

Publications for Matthew Todd

2017

Balasegaram, M., Kolb, P., McKew, J., Menon, J., Olliaro, P., Sablinski, T., Thomas, Z., Todd, M., Torreele, E., Wilbanks, J. (2017). An open source pharma roadmap. *PLoS Medicine*, 14(4), 1-7. [More Information]

Tsang, A., Hashmi, A., Comba, P., Kerscher, M., Chan, B., Todd, M. (2017). N-aryl groups are ubiquitous in cross-dehydrogenative couplings because they stabilize reactive intermediates. *Chemistry: A European Journal*, 23(39), 9313-9318. [More Information]

Wong, J., Todd, M., Rutledge, P. (2017). Recent advances in macrocyclic fluorescent probes for ion sensing. *Molecules*, 22(2), 1-28. [More Information]

Wong, J., Proschogo, N., Todd, M., Rutledge, P. (2017). Selective displacement of a scorpionand triazole ligand from metallocyclam complexes visualised with NMR spectroscopy. *European Journal of Inorganic Chemistry*, 2017 (7), 1075-1086. [More Information]

2016

Counsell, A., Jones, A., Todd, M., Rutledge, P. (2016). A direct method for the N-tetraalkylation of azamacrocycles. *Beilstein Journal of Organic Chemistry*, 12, 2457-2461. [More Information]

Yu, M., Nagalingam, G., Ellis, S., Martinez, E., Sintchenko, V., Spain, M., Rutledge, P., Todd, M., Triccas, J. (2016). Nontoxic metal-cyclam complexes, a new class of compounds with potency against drug-resistant Mycobacterium tuberculosis. *Journal of Medicinal Chemistry*, 59(12), 5917-5921. [More Information]

Williamson, A., Ylioja, P., Robertson, M., Antonova-Koch, Y., Avery, V., Baell, J., Batchu, H., Batra, S., Burrows, J., Bhattacharyya, S., Dean, M., Hungerford, Z., Tarnowski, M., Turner, P., White, L., Todd, M., et al (2016). Open Source Drug Discovery: Highly Potent Antimalarial Compounds Derived from the Tres Cantos Arylpyrroles. *ACS Central Science*, 2(10), 687-701. [More Information]

Smith, C., Todd, M., Patiny, L., Swain, C., Southan, C., Williamson, A., Clark, A. (2016). SCINDR - The SCience INtroDuction Robot that will Connect Open Scientists. *Research Ideas and Outcomes*, 2, 1-9. [More Information]

Wong, J., Ast, S., Yu, M., Flehr, R., Counsell, A., Turner, P., Crisologo, P., Todd, M., Rutledge, P. (2016). Synthesis and evaluation of 1,8-disubstituted-cyclam/naphthalimide conjugates as probes for metal ions. *ChemistryOpen*, 5(4), 375-

385. [More Information]

2015

Yu, M., Wong, J., Tang, C., Turner, P., Todd, M., Rutledge, P. (2015). Efficient deprotection of F-BODIPY derivatives: removal of BF₂ using Bronsted acids. *Beilstein Journal of Organic Chemistry*, 11, 37-41. [More Information]

Badiola, K., Bird, C., Brocklesby, W., Casson, J., Chapman, R., Coles, S., Cronshaw, J., Fisher, A., Frey, J., Gloria, D., Quinnell, R., Robertson, M., Robins, M., Todd, M., Williamson, A., Ylioja, P., et al (2015). Experiences with a researcher-centric ELN. *Chemical Science*, 6(3), 1614-1629. [More Information]

Tsang, A., Park, S., Todd, M. (2015). Mechanisms of Cross-Dehydrogenative-Coupling Reactions. In Chao-Jun Li (Eds.), *From C-H to C-C Bonds: Cross-Dehydrogenative-Coupling*, (pp. 254-294). Cambridge: Royal Society of Chemistry. [More Information]

Todd, M. (2015). Using an open source model to accelerate schistosomiasis drug research. *Future Medicinal Chemistry*, 7(6), 689-692. [More Information]

Ast, S., Kuke, S., Rutledge, P., Todd, M. (2015). Using click chemistry to tune the properties and the fluorescence response mechanism of structurally similar probes for metal ions. *European Journal of Inorganic Chemistry*, 2015 (1), 58-66. [More Information]

2014

Meister, I., Ingram-Sieber, K., Cowan, N., Todd, M., Robertson, M., Meli, C., Patra, M., Gasser, G., Keiser, J. (2014). Activity of Praziquantel Enantiomers and Main Metabolites against Schistosoma mansoni. *Antimicrobial Agents and Chemotherapy*, 58(9), 5466-5472. [More Information]

Badiola, K., Quan, D., Triccas, J., Todd, M. (2014). Efficient synthesis and anti-tubercular activity of a series of spirocycles: An exercise in open science. *PLoS One*, 9(12), 1-20. [More Information]

Yu, M., Ast, S., Yu, Q., Lo, A., Flehr, R., Todd, M., Rutledge, P. (2014). Incorporating a piperidinyl group in the fluorophore extends the fluorescence lifetime of click-derived cyclam-naphthalimide conjugates. *PLoS One*, 9(7), 1-12. [More Information]

Todd, M. (2014). Introduction: A Survey of How and Why to Separate Enantiomers. In Matthew Todd (Eds.), *Separation of Enantiomers: Synthetic Methods*, (pp. 1-11). Weinheim, Germany: Wiley - VCH Verlag GmbH & Co. KGaA. [More Information]

<http://dx.doi.org/10.1002/9783527650880.ch1>>[More Information]

Yu, M., Ryan, T., Ellis, S., Bush, A., Triccas, J., Rutledge, P., Todd, M. (2014). Neuroprotective peptide-macrocyclic conjugates reveal complex structure-activity relationships in their interactions with amyloid beta. *Metallomics*, 6(10), 1931-1940. [More Information]

Robertson, M., Ylloja, P., Williamson, A., Woelfle, M., Robins, M., Badiola, K., Willis, P., Oliario, P., Wells, T., Todd, M. (2014). Open source drug discovery - A limited tutorial. *Parasitology*, 141(1), 148-157. [More Information]

Ast, S., Rutledge, P., Todd, M. (2014). pH-Responsive quantum dots (RQDs) that combine a fluorescent nanoparticle with a pH-sensitive dye. *Physical Chemistry Chemical Physics*, 16(46), 25255-25257. [More Information]

Todd, M. (2014). Rare, Neglected and Potential Synthetic Methods for the Separation of Enantiomers. In Matthew Todd (Eds.), *Separation of Enantiomers: Synthetic Methods*, (pp. 267-290). Weinheim, Germany: Wiley - V C H Verlag GmbH & Co. KGaA. [More Information]

Todd, M., Maddani, M., Fiaud, J., Kagan, H., Pellissier, H., Humphrey, C., Ahmed, M., Ghanem, A., Turner, N., Nakano, K., et al (2014). *Separation of Enantiomers: Synthetic Methods*. Weinheim, Germany: Wiley - V C H Verlag GmbH & Co. KGaA.

Ast, S., Rutledge, P., Todd, M. (2014). The properties and performance of a pH-responsive functionalised nanoparticle. *Faraday Discussions*, 175, 171-187. [More Information]

Parker, P., Schwendimann, B., Thompson, K., Todd, M. (2014). The Synaptic Leap: Open science combating disease. In Lucila Carvalho, Peter Goodyear (Eds.), *The architecture of productive learning networks*, (pp. 193-208). New York: Routledge. [More Information]

2013

Yu, M., Yu, Q., Rutledge, P., Todd, M. (2013). A fluorescent "allosteric scorpionand" complex visualizes a biological recognition event. *ChemBioChem*, 14(2), 224-229. [More Information]

Tsang, A., Ingram, K., Keiser, J., Hibbert, D., Todd, M. (2013). Enhancing the usefulness of cross dehydrogenative coupling reactions with a removable protecting group. *Organic and Biomolecular Chemistry*, 11(30), 4921-4924. [More Information]

Patra, M., Ingram, K., Leonidova, A., Pierroz, V., Ferrari, S., Robertson, M., Todd, M., Keiser, J., Gasser, G. (2013). In Vitro Metabolic Profile and in Vivo Antischistosomal Activity Studies of (eta6-Praziquantel)Cr(CO)3 Derivatives. *Journal of Medicinal Chemistry*, 56(22), 9192-9198. [More Information]

Yu, M., Lim, N., Ellis, S., Nagase, H., Triccas, J., Rutledge, P.,

Todd, M. (2013). Incorporation of bulky and cationic cyclam-triazole moieties into marimastat can generate potent MMP inhibitory activity without inducing cytotoxicity. *ChemistryOpen*, 2(3), 99-105. [More Information]

Todd, M., Wells, T., Willis, P., Oliario, P., Avery, V., Ralph, S., Gamo, J., Charman, S., Ylloja, P., Robertson, M., Williamson, A., et al (2013). Open source drug discovery for malaria. *8th European Congress on Tropical Medicine and International Health and 5th Conference of the Scandinavian-Baltic Society for Parasitology*, Europe: John Wiley & Sons.

Csok, Z., Kegl, T., Li, Y., Skoda-Foldes, R., Kiss, L., Kunsagi-Mate, S., Todd, M., Kollar, L. (2013). Synthesis of elongated cavitands via click reactions and their use as chemosensors. *Tetrahedron*, 69(38), 8186-8190. [More Information]

Masum, H., Rao, A., Good, B., Todd, M., Edwards, A., Chan, L., Bunin, B., Su, A., Thomas, Z., Bourne, P. (2013). Ten simple rules for cultivating open science and collaborative R&D. *PLoS Computational Biology*, 9(9), e1003244-1-e1003244-4. [More Information]

2012

Park, S., Price, J., Todd, M. (2012). Oxidative arylation of isochroman. *The Journal of Organic Chemistry*, 77(2), 949-955. [More Information]

Ast, S., Rutledge, P., Todd, M. (2012). Reversing the triazole topology in a cyclam-triazole-dye ligand gives a 10-fold brighter signal response to Zn(2+) in aqueous solution. *European Journal of Inorganic Chemistry*, 2012 (34), 5611-5615. [More Information]

Amarasinghe, N., Turner, P., Todd, M. (2012). The first catalytic, enantioselective aza-Henry reaction of an unactivated cyclic imine. *Advanced Synthesis and Catalysis*, 354(16), 2954-2958. [More Information]

Ahamed, M., Chan, B., Jensen, P., Todd, M. (2012). The outcome of the oxidations of unusual enediamide motifs is governed by the stabilities of the intermediate iminium ions. *PloS One*, 7(10), 1-7. [More Information]

2011

Lau, Y., Price, J., Todd, M., Rutledge, P. (2011). A Click Fluorophore Sensor that Can Distinguish Cu(II) and Hg(II) via Selective Anion-Induced Demetallation. *Chemistry: A European Journal*, 17(10), 2850-2858. [More Information]

Bridgeman, A., Rutledge, P., Todd, M., Connor, R. (2011). A treasure hunt for chemistry. *Journal of Chemical Education*, 88(4), 437-439. [More Information]

Tsang, A., Jensen, P., Hook, J., Hashmi, A., Todd, M. (2011). An oxidative carbon-carbon bond-forming reaction proceeds

via an isolable iminium ion. *Pure and Applied Chemistry*, 83(3), 655-665. [More Information]

Lau, Y., Rutledge, P., Watkinson, M., Todd, M. (2011). Chemical sensors that incorporate click-derived triazoles. *Chemical Society Reviews*, 40(5), 2848-2866. [More Information]

Yu, M., Price, J., Jensen, P., Lovitt, C., Shelper, T., Duffy, S., Windus, L., Avery, V., Rutledge, P., Todd, M. (2011). Copper, nickel, and zinc cyclam-amino acid and cyclam-peptide complexes may be synthesized with "click" chemistry and are noncytotoxic. *Inorganic Chemistry*, 50(24), 12823-12835. [More Information]

Woelfle, M., Olliaro, P., Todd, M. (2011). Open science is a research accelerator. *Nature Chemistry*, 3(10), 745-748. [More Information]

Lo, A., Salam, N., Hibbs, D., Rutledge, P., Todd, M. (2011). Polyamide-Scorpion Cyclam Lexitropsins Selectively Bind AT-Rich DNA Independently of the Nature of the Coordinated Metal. *PLoS One*, 6(5), e17446-1-e17446-13. [More Information]

Woelfle, M., Seerden, J., de Gooijer, J., Pouwer, K., Olliaro, P., Todd, M. (2011). Resolution of praziquantel. *PLoS Neglected Tropical Diseases*, 5(9), 1-7. [More Information]

Anam, S., Todd, M. (2011). Target-activated metal complex (TaMC) as a new strategy for artificial metallonucleases. *242nd National Meeting of the American Chemical Society (ACS)*, USA: American Chemical Society.

2010

Ahamed, M., Thirukkumaran, T., Leung, W., Jensen, P., Schroers, J., Todd, M. (2010). Aza-Henry reactions of 3,4-dihydroisoquinoline. *European Journal of Organic Chemistry*, 2010 (31), 5980-5988. [More Information]

Ahamed, M., Todd, M. (2010). Catalytic asymmetric additions of carbon-centered nucleophiles to nitrogen-containing aromatic heterocycles. *European Journal of Organic Chemistry*, 2010 (31), 5935-5942. [More Information]

Tamanini, E., Flavin, K., Motevalli, M., Piperno, S., Gheber, L., Todd, M., Watkinson, M. (2010). Cyclam-based "clickates": Homogeneous and heterogeneous fluorescent sensors for Zn(II). *Inorganic Chemistry*, 49(8), 3789-3800. [More Information]

Quinnell, R., Hibbert, D., Frey, J., Duffy, N., Mocerino, M., Todd, M., Niamsup, P., Plummer, A., Milsted, A. (2010). Extending the science curriculum: teaching instrumental science at a distance in a global laboratory using a collaborative Electronic Laboratory Notebook. *Learning Technology Research Fest 2010*, Not published: Centre for Research on Computer Supported Learning and Cognition, University of Sydney.

Hashmi, A., Ramamurthi, T., Todd, M., Tsang, A., Graf, K. (2010). Gold-catalysis: Reactions of organogold compounds with electrophiles. *Australian Journal of Chemistry*, 63(12),

1619-1626. [More Information]

Hibbert, D., Frey, J., Quinnell, R., Mocerino, M., Todd, M., Niamsup, P., Plummer, A., Milsted, A. (2010). Teaching instrumental science globally using a collaborative electronic laboratory notebook. *16th UniServe Science Annual Conference 2010*, Sydney: University of Sydney.

2009

Orti, L., Carbajo, R., Pieper, U., Eswar, N., Maurer, S., Rai, A., Taylor, G., Todd, M., Pineda-Lucena, A., Sali, A., et al (2009). A kernel for open source drug discovery in tropical diseases. *PLoS Neglected Tropical Diseases*, 3(4), e418-1-e418-10. [More Information]

Orti, L., Carbajo, R., Pieper, U., Eswar, N., Maurer, S., Rai, A., Taylor, G., Todd, M., Pineda-Lucena, A., Sali, A., et al (2009). A kernel for the tropical disease initiative. *Nature Biotechnology*, 27(4), 320-321. [More Information]

Tamanini, E., Katewa, A., Sedger, L., Todd, M., Watkinson, M. (2009). A synthetically simple, click-generated cyclam-based zinc(II) sensor. *Inorganic Chemistry*, 48(1), 319-324. [More Information]

El-Fayyomy, S., Todd, M., Richards, C. (2009). Can we measure catalyst efficiency in asymmetric chemical reactions? A theoretical approach. *Beilstein Journal of Organic Chemistry*, 5, A67-1-A67-5. [More Information]

Caffrey, C., Williams, D., Todd, M., Nelson, D., Keiser, J., Utzinger, J. (2009). Chemotherapeutic Development Strategies for Schistosomiasis. In Paul M. Selzer (Eds.), *Antiparasitic and Antibacterial Drug Discovery: From Molecular Targets to Drug Candidates*, (pp. 301-321). Weinheim, Germany: Wiley - VCH Verlag GmbH & Co. KGaA. [More Information]

Todd, M. (2009). Drug discovery and synthesis using an open source approach. *Plant Nutraceuticals and Bioactive Molecules: A Growth Opportunity for the Pharmaceutical Industry in Australia and India*, N/A: N/A.

Luck, I., Bova, F., Todd, M. (2009). Dynamic NMR studies of the hindered amide bond rotation of Enediamicides. *SMASH 2009 Small Molecule NMR Conference*.

Tsang, A., Todd, M. (2009). Facile synthesis of vicinal diamines via oxidation of N-phenyltetrahydroisoquinolines with DDQ. *Tetrahedron Letters*, 50(11), 1199-1202. [More Information]

Tamanini, E., Rigby, S., Motevalli, M., Todd, M., Watkinson, M. (2009). Responsive metal complexes: A click-based "allosteric scorpionate" complex permits the detection of a biological recognition event by EPR/ENDOR spectroscopy. *Chemistry: A European Journal*, 15(15), 3720-3728. [More Information]

Todd, M. (2009). The chemical tale of a flawed wonder drug and how we can all make it better. *2nd Sino-Australian Symposium*, N/A: N/A.

Todd, M. (2009). Towards a low-cost, sustainable synthesis of

an important drug with an open source approach. *Catalysis: A Major Key to Sustainability 2005*, N/A: N/A.

2008

Ramana, A., Watkinson, M., Todd, M. (2008). Synthesis and DNA binding ability of cyclam-amino acid conjugates. *Bioorganic and Medicinal Chemistry Letters*, 18(9), 3007-3010. [More Information]

2007

Krivickas, S., Tamanini, E., Todd, M., Watkinson, M. (2007). Effective methods for the biotinylation of azamacrocycles. *The Journal of Organic Chemistry*, 72(22), 8280-8289. [More Information]

Troiani, A., Pica-Mattoccia, L., Valle, C., Cioli, D., Mignogna, G., Ronketti, F., Todd, M. (2007). Is actin the praziquantel receptor? *International Journal of Antimicrobial Agents*, 30(3), 280-281. [More Information]

Todd, M. (2007). Open access and open source in chemistry. *Chemistry Central Journal*, 1(3), 1-4. [More Information]

Ronketti, F., Adi, V., Chao-Ming, X., Pica-Mattoccia, L., Cioli, D., Todd, M. (2007). Praziquantel derivatives I: Modification of the aromatic ring. *Bioorganic and Medicinal Chemistry Letters*, 17(15), 4154-4157. [More Information]

2006

Todd, M., Motevalli, M., El-Fayyoumy, S., Richards, C. (2006). (R)-2-ferrocenyl-4-hydroxymethyl-4,5-dihydro-1,3-oxazole. *Acta Crystallographica. Section E: Structure Reports Online*, 62, M719-M720. [More Information]

Ismail, M., Barker, S., Abou El Ella, D., Abouzid, K., Toubar, R., Todd, M. (2006). Design and synthesis of new tetrazolyl- and carboxy-biphenylmethyl-quinazolin-4-one derivatives as angiotensin II AT(1) receptor antagonists. *Journal of Medicinal Chemistry*, 49(5), 1526-1535. [More Information]

Tamanini, E., Watkinson, M., Todd, M. (2006). Improved synthesis of the valuable peptidomimetic intermediate 3-azido-4-hydroxy cyclopentanoic acid. *Tetrahedron-Asymmetry*, 17(15), 2235-2239. [More Information]

Kepler, T., Marti-Renom, M., Maurer, S., Rai, A., Taylor, G., Todd, M. (2006). Open source research - the power of us. *Australian Journal of Chemistry*, 59(5), 291-294. [More Information]

El-Fayyoumy, S., Mansour, W., Todd, M. (2006). Solid phase synthesis of praziquantel. *Tetrahedron Letters*, 47(8), 1287-1290. [More Information]

Kusel, J., Oliveira, F., Todd, M., Ronketti, F., Lima, S., Mattos, A., Reis, K., Coelho, P., Thornhill, J., Ribeiro, F. (2006). The

effects of drugs, ions, and poly-l-lysine on the excretory system of *Schistosoma mansoni*. *Instituto Oswaldo Cruz, Rio de Janeiro. Memorias*, 101(1), 293-298. [More Information]

2005

Todd, M. (2005). Computer-aided organic synthesis. *Chemical Society Reviews*, 34(3), 247-266. [More Information]

Todd, M. (2005), *The synaptic leap - an open source collaborative biomedical research portal*.

2003

Fenwick, A., Savioli, L., Engels, D., Bergquist, N., Todd, M. (2003). Drugs for the control of parasitic diseases: current status and development in schistosomiasis. *Trends in Parasitology*, 19(11), 509-515. [More Information]

2002

Todd, M., Ndubaku, C., Bartlett, P. (2002). Amino acid derived heterocycles: Lewis acid catalyzed and radical cyclizations from peptide acetals. *The Journal of Organic Chemistry*, 67(12), 3985-3988. [More Information]

Todd, M. (2002). Asymmetric autocatalysis: product recruitment for the increase in the chiral environment (PRICE). *Chemical Society Reviews*, 31(4), 211-222. [More Information]

Todd, M., Abell, C. (2002). The use of FTICR-MS to detect chemical tags from a combinatorial library. *Analyst*, 127(11), 1399-1406. [More Information]

2001

Todd, M., Abell, C. (2001). Novel chemical tagging method for combinatorial synthesis utilizing Suzuki chemistry and Fourier transform ion cyclotron resonance mass spectrometry. *ACS Combinatorial Science*, 3(3), 319-327.
