contact details of site manager;
   iii) traffic management, in consultation with Council;
   iv) construction noise and vibration management, prepared by a suitable qualified person;
   v) management of dust and odour to protect the amenity of the neighbourhood;
   vi) erosion and sediment control;
   vii) stormwater control and discharge;
   viii) measures to ensure that sediment and other materials are not tracked onto the roadway by vehicles leaving the Subject Site;
   ix) procedures for encountering groundwater during construction works;
   x) external lighting in compliance with AS4282:1997 Control of the Obtrusive Effects of Outdoor Lighting;
   xi) a protocol detailing appropriate procedures for identifying and dealing with unexpected finds of site contamination (including asbestos containing materials, Polycyclic aromatic hydrocarbons (PAHs), Total recoverable hydrocarbons (TRH) and lead-based paint);
   xii) a protocol detailing appropriate procedures for identifying and dealing with unexpected finds of archaeological and Aboriginal heritage;
   xiii) waste classification (for materials to be removed) and validation (for materials to remain) be undertaken to confirm the contamination status in these areas of the site; and
   xiv) waste storage, recycling and litter control;
   b) The CEMP must not include works that have not been explicitly approved in this development consent. In the event of any inconsistency between the consent and the CEMP, the consent must prevail; and
   c) The Applicant must submit a copy of the CEMP to the Department and Council prior to commencement of work.

B19. The CEMP (as revised from time to time) must be implemented by the Applicant for the duration of the construction works.

Construction Noise and Vibration Management Plan

B20. a) Prior to the commencement of works, a Construction Noise and Vibration Management Plan (CNVMP) must be submitted for the approval of the Certifying Authority. The CNVMP must address, but not be limited to, the following matters where relevant:
   i) be prepared by a suitably qualified expert;
ii) be prepared in consultation with Council and all noise sensitive receivers where noise levels exceed the construction noise management level, in accordance with EPA guidelines;

iii) describe the measures that would be implemented to ensure:
   i. best management practice is being employed;
   ii. compliance with the relevant conditions of this consent;

iv) describe the proposed noise and vibration management measures in detail;

v) include strategies that have been developed to address impacts to noise sensitive receivers where noise levels exceed the construction noise management level, for managing high noise generating works;

vi) describe the consultation undertaken to develop the strategies in v) above;

vii) evaluates and reports on the effectiveness of the noise and vibration management measures; and

viii) include a complaints management system that would be implemented for the duration of the construction works.

b) The Applicant must submit a copy of the CNVMP to the Department and Council prior to commencement of work.

B21. The CNVMP (as revised from time to time) must be implemented by the Applicant for the duration of the construction works.

Construction Waste Management Plan

B22.  

a) Prior to the commencement of works, a Construction Waste Management Plan (CWMP) must be submitted for the approval of the Certifying Authority. The CWMP must address, but not be limited to, the following matters where relevant:

i) recycling of demolition materials including concrete; and

ii) removal of hazardous materials and disposal at an approved waste disposal facility in accordance with the requirements of the relevant legislation, codes, standards and guidelines, prior to the commencement of any building works.

b) Details demonstrating compliance with the relevant legislative requirements, associated with the removal of hazardous waste, particularly the method of containment and control of emission of fibres to the air, are to be submitted for the approval of the Certifying Authority prior to the removal of any hazardous materials;

c) The Applicant must notify the RMS Traffic Management Centre of the truck route(s) to be followed by trucks transporting waste material from the Subject Site, prior to the commencement of the removal of any waste material from the Subject Site; and

d) The Applicant must submit a copy of the plan to the Department and to the Council prior to the commencement of work.

B23. The CWMP (as revised from time to time) must be implemented by the Applicant for the duration of the construction works.

Construction Traffic and Pedestrian Management Plan

B24.  

a) Prior to the commencement of construction works, a Construction Traffic and Pedestrian Management Plan (CTPMP) must be prepared by a suitably qualified expert in consultation with Council, RMS and TfNSW (Sydney Coordination Office), and submitted for the approval of the Certifying Authority. The CTPMP must address, but not be limited to, the following matters where relevant:

i) location of proposed work zones;

ii) haulage routes;

iii) construction vehicle access arrangements;

iv) construction hours;

v) construction program;
vi) predicted construction traffic volumes and vehicle movements, types and routes including any known road closures and consideration of alternate routes;

vii) details of construction vehicle movements including parking, dedicated vehicle turning areas and ingress and egress points;

viii) loading and unloading;

ix) details of management measures to minimise traffic impacts, including temporary road works and/or implementation of traffic control measures;

x) pedestrian and traffic management methods;

xi) any potential impacts to general traffic, cyclists, pedestrians and bus services within the vicinity of the site from construction vehicles during the works;

xii) consideration of the cumulative construction traffic impacts of surrounding projects under construction, including those within the University of Sydney precinct. Existing CTPMPs for developments within or around the Subject Site should be referenced in the CTPMP to ensure that the coordination of work activities are managed to minimise impacts on the surrounding road network; and

xiii) should impacts be identified, the duration of the impacts and measures proposed to mitigate any associated general traffic, public transport, pedestrian and cyclist impacts.

b) The Applicant must submit a copy of the CTPMP to the Secretary and City of Sydney Council, prior to the commencement of works.

B25. The CTPMP (as revised from time to time) must be implemented by the Applicant for the duration of the construction works.

Complaints and Enquiries Procedure

B26. Prior to the commencement of construction works, or as otherwise agreed by the Secretary, the following must be made available for community enquiries and complaints for the duration of construction:

a) a toll-free 24 hour telephone number(s) on which complaints and enquiries about the carrying out of any works may be registered;

b) a postal address to which written complaints and enquires may be sent; and

c) an email address to which electronic complaints and enquiries may be transmitted.

B27. A Complaints Management System must be prepared prior to the commencement of any construction works and be implemented and maintained for the duration of these works.

The Complaints Management System must include a Complaints Register to be maintained recording information on all complaints received about the development during the carrying out of any works associated with the development. The Complaints Register must record the:

a) number of complaints received;

b) number of people affected in relation to a complaint; and

c) nature of the complaint and means by which the complaint was addressed and whether resolution was reached, with or without mediation.

The Complaints Register must be provided to the Secretary upon request, within the timeframe stated in the request.

Utility Services

B28. Prior to the commencement of construction work the Applicant is to negotiate (where necessary) with the utility authorities (e.g. Ausgrid and telecommunication carriers) in connection with the relocation and/or adjustment of the services affected by the construction of the building structure.
B29. Prior to the commencement of above ground works written advice must be obtained from the electricity supply authority, an approved telecommunications carrier and an approved gas carrier (where relevant) stating that satisfactory arrangements have been made to ensure provisions of adequate services.

External Walls and Cladding

B30. The external walls of all buildings, including additions to existing buildings, must comply with the relevant requirements of the NCC. Prior to commencement of works, the Applicant must provide the Certifying Authority with documented evidence that the products and systems proposed for use external walls, including finishes and claddings such as synthetic or aluminium composite panels, comply with the requirements of the NCC.

The Applicant must provide a copy of the documentation given to the Certifying Authority to the Secretary within seven days after the Certifying Authority accepts it.

Compliance Reporting

B31. A Pre-Construction Compliance Report must be prepared for the development, and submitted to the Certifying Authority for approval before the commencement of construction works. A copy of the endorsed compliance report must be provided to the Department at compliance@planning.nsw.gov.au before the commencement of construction works.

B32. The Pre-Construction Compliance Report must include:
   a) details of how the terms of this consent that must be addressed before the commencement of construction have been complied with; and
   b) the expected commencement date for construction.

Tree Removal

B33. Prior to tree removal, tree hollows are to be checked by a qualified ecologist or wildlife carer for the presence of bats. Any bats found are to be relocated, unless in torpor, in which case relocation and tree removal is to be delayed until the end of the torpor period.

Independent Environmental Audit

B34. No later than one month before the commencement of construction works or within another timeframe agreed with the Secretary, a program of independent environmental audits must be prepared for the development in accordance with the latest version of AS/NZS ISO 19011-2014: Guidelines for Auditing Management Systems (Standards Australia, 2014) and submitted to the Secretary for information.

B35. The scope of each audit must be defined in the program. The program must ensure that environmental performance of the development in relation to each compliance requirement that forms the audit scope is assessed at least once in each audit cycle.

B36. The environmental audit program prepared and submitted to the Secretary in accordance with conditions B35 and B36 above must be implemented and complied with for the duration of the development.

B37. All independent environmental audits of the development must be conducted by a suitably qualified, experienced and independent team of experts and be documented in an audit report which:
   a) assesses the environmental performance of the development, and its effects on the surrounding environment including the community;
   b) assesses whether the development is complying with the terms of this consent;
c) reviews the adequacy of any document required under this consent; and

d) recommends measures or actions to improve the environmental performance of the development, and improvements to any document required under this consent.

B38. Within three months of commencing an Independent Environmental Audit, or within another timeframe agreed by the Secretary, a copy of the audit report must be submitted to the Secretary, and any other NSW agency that requests it, together with a response to any recommendations contained in the audit report, and a timetable for the implementation of the recommendations. The recommendations must be implemented to the satisfaction of the Secretary.
PART C    DURING CONSTRUCTION

Approved Plans to be On-site

C1. A copy of the approved and certified plans, specifications and documents incorporating conditions of approval and certification must be kept on the Subject Site at all times and must be readily available for perusal by any officer of the Department, Council or the Certifying Authority.

Construction Hours

C2.

a) Construction, including the delivery of materials to and from the site, may only be carried out between the following hours:
   i) between 7 am and 6 pm, Mondays to Fridays inclusive; and
   ii) between 7.30 am and 3.30 pm, Saturdays.

b) No work may be carried out on Sundays or public holidays.

c) Activities may be undertaken outside of these hours:
   i) if required by the Police or a public authority for the delivery of vehicles, plant or materials; or
   ii) if required in an emergency to avoid the loss of life, damage to property or to prevent environmental harm; or
   iii) works are inaudible at the nearest sensitive receivers; or
   iv) if a variation is approved in advance in writing by the Secretary or her nominee.

d) Notification of such activities must be given to affected residents before undertaking the activities or as soon as is practical afterwards.

C3. Rock breaking, rock hammering, sheet piling, pile driving and similar activities may only be carried out between the following hours:

   a) 9 am to 12 pm, Monday to Friday;
   b) 2 pm to 5 pm Monday to Friday; and
   c) 9 am to 12 pm, Saturday.

Construction Noise Management

C4. The development must be constructed with the aim of achieving the construction noise management levels detailed in the Interim Construction Noise Guideline (Department of Environment and Climate Change, 2009). All feasible and reasonable noise mitigation measures must be implemented and any activities that could exceed the construction noise management levels must be identified and managed in accordance with the CNVMP required under condition B21.

C5. If the noise from a construction activity is substantially tonal or impulsive in nature (as described in Chapter 4 of the Noise Policy for Industry, 5 dB(A) must be added to the measured construction noise level when comparing the measured noise with the construction noise management levels.

C6. The Applicant must ensure construction vehicles do not arrive at the Subject Site or surrounding residential precincts outside of the construction hours of work outlined under condition C2.

C7. The use of impact piling is not permitted.

C8. The Applicant must schedule intra-day ‘respite periods’ for construction activities identified in the Interim Construction Noise Guideline (Department of Environment and Climate Change, 2009) as being particularly annoying or intrusive to noise sensitive receivers, including surrounding residents and nearby hospital buildings. These
activities are to be carried out after 8 am only and over continuous periods no exceeding three hours (with at least a one hour respite every three hours).

C9. Wherever practical, and where sensitive receivers may be affected, piling activities are completed using bored piles. If driven piles are required they must only be installed where outlined in a CNVMP required under condition B21.

C10. The Applicant must implement, where practicable and without compromising the safety of construction staff or members of the public, the use of audible movement alarms of a type that would minimise noise impacts on surrounding noise sensitive receivers.

C11. Any noise generated during construction of the development must not be offensive noise within the meaning of the Protection of the Environment Operations Act 1997 or exceed approved noise limits for the Subject Site.

Vibration Criteria

C12. Vibration caused by the construction works at any residence or structure outside the Subject Site must be limited to:
   a) for structural damage vibration, German Standard DIN 4150 Part 3 Structural Vibration in Buildings. Effects on Structures;
   b) for human exposure to vibration, the evaluation criteria presented in British Standard BS 6472 – Guide to Evaluate Human Exposure to Vibration in Buildings (1 Hz to 80 Hz) for low probability of adverse comment;
   c) vibratory compactors must not be used closer than 30 metres from residential buildings unless vibration monitoring confirms compliance with the vibration criteria specified above; and
   d) these limits apply unless otherwise outlined in the CNVMP required under Condition B21 and submitted for the approval of the Certifying Authority.

Waste

C13. All waste generated during construction must be assessed, classified and managed in accordance with the Waste Classification Guidelines Part 1: Classifying Waste (EPA, 2014).

C14. The body of any vehicle or trailer used to transport waste or excavation spoil must be covered before leaving the premises to prevent any spillage or escape of any dust, waste of spoil. Mud, splatter, dust and other material likely to fall from or be cast off the wheels, underside or body of any vehicle, trailer or motorised plant leaving the site must be removed before leaving the premises.

C15. The Applicant must ensure that concrete waste and rinse water are not disposed of on the Subject Site and are prevented from entering any natural or artificial watercourse.

Handling of Asbestos

C16. The Applicant is to consult with SafeWork NSW concerning the handling of any asbestos waste that may be encountered during construction. The requirements of the Protection of the Environment Operations (Waste) Regulation 2014 with particular reference to Part 7 – ‘Transportation and management of asbestos waste’ must also be complied with.

Unexpected Finds – Non-Aboriginal Heritage

C17. If any unexpected archaeological deposits/relics are discovered during construction, then all works must cease immediately in that area and the OEH Heritage Division contacted in writing. Depending on the possible significance of the discovery, an archaeological assessment and management strategy may be required before further
works can continue in that area. Works may only recommence with the written approval of the OEH Heritage Division.

Unexpected Finds – Aboriginal Heritage

C18. In the event that surface disturbance identified an Aboriginal object, all works must halt in the immediate area to prevent any further impacts to the object(s). A suitably qualified archaeologist and the registered Aboriginal representatives must be contacted to determine the significance of the objects. The site is to be registered in the Aboriginal Heritage Information System (AHIMS) which is managed by OEH and the management outcome for the site included in the information provided to AHIMS. The Applicant must consult with the Aboriginal community representatives, the archaeologists and OEH, to development and implement management strategies for all projects/site.

Tree Protection

C19. Prior to commencement and for the duration of works, the tree protection measures outlined in the Arboricultural Impact Assessment, prepared by ArborSafe, dated 12 May 2017, are to be implemented and maintained.

Erosion and Sediment Control

C20. All erosion and sediment control measures, are to be effectively implemented and maintained at or above design capacity for the duration of the construction works and until such time as all ground disturbed by the works have been stabilised and rehabilitated so that it no longer acts as a source of sediment.

Disposal of Seepage and Stormwater

C21. Any seepage or rainwater collected on-site during construction or groundwater must not be pumped to the street stormwater system unless separate prior approval is given in writing by the relevant approval authority where necessary.

Road Occupancy Licence

C22. A Road Occupancy Licence must be obtained from the Transport Management Centre (RMS) for any works that impact on traffic flows on public roads or classified roads (as those terms are defined under the Roads Act 1993), during construction activities.

Unloading of Construction Materials

C23. The loading and unloading of construction materials must not be carried out on Parramatta Road in order to ensure the continued and unimpeded operation of existing public transport services.

Site Notice

C24.  
   a) A site notice(s) must be prominently displayed at the boundaries of the Subject Site for the purposes of informing the public of project details including, but not limited to the details of the Builder, Certifying Authority and Structural Engineer.  
   b) The site notice(s) is to satisfy all but not be limited to, the following requirements:  
     i) minimum dimensions of the notice are to measure 841 mm x 594 mm (A1) with any text on the notice to be a minimum of 30 point type size;  
     ii) the notice is to be durable and weatherproof and is to be displayed throughout the works period;  
     iii) the approved hours of work, the name of the site/project manager, the responsible managing company (if any), its address and 24 hour contact phone number for any inquiries, including construction/noise complaint are to be displayed on the site notice; and
iv) the notice(s) is to be mounted at eye level on the perimeter hoardings/fencing and is to state that unauthorised entry to the Subject Site is not permitted.

Work Cover Requirements

C25. To protect the safety of work personnel and the public, the Subject Site must be adequately secured to prevent access by unauthorised personnel, and work must be conducted at all times in accordance with relevant Work Cover requirements.

Hoarding/Fencing Requirements

C26. The following hoarding requirements must be complied with:
   a) no third party advertising is permitted to be displayed on the subject hoarding/fencing;
   b) the construction site manager must be responsible for the removal of all graffiti from any construction hoardings or the like within the construction area within 48 hours of its application; and
   c) the applicant must submit a hoarding application to Council for the installation of any hoardings over Council footways or road reserve.

No Obstruction of Public Way

C27. The public way, being land owned by Council or a Government agency (outside of any construction works zone), must not be obstructed by any materials, vehicles, refuse, skips or the like, under any circumstances. Non-compliance with this requirement will result in the issue of a notice by the relevant Authority to stop all works on site.

Access to Information

C28. At least 48 hours before the commencement of construction until the completion of all works under this consent, or such other time as agreed by the Secretary, the Applicant must:
   a) make the following information and documents (as they are prepared, obtained or approved) publicly available on its website:
      i) the documents referred to in condition A2 of this consent;
      ii) all current statutory approvals for the development;
      iii) all approved strategies, plans and programs required under the conditions of this consent;
      iv) regular reporting on the environmental performance of the development in accordance with the reporting arrangements in any plans or programs approved under the conditions of this consent;
      v) a comprehensive summary of the monitoring results of the development, reported in accordance with the specifications in any conditions of this consent, or any approved plans and programs;
      vi) a summary of the current stage and progress of the development;
      vii) contact details to enquire about the development or to make a complaint;
      viii) a complaints register, updated monthly;
      ix) audit reports prepared as part of any independent environmental audit of the development and the Applicant’s response to the recommendations in any audit report;
      x) any other matter required by the Secretary; and
   b) keep such information up to date, to the satisfaction of the Secretary.

Note: This condition does not require any confidential information to be made available to the public.
Incident Reporting

C29. Within 24 hours of the occurrence of an incident that causes (or may cause) significant harm to the environment, the Applicant must notify the Secretary and any other relevant agencies of the incident in accordance with condition no. A15.

C30. Within seven days of the detection of the incident, the Applicant must provide the Secretary and any relevant agencies with a detailed report on the incident, and such further reports as may be requested in accordance with condition no. A16.

Compliance Tracking and Reporting

C31. The Applicant must provide regular (six monthly) reporting on any environmental performance required by the development consent for the development on its project website, in accordance with the reporting arrangements in any plans or other documents approved under the conditions of this consent.

Compliance – General

C32. The Applicant must ensure that all of its employees, contractors (and their sub-contractors) are made aware of, and are instructed to comply with, the conditions of this consent relevant to activities they carry out in respect of the development.

C33. Construction Compliance Reports must be submitted to the Department at compliance@planning.nsw.gov.au for information every six months from the date of the commencement of construction, for the duration of construction. The Construction Compliance Reports must provide details on the compliance performance of the development for the preceding six months and must be submitted within one month following the end of each six month period for the duration of the construction of the development, or such other timeframe as required by the Secretary.

C34. The Construction Compliance Reports must include:

a) a results summary and analysis of environmental monitoring;
b) the number of any complaints received, including a summary of main areas of complaint, action taken, response given and proposed strategies for reducing the recurrence of such complaints;
c) details of any review of the CEMP and associated sub-plans as a result of construction carried out during the reporting period;
d) a register of any modifications undertaken and their status;
e) results of any independent environmental audits and details of any actions taken in response to the recommendations of an audit;
f) a summary of all incidents notified in accordance with this consent; and
g) any other matter relating to compliance with the terms of this consent or as requested by the Secretary.

Protection of Public Infrastructure

C35. Unless the Applicant and the applicable authority agree otherwise, the Applicant must:

a) repair, or pay the full costs associated with repairing, any public infrastructure that is damaged by carrying out the development; and
b) relocate, or pay the full costs associated with relocating, any infrastructure that needs to be relocated as a result of the development.
PART D  PRIOR TO OCCUPATION OR COMMENCEMENT OF USE

Stormwater Quality Management Plan

D1. **A Stormwater Quality Management Plan** (SQMP) is to be prepared to ensure proposed stormwater quality measures remain effective. The SQMP must contain the following:
   a) maintenance schedule of all stormwater quality treatment devices;
   b) record and reporting details;
   c) waste management and disposal;
   d) traffic control measures (if required);
   e) relevant contact information;
   f) renewal, decommissioning and replacement timelines and activities of all stormwater quality treatment devices; and
   g) Work Health and Safety requirements.

Details demonstrating compliance are to be submitted for the approval of the Certifying Authority prior to occupation of the building.

Mechanical Ventilation

D2. Following completion, installation and testing of all the mechanical ventilation systems, the Applicant must provide evidence for the approval of the Certifying Authority, prior to occupation of the building, that the installation and performance of the mechanical systems complies with:
   a) the BCA;
   b) AS 1668.2-2012 *The use of airconditioning in buildings – Mechanical ventilation in buildings* and other relevant codes;
   c) the development consent and any relevant modifications; and
   d) any dispensation granted by the NSW Fire Brigade.

Road Damage

D3. The cost of repairing any damage caused to Council or other Public Authority’s assets in the vicinity of the Subject Site as a result of construction works associated with the approved development is to be met in full by the Applicant prior to occupation of the building.

Contamination

D4. The Applicant must submit to the Certifying Authority a **Site Audit Report** and **Site Audit Statement** prepared by an EPA accredited site auditor, prior to occupation of the building. The Site Audit Report and Site Audit Statement must verify that the land is suitable for the uses proposed as part of this consent.

Compliance Certificate

D5. A Section 73 Compliance Certificate under the *Sydney Water Act 1994* must be obtained from Sydney Water Corporation and submitted to the Certifying Authority prior to occupation of the building. Application must be made through an authorised Water Servicing Coordinator. Please refer to the “Your Business” section of the web site [www.sydneywater.com.au](http://www.sydneywater.com.au) then follow the “e-Developer” icon or telephone 13 20 92 for assistance.

Post-construction Dilapidation Report

D6. Prior to occupation of the building:
   a) The Applicant must engage a suitably qualified person to prepare a **Post-Construction Dilapidation Report** at the completion of the construction works.
The report is to ascertain whether the construction works created any structural damage to adjoining buildings or infrastructure.

b) The report is to be submitted for the approval of the Certifying Authority. In ascertaining whether adverse structural damage has occurred to adjoining buildings or infrastructure, the Certifying Authority must:
   i) compare the **Post-Construction Dilapidation Report** with the **Pre-Construction Dilapidation Report** required by these conditions; and
   ii) where relevant, have written confirmation from the relevant authority that there is no adverse structural damage to their infrastructure and roads.

c) A copy of this report must be submitted to Council.

**Fire Safety Certification**

D7. Prior to occupation of the building and if required, a Fire Safety Certificate must be obtained for all the Essential Fire or Other Safety Measures forming part of this consent. A copy of the Fire Safety Certificate must be submitted to the relevant authority and Council. The Fire Safety Certificate must be prominently displayed in the building.

**Rainwater Harvesting**

D8. The Applicant must ensure that a rainwater reuse/harvesting system for the Development is developed for the site. A rainwater re-use plan is to be prepared and certified by an experienced hydraulic engineer. A signed works-as-executed Rainwater Re-use Plan is to be provided to the Certifying Authority prior to occupation of the building.

**Structural Inspection Certificate**

D9. A **Structural Inspection Certificate** or a **Compliance Certificate** must be submitted for the approval of the Certifying Authority prior to occupation of the building. A copy of the Certificate with an electronic set of final drawings (contact approval authority for specific electronic format) must be submitted to the Secretary and Council after:
   a) the site has been periodically inspected and the Certifier is satisfied that the structural works are deemed to comply with the final design drawings; and
   b) the drawings listed on the Inspection Certificate have been checked with those listed on the final Design Certificate/s.

**Compliance with Food Code**

D10. The Applicant is to obtain a certificate from a suitably qualified tradesperson, certifying that the kitchen, food storage and food preparation areas have been fitted in accordance with the AS 4674 *Design, construction and fit-out of food premises*. The Applicant shall provide evidence of receipt of the certificate to the satisfaction of the Certifying Authority prior to the commencement of the building(s) or commencement of the use.

**Signage**

D11. Wayfinding signage must be integrated at all entry and exit points and is to be installed prior to occupation of the building.

**Surveillance**

D12. CCTV and suitable lighting must be provided on the external perimeter of the building prior to occupation of the building.

**Physical Model**

D13. Prior to occupation or commencement of use of the building, an accurate 1:500 scale model of the development as constructed must also be submitted to Council for placement in the City Model at Town Hall House and the City Exhibition Space. The model is required to:
b) comply with all of the conditions of the development consent; and
c) be amended to reflect any further modifications to the approval that affect the external appearance of the building.

**Submission of Electronic CAD Model**

**D14.**

a) Prior to the commencement of use of the building, an accurate 1:1 electronic CAD model of the completed development must be submitted to Council for the electronic Visualisation City Model.

b) The data required to be submitted within the surveyed location must include and identify:
   i) building design above and below ground in accordance with the development consent;
   ii) all underground services and utilities, underground structures and basements, known archaeological structures and artefacts; and
   iii) a current two points on the site boundary clearly marked to show their Northing and Easting MGA (Map Grid of Australia) coordinates, which must be based on Established Marks registered in the Department of Lands and Property Information’s SCIMS Database with a Horizontal Position Equal to or better than Class C.

The data is to be submitted as a DGN or DWG file on a Compact Disc. All modelling is to be referenced to the Map Grid of Australia (MGA) spatially located in the Initial Data Extraction file.

c) The electronic model must be constructed in accordance with the City’s 3D CAD electronic model specification. The specification is available online at [http://www.cityofsydney.nsw.gov.au/development/application-guide/application-process/model-requirements](http://www.cityofsydney.nsw.gov.au/development/application-guide/application-process/model-requirements) Council’s Modelling staff should be consulted prior to creation of the model. The data is to comply with all of the conditions of the development consent.

**External Walls and Cladding**

**D15.** The external walls of the building, including additions to existing buildings, must comply with the relevant requirements of the NCC. Prior to occupation, the Applicant must provide the Certifying Authority with documented evidence that the products and systems used in the construction of external walls, including finishes and claddings such as synthetic or aluminium composite panels, comply with the relevant requirements of the NCC as built.

The Applicant must provide a copy of the documentation given to the Certifying Authority to the Secretary within seven days after the Certifying Authority accepts it.
PART E  POST OCCUPATION

Plant and Equipment
E1. All plant and equipment used on site, or to monitor the performance of the development must be:
   a) maintained in a proper and efficient condition; and
   b) operated in a proper and efficient manner.

Noise Control – Operation
E2. The Applicant must ensure that all terraces and other outdoors areas are not used between the hours of 10 pm and 8 am.
E3. The Applicant must ensure that events held at the museum and on associated terraces and other outdoor areas, do not generate noise that exhibits tonal, low frequency or other annoying characteristics.
E4. Noise associated with the operation of any plant, machinery or other equipment on the Subject Site, must not exceed
   a) 53 dBA LAeq(period) daytime and evening
   b) 45 dBA LAeq(15min) night-time period
   when measured at the boundary of the most sensitive receiver at 13 Arundel Street, Glebe.
E5. The Applicant must undertake noise monitoring of mechanical plant and equipment, to collect valid data and provide a quantitative assessment of operational noise impacts following the occupation of the building.
   The noise monitoring must be carried out by an appropriately qualified person and a monitoring report must be submitted to the Secretary within three months of full occupation of the building to verify that operational noise levels do not exceed the noise levels referenced in condition B11 and E4.
E6. Should the short-term noise monitoring required under Condition E5 identify any exceedance of the recommended noise levels in Condition E4, the Applicant must implement appropriate on-site noise attenuation measures to ensure operational noise levels do not exceed the recommended noise levels and/or provide noise attenuation measures at the affected noise sensitive receivers.
   The implementation of noise attenuation measures, either on-site or at the affected receiver(s), must be provided within three months of the completion of the short-term noise monitoring required under condition E5, or other appropriate time period as agreed by the Secretary.

Hours of Operation
E7. The approved hours of operation are limited to the following:
   a) Museum opening hours to general public:
      i) Saturday to Tuesday – 10 am to 9 pm
      ii) Wednesday to Friday – 10 am to 11 pm
   b) Teaching Use:
      i) Monday to Sunday – 8 am to 9 pm
   c) Office Hours (for staff):
      i) Monday to Friday – 7 am to 7 pm
   d) Café:
      i) Saturday to Tuesday- 8 am to 9 pm
ii) Wednesday to Friday – 8 am to 11 pm.

Loading and Unloading

E8. All loading and unloading of service vehicles in connection with the use of the premises must be carried out within the designated loading and unloading areas at all times.

E9. The operation of the loading dock is to be managed in accordance with the Loading Dock Management Plan, dated 14 August 2017, prepared by ARUP.

E10. All vehicles are to enter and exit the loading dock in a forward direction.

Public Way to be Unobstructed

E11. The public way must not be obstructed by any materials, vehicles, refuse, skips or the like under any circumstances.

External Lighting

E12. External Lighting must comply with AS 4282: 1997 Control of the Obtrusive Effects of Outdoor Lighting. Upon installation of lighting, but before it is finally commissioned, the Applicant must submit to the Certifying Authority evidence from a qualified practitioner demonstrating compliance in accordance with this condition.
ADVISORY NOTES

Appeals
AN1. The Applicant has the right to appeal to the Land and Environment Court in the manner set out in the EP&A Act and the EP&A Regulation (as amended).

Other Approvals and Permits
AN2. The Applicant must apply to the relevant authority for all necessary permits including crane permits, road opening permits, hoarding or scaffolding permits, footpath occupation permits and/or any other approvals under Section 68 (Approvals) of the Local Government Act 1993 or Section 138 of the Roads Act 1993.

Responsibility for other consents / agreements
AN3. The Applicant is solely responsible for ensuring that all additional consents and agreements are obtained from other authorities, as relevant.

Use of Mobile Cranes
AN4. The Applicant must obtain all necessary permits required for the use of mobile cranes on or surrounding the Subject Site, including from the Civil Aviation Safety Authority, prior to the commencement of works. In particular, the following matters must be complied with:

a) For special operations including the delivery of materials, hoisting of plant and equipment and erection and dismantling of on-site tower cranes which warrant the on street use of mobile cranes, permits must be obtained from Council:
   i) At least 48 hours prior to the works for partial road closures which, in the opinion of Council will create minimal traffic disruptions, and
   ii) At least four weeks prior to the works for full road closures and partial road closures which, in the opinion of Council, will create significant traffic disruptions.

b) The use of mobile cranes must comply with the approved hours of construction and must not be delivered to the site prior to the approved construction hours without the prior approval of Council.

Temporary Structures
AN5. Unless otherwise declared as exempt development under State Environmental Planning Policy (Educational Establishment and Child Care Facilities) 2017 or State Environmental Planning Policy (Exempt and Complying Development Codes) 2008:

a) An approval under State Environmental Planning Policy (Temporary Structures) 2007 must be obtained from the Council for the erection of the temporary structures. The application must be supported by a report detailing compliance with the provisions of the BCA.

b) Structural certification from an appropriately qualified practicing structural engineer must be submitted to the Council with the application under State Environmental Planning Policy (Temporary Structures) 2007 to certify the structural adequacy of the design of the temporary structures.

c) Should the height of any temporary structure and/or equipment (including mobile cranes) be greater than 45.72 metres above existing ground level, approval must be sought in accordance with the Civil Aviation (Buildings Control) Regulation 1988, prior to the commencement of above ground works.
Disability Discrimination Act

AN6. This application has been assessed in accordance with the EP&A Act. No guarantee is given that the proposal complies with the Disability Discrimination Act 1992. The Applicant is responsible to ensure compliance with this and other anti-discrimination legislation. The Disability Discrimination Act 1992 covers disabilities not catered for in the minimum standards called up in the BCA which references AS 1428.1 - Design for Access and Mobility. AS1428 Parts 2, 3 & 4 provides the most comprehensive technical guidance under the Disability Discrimination Act 1992 currently available in Australia.

Commonwealth Environment Protection and Biodiversity Conservation Act 1999

AN7.

a) The Commonwealth Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act) provides that a person must not take an action which has, will have, or is likely to have a significant impact on a matter of national environmental significance matter; or Commonwealth land, without an approval from the Commonwealth Environment Minister.

b) This application has been assessed in accordance with the EP&A Act. The determination of this assessment has not involved any assessment of the application of the Commonwealth legislation. It is the Applicant’s responsibility to consult the Department of Sustainability, Environment, Water, Population and Communities to determine the need or otherwise for Commonwealth approval and you should not construe this grant of approval as notification to you that the EPBC Act does not have application. The EPBC Act may have application and you should obtain advice about this matter. There are severe penalties for non-compliance with the Commonwealth legislation.

Asbestos Removal

AN8. All excavation and demolition works involving the removal and disposal of asbestos must only be undertaken by contractors who hold a current WorkCover Asbestos or “Demolition Licence” and a current WorkCover “Class 2 (Restricted) Asbestos Licence and removal must be carried out in accordance with NOHSC: “Code of Practice for the Safe Removal of Asbestos”.

Site contamination issues during construction

AN9. Should any new information come to light during demolition or construction works which has the potential to alter previous conclusions about site contamination then the Applicant must be immediately notified and works must cease. Works must not recommence on site until the consultation is made with the Certifying Authority.
