Project title: Design of new topical dosage forms for the treatment of skin conditions

Primary supervisor: Dr Nial Wheate
nial.wheate@sydney.edu.au
+61 2 9036 7647

Co-supervisors: Nil

Project type: Laboratory-based

Research theme: Cancer

Project description:
In this project, the student will apply pharmacy compounding skills to design and develop new, topical creams and lotions for specific skin conditions. The work will be undertaken in the research laboratory of Dr Wheate. No prior knowledge or study is required (beyond the basic skills taught as part of the BPharm degree) prior to starting the summer research project.
