The 712\textsuperscript{th} meeting of the Sydney University Chemical Society will be held on Wednesday, 27\textsuperscript{th} July 2016 in the Lecture Theatre 3 of the Chemistry Building on the campus of the University of Sydney.

**The Francis Lions Memorial Lecture**

‘Applied Coordination Chemistry’

**Professor Richard Robson**

School of Chemistry, The University of Melbourne, Australia.

In this talk one of the versions of the history of the deliberate construction of coordination polymers (aka MOFs) will be presented. These materials promise numerous useful applications, the study of which continues to expand exponentially. Some of the early work at Melbourne, as well as more recent results, will be described.

**Wednesday 27\textsuperscript{th} July, 5:30 pm**

Chemistry Lecture Theatre 3

*Refreshments from 5 pm in the foyer*
