

We invite you to attend the

Breeders walk of pre-breeding research

Come and join us in viewing the University of Sydney's latest pre-breeding research.

Our dedicated pre-breeding and research staff will be available to demonstrate new genetic materials and research. Featured materials will include wheat, field pea, faba bean and chickpea.

The day will consist of walking through key nurseries and crops, with the opportunity to discuss research programs with the scientists.

Tours will encompass:

- CAIGE Project
- Rust resistant materials
- Crown Rot pre-breeding lines
- Heat tolerant and bio-fortified wheat
- Managed Environment Facility, and more

When

Wednesday 4 October 2017
Assemble at main building from 10.00am
Field walks commence at 10.30am
Concluding with lunch at 1.00pm

Where

I.A. Watson Grains Research Centre,
12656 Newell Highway, Narrabri
