1 Purpose and Application

(1) These provisions give practical effect within the Faculty of Law (“the Faculty”) to the Research Data Management Policy 2014 (“the Policy”) and the Research Data Management Procedures 2015 (“the Procedures”).

(2) These provisions apply to University staff, research students and affiliates in the Faculty.

2 Commencement

These provisions commence on 19 February 2016.

3 Definitions

Words and phrases used in these provisions and not otherwise defined in this document have the meanings they have in the Policy and Procedures.

Note: See clause 6 of the Policy and clause 3 of the Procedures.

4 Identification of research data and primary materials to be retained

(1) The definition of research data and the nature of such data and materials vary greatly across disciplines.

   Note: See also clause 7 of the Policy for a working definition of research data.

(2) Much legal research is based on material which does not match the definition of research data.

   (a) Material outside this definition and which does not meet the criteria outlined in clause 10 of the Policy need not be retained (for example cases and legislative materials, text books, articles and other secondary literature which is publicly available).

   (b) If legal research involves empirical research which generates research data, this should be retained.

(3) When deciding which research data and primary materials to retain, chief investigators and research students (in consultation with their supervisors):

   (a) must determine which research data and primary materials must be retained to justify the outcomes of their research, and if necessary, defend those outcomes against challenge;

   (b) must comply with any conditions concerning retention and storage of research data that are contained in any ethics approval for the research, particularly any confidentiality obligations which attach to the data;

   (c) must retain research data and primary materials in a form that others can...
interpret, including (as appropriate):

(i) survey questions and responses;
(ii) recordings and transcripts of interviews;
(iii) pieces of archival materials which are not otherwise readily accessible to the public (note that some archival materials once copied are made available online – e.g. national archive – so this would not always apply);
(iv) unpublished materials (including online materials) which are liable to disappear over time: e.g. copies of political press releases or speeches;
(v) databases and excel tables;
(vi) descriptive metadata;
(vii) modelling software;
(viii) source data; and
(ix) Any other supplementary materials required to reproduce or verify the outcomes of the research, or enable researchers to re-analyse or use the data;

(d) must identify and record the instruments and software used to generate or analyse the research data; and

(e) should retain copies of the software or source code used to generate or analyse the research data.

Note: See clause 8 and Schedule 2 of these provisions for retention periods.

(4) Chief investigators and research students (in consultation with their supervisors) should retain physical data and primary materials in digital format, where possible, to minimise space and resources required to curate and store them.

(5) Chief investigators and research students (in consultation with their supervisors must document the types of research data and primary materials which will be retained in a Research Data Management Plan (RDMP).

5 Research data management plans (RDMPs)

(1) Research data management plans record the researcher’s plan for storing, retaining and disposing of research data which is acquired or generated in the course of a research project.

Note: See clause 10 of the Procedures.

(2) An RDMP should also record any agreements about ownership and management of research data upon the researcher leaving the University.

(3) Chief investigators and research students (in consultation with their supervisors) should contact their Academic Liaison Librarian for assistance with research data management planning.

Note: See the Library website for contact details.

(4) RDMPs must be created through the University’s online portal, which provides prompts for relevant questions to ask and links to relevant digital data store facilities. This ensures that the RDMP is registered with the Office of the Deputy Vice Chancellor (Research).

Note: See the Research Office website for the online portal.

(5) Chief investigators and research students (in consultation with their supervisors) should retain a copy of their RDMP with their research records.
6 Contacts for research data management training and support

Contacts for research data management training and support are listed in Schedule 1 of these provisions.

7 Ownership of research data and primary materials

(1) The ownership of data and primary materials is as specified in the Policy.

Note: See clause 11 of the Policy

(2) The ownership of research data and primary materials created by researchers and research students in the Faculty may be subject to an agreement with a third party. In such cases, Chief investigators should contact the Director, Research Grants and Contracts for assistance with research collaboration agreements or other research related contracts or agreements.

Note: See the Research Support website, Research Grants and Contracts

(3) Chief investigators and research students (in consultation with their supervisors) should record the creator(s) or collector(s) of research data and materials, and note any applicable research collaboration agreements in their RDMP.

8 Retention of research data, primary materials and research records

(1) All research data must be retained in accordance with clause 9 of the Research Code of Conduct 2013.

(2) Minimum applicable retention periods are listed in Schedule 2 of these provisions.

(3) Research agreements or contracts: chief investigators must be aware of any additional data retention requirements stipulated in their research agreement or contract.

Note: See the Research Agreements Policy 2011.

(4) Challenged results: if the results from research are challenged or are subject to a dispute (including litigation), all relevant data and materials must be retained for at least 6 months after notification by the University that an investigation or dispute has been finalised, regardless of the expiration of any otherwise applicable retention periods.

(5) Chief investigators and research students should document the applicable minimum retention period(s) in their RDMP.

9 Storage of research data and primary materials

(1) Research data must be stored in accordance with clause 6 of the Procedures.

(2) Researchers should implement appropriate security for research data. This may include locks for physical storage, signs indicating who should be contacted regarding storage, and passwords for digital files.

(3) Chief investigators and research students (in consultation with their supervisors) should document the location of physical and digital research data and primary materials in their RDMP.

(4) Researchers and research students should contact the Faculty Research Manager to arrange storage space for physical data and materials that cannot be stored in individual researchers’ offices.
10 Preferred formats

(1) Formats for data retention should be in accordance with clause 8 of the Procedures.

(2) Chief investigators and research students (in consultation with their supervisors) should contact the Library’s Research Data Manager for advice on preferred digital file formats.

Note: See the Research Data Management Guidelines website or contact the Library’s Research Data Manager

(3) Chief investigators and research students (in consultation with their supervisors) should document their choices of file format in their RDMP.

11 Sharing research data and metadata

(1) Chief investigators or research supervisors (with the consent of their research student(s) where required) should plan to make completed research data sets available for re-use as specified in the Policy and Procedures, unless this is prevented by the requirements of legislation or University policy, or ethical, contractual, or confidentiality obligations.

Note: See clause 12 of the Policy and clause 10 of the Procedures. See also Why Share Research Data on the Research Data Management Guidelines website

(2) Subject to sub-clause 11(1) above, research data may be shared at any stage of a research project.

(3) There are many ways to share research data, including (but not limited to):

(a) creating a record for a dataset in the University’s Research Data Registry and advertising that record to Research Data Australia;

(b) depositing completed research datasets in the University’s open access institutional repository, Sydney eScholarship; and

(c) depositing completed research dataset in an open access, mediated access or restricted access discipline repository.

(4) When sharing data to support research publications, chief investigators or research students (in consultation with their research supervisors) may deposit supplementary data sets in a preferred format in the University’s open access institutional repository, and provide a persistent link to their publisher.

(5) Chief investigators or research students (in consultation with their supervisors) should contact the University Manager Repository & Digitisation Services, Sydney eScholarship, University Library for advice on depositing supplementary datasets in the University’s open access repository.

Notes: See the Sydney eScholarship website

(6) Chief investigators and research students (in consultation with their supervisors) should contact the Library’s Research Data Manager for assistance with sharing research data at any stage during or following their research project.

Note: Contact the Library’s Research Data Manager

(7) Chief investigators and research students (in consultation with their supervisors) should document decisions regarding data sharing in their RDMP.
12 Disposal of research data and primary materials

Chief investigators and research students (in consultation with their supervisors) should state their intentions about disposing of data or materials (including sharing, archiving or destruction) in their RDMP.

Note: See clause 10 (5) of the Policy.

13 Retaining and managing data, primary materials and records when a researcher or research student leaves the University

(1) Research students:

(a) At the end of their project, or when they leave the University, research students must:

(i) provide their research supervisor with a copy of the research data, research records and where applicable, primary materials (retained physical materials), in accordance with the arrangements recorded in their RDMP; and

(ii) create a record of those research dataset(s) within the University’s metadata store in accordance with the arrangements recorded in their RDMP.

(b) Research students (in consultation with their supervisors) should contact the relevant Academic Liaison Librarian to create a record for the data.

Note: See the Library website for contact details and see clause 5(2) of these provisions.

(2) Research supervisors must:

(a) ensure the requirements of these provisions are communicated and explained to their research students;

(b) where required by their research students’ RDMPs, obtain a copy of their research students’ research data, research records and any primary materials (retained physical materials) at the end of the project, or when the research student leaves the University;

(c) where required by their research students’ RDMPs, ensure their research students create a record in the University’s metadata store (providing assistance and resources as required);

(d) retain their research students’ research data research records and any primary materials for the minimum retention period; and

(e) at the end of the required retention period, make a recommendation to their Head of School to share, retain, archive or destroy the research data, research records and primary materials. This recommendation must be based upon the record within the University’s Research Data Registry and comply with the requirements of legislation, University policy, and any applicable ethical, contractual, or confidentiality obligations.

Note: See clause 10 (5) of the Policy and clause 5(2) of these provisions.

(3) Researchers:

(a) When a researcher leaves the University, they must:

(i) save a copy of any digital research data which they have retained pursuant to an RDM to the University’s Research Data Store; and

(ii) create a record for those research dataset(s) and any associated primary materials within the University’s Research Data Registry; and
(iii) provide a reference for that record to their chief investigator and the Associate Dean Research.

(b) Researchers should contact their Academic Liaison Librarian to create a record for their dataset(s).

Note: See the Library website for contact details.

(c) At the end of the retention period, the Associate Dean Research must make a recommendation to their Head of School to share, retain, archive or destroy the research data and materials. This recommendation must be based upon the record within the RDMP and subject to the requirements of legislation, University policy and any applicable ethical, contractual or confidentiality obligations.

Note: See clause 10 (5) of the Policy.

NOTES

Faculty of Law Research Data Management Provisions 2016

Date adopted: 5 February 2016
Date commenced: 19 February 2016
Approved by: Acting Dean, Faculty of Law

SCHEDULE 2

RETENTION PERIODS FOR RESEARCH DATA

All research data must be retained in accordance with clause 9 of the Research Code of Conduct 2013. The following retention periods apply to the management of research data and materials within the Faculty.

<table>
<thead>
<tr>
<th>Data type</th>
<th>Retention period</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Machine, instrument or sensor generated data</td>
<td>5 years</td>
<td>The standard <em>minimum</em> retention period for non-human data is five years.</td>
</tr>
<tr>
<td>Source code and computational data, such as binary or ASCII data, software generated data including input parameters, scripts, software versions and samples of output data</td>
<td>5 years</td>
<td>Source code and computational data, such as binary or ASCII data, software generated data including input parameters, scripts, software versions and samples of output data are considered research data within the Faculty, and must be retained as per the provisions of the Policy, the Procedures and these provisions.</td>
</tr>
<tr>
<td>Data involving human research participants</td>
<td>5 years</td>
<td>The minimum retention period for non-clinical research data collected from human participants is normally 5 years or as otherwise specified in the University of Sydney Human Research Ethics Application. For a list of minimum retention periods for other types of data collected from human participants, refer to clause 9 (6) of the <em>Research Code of Conduct 2013</em>.</td>
</tr>
<tr>
<td>Data from clinical trials</td>
<td>15 years</td>
<td>The minimum retention period for research data collected during clinical trials is 15 years or otherwise in accordance with the applicable requirements of the Therapeutic Goods Administration (TGA), or Department of Health and Ageing. Data relating to research subjects who were children at the time it was collected must be retained for the longer of 20 years or until the subject(s) reaches the age of 25.</td>
</tr>
<tr>
<td>Data relating to patent applications</td>
<td>20 years or the life of the patent</td>
<td>Data that relates to any patent applications must be retained for the life of the patent (generally 20 years);</td>
</tr>
