

Publications for Thomas Ferenci

2017

Maharjan, R., Ferenci, T. (2017). A shifting mutational landscape in 6 nutritional states: Stress-induced mutagenesis as a series of distinct stress input; 1/2mutation output relationships. *PLoS Biology*, 15(6), 1-22. [More Information]

Liu, B., Eydallin, G., Maharjan, R., Feng, L., Wang, L., Ferenci, T. (2017). Natural Escherichia coli isolates rapidly acquire genetic changes upon laboratory domestication. *Microbiology*, 163, 22-30. [More Information]

Maharjan, R., Ferenci, T. (2017). The fitness costs and benefits of antibiotic resistance in drug-free microenvironments encountered in the human body. *Environmental Microbiology Reports*, 9(5), 635-641. [More Information]

Phan, K., Ferenci, T. (2017). The fitness costs and trade-off shapes associated with the exclusion of nine antibiotics by OmpF porin channels. *The ISME Journal*, 11, 1472-1482. [More Information]

2016

Maharjan, R., Ferenci, T. (2016). Metastable coexistence of multiple genotypes in a constant environment with a single resource through fixed settings of a multiplication-survival trade-off. *Research in Microbiology*, 167(3), 240-246. [More Information]

Ferenci, T. (2016). Trade-off Mechanisms Shaping the Diversity of Bacteria. *Trends in Microbiology*, 24(3), 209-223. [More Information]

2015

Ferenci, T., Phan, K. (2015). How porin heterogeneity and trade-offs affect the antibiotic susceptibility of gram-negative bacteria. *Genes*, 6(4), 1113-1124. [More Information]

Ferenci, T., Maharjan, R. (2015). Mutational heterogeneity: A key ingredient of bet-hedging and evolutionary divergence?: The broad spectrum of mutations and their flexible frequency in populations provides a source of risk avoidance and alternative evolutionary strategies. *BioEssays*, 37(2), 123-130. [More Information]

Maharjan, R., Ferenci, T. (2015). Mutational Signatures Indicative of Environmental Stress in Bacteria. *Molecular Biology and Evolution*, 32(2), 380-391. [More Information]

Maharjan, R., Liu, B., Feng, L., Ferenci, T., Wang, L. (2015). Simple Phenotypic Sweeps Hide Complex Genetic Changes in Populations. *Genome Biology and Evolution*, 7(2), 531-544.

[More Information]

2014

Behrends, V., Maharjan, R., Ryall, B., Feng, L., Liu, B., Wang, L., Bundy, J., Ferenci, T. (2014). A metabolic trade-off between phosphate and glucose utilization in Escherichia coli. *Molecular BioSystems*, 10(11), 2820-2822. [More Information]

Maharjan, R., Ferenci, T. (2014). Stress-Induced Mutation Rates Show a Sigmoidal and Saturable Increase Due to the RpoS Sigma Factor in Escherichia coli. *Genetics*, 198(3), 1231-1235. [More Information]

Ferenci, T. (2014). Survival of the Different. *Australasian Science*, , 32-33.

Eydallin, G., Ryall, B., Maharjan, R., Ferenci, T. (2014). The nature of laboratory domestication changes in freshly isolated Escherichia coli strains. *Environmental Microbiology*, 16(3), 813-828. [More Information]

2013

Maharjan, R., GaffÃ©, J., Plucain, J., Schliep, M., Wang, L., Feng, L., Tenaillon, O., Ferenci, T., Schneider, D. (2013). A case of adaptation through a mutation in a tandem duplication during experimental evolution in Escherichia coli. *BMC Genomics*, 14(1), 1-12. [More Information]

Phan, K., Ferenci, T. (2013). A design-constraint trade-off underpins the diversity in ecologically important traits in species Escherichia coli. *The ISME Journal*, 7(10), 2034-2043. [More Information]

Maharjan, R., Ferenci, T. (2013). Epistatic interactions determine the mutational pathways and coexistence of lineages in clonal Escherichia coli populations. *Evolution*, 67(9), 2762-2768. [More Information]

Maharjan, R., Liu, B., Li, Y., Reeves, P., Wang, L., Ferenci, T. (2013). Mutation accumulation and fitness in mutator subpopulations of Escherichia coli. *Biology Letters*, 9(1), 1-5. [More Information]

Maharjan, R., McKenzie, C., Yeung, A., Ferenci, T. (2013). The basis of antagonistic pleiotropy in hfq mutations that have opposite effects on fitness at slow and fast growth rates. *Heredity*, 110(1), 10-18. [More Information]

Maharjan, R., Nilsson, S., Sung, J., Haynes, K., Beardmore, R., Hurst, L., Ferenci, T., Gudelj, I. (2013). The form of a trade-off determines the response to competition. *Ecology Letters*, 16(10), 1267-1276. [More Information]

Information]

2012

Ryall, B., Eydallin, G., Ferenci, T. (2012). Culture history and population heterogeneity as determinants of bacterial adaptation: the adaptomics of a single environmental transition. *Microbiology and Molecular Biology Reviews*, 76(3), 597-625. [More Information]

Schliep, M., Ryall, B., Ferenci, T. (2012). The identification of global patterns and unique signatures of proteins across 14 environments using outer membrane proteomics of bacteria. *Molecular BioSystems*, 8(11), 3017-3027. [More Information]

Maharjan, R., Ferenci, T., Reeves, P., Li, Y., Liu, B., Wang, L. (2012). The multiplicity of divergence mechanisms in a single evolving population. *Genome Biology*, 13(6), 1-16. [More Information]

2011

Gaffe, J., McKenzie, C., Maharjan, R., Coursange, E., Ferenci, T., Schneider, D. (2011). Insertion Sequence-Driven Evolution of Escherichia coli in Chemostats. *Journal of Molecular Evolution*, 72(4), 398-412. [More Information]

Ferenci, T., Galbiati, H., Betteridge, T., Phan, K., Spira, B. (2011). The constancy of global regulation across a species: the concentrations of ppGpp and RpoS are strain-specific in Escherichia coli. *BMC Microbiology*, 11, 1-11. [More Information]

Spira, B., de Almeida Toledo, R., Maharjan, R., Ferenci, T. (2011). The uncertain consequences of transferring bacterial strains between laboratories - rpoS instability as an example. *BMC Microbiology*, 11, 1-9. [More Information]

2010

Gudelj, I., Weitz, J., Ferenci, T., Horner-Devine, M., Marx, C., Meyer, J., Forde, S. (2010). An integrative approach to understanding microbial diversity: from intracellular mechanisms to community structure. *Ecology Letters*, 13, 1073-1084. [More Information]

Wang, L., Spira, B., Zhou, Z., Feng, L., Maharjan, R., Li, X., Li, F., McKenzie, C., Reeves, P., Ferenci, T. (2010). Divergence Involving Global Regulatory Gene Mutations in an Escherichia Coli Population Evolving under Phosphate Limitation. *Genome Biology and Evolution*, 2(1), 478-487. [More Information]

Maharjan, R., Zhou, Z., Ren, Y., Li, Y., GaffÃ©, J., Schneider, D., McKenzie, C., Reeves, P., Ferenci, T., Wang, L. (2010). Genomic Identification of a Novel Mutation in hfq That Provides Multiple Benefits in Evolving Glucose-Limited Populations of Escherichia coli. *Journal of Bacteriology*, 192(17), 4517-4521. [More Information]

Levert, M., Zamfir, O., Clermont, O., Bouvet, O., Lespinats, S., Hipeaux, M., Branger, C., Picard, B., Saint-Ruf, C., Norel, F.,

Phan, K., Ferenci, T., et al (2010). Molecular and Evolutionary Bases of Within-Patient Genotypic and Phenotypic Diversity in Escherichia coli Extraintestinal Infections. *PLoS Pathogens*, 6(9), e1001125-1-e1001125-19. [More Information]

2009

Ferenci, T., Yee, K., Betteridge, T., Ren, Y., Liu, Y., Feng, L., Reeves, P., Wang, L. (2009). Genomic sequencing reveals regulatory mutations and recombinational events in the widely used MC4100 lineage of Escherichia coli K-12. *Journal of Bacteriology*, 191(12), 4025-4029. [More Information]

2008

Spira, B., Ferenci, T. (2008). Alkaline phosphatase as a reporter of sigma(S) levels and rpoS polymorphisms in different E. coli strains. *Archives of Microbiology*, 189(1), 43-47. [More Information]

Spira, B., Hu, X., Ferenci, T. (2008). Strain variation in ppGpp concentration and RpoS levels in laboratory strains of Escherichia coli K-12. *Microbiology*, 154(9), 2887-2895. [More Information]

2007

Ferenci, T. (2007). Bacterial Physiology, Regulation and Mutational Adaptation in a Chemostat Environment. *Advances in Microbial Physiology*, 53, 169-229, 315. [More Information]

Maharjan, R., Seeto, S., Ferenci, T. (2007). Divergence and redundancy of transport and metabolic rate-yield strategies in a single Escherichia coli population. *Journal of Bacteriology*, 189(6), 2350-2358. [More Information]

Ferenci, T. (2007). Sensing nutrient levels in bacteria. *Nature Chemical Biology*, 3(10), 607-608. [More Information]

van der Werf, M., Takors, R., Smedsgaard, J., Nielsen, J., Ferenci, T., Portais, J., Wittmann, C., Hooks, M., Tomassini, A., Oldiges, M., et al (2007). Standard reporting requirements for biological samples in metabolomics experiments: microbial and in vitro biology experiments. *Metabolomics*, 3(3), 189-194. [More Information]

Ferenci, T. (2007). The spread of a beneficial mutation in experimental bacterial populations: the influence of the environment and genotype on the fixation of rpoS mutations. *Heredity*, 1, 1-7. [More Information]

Ferenci, T., Spira, B. (2007). Variation in Stress Responses within a Bacterial Species and the Indirect Costs of Stress Resistance. *Annals of the New York Academy of Sciences*, 1113, 105-113. [More Information]

2006

Ferenci, T. (2006). A cultural divide on the use of chemostats. *Microbiology*, 152(5), 1247-1248. [More Information]

Maharjan, R., Seeto, S., McRobb, L., Ferenci, T. (2006). Clonal Adaptive Radiation in a Constant Environment. *Science*, 313(5786), 514-517. [More Information]

King, T., Seeto, S., Ferenci, T. (2006). Genotype-by-environment interactions influencing the emergence of rpoS mutations in Escherichia coli populations. *Genetics*, 172(4), 2071-2079. [More Information]

2005

Ferenci, T., Maharjan, R. (2005). Comparative metabolome profiling using two dimensional thin layer chromatography (2DTLC). In Vaidyanathan S; Harrigan G; Goodacre R (Eds.), *Metabolome Analyses - Strategies for Systems Biology*, (pp. 63-81). USA: Springer Science+Business Media.

King, T., Ferenci, T. (2005). Divergent roles of RpoS in Escherichia coli under aerobic and anaerobic conditions. *FEMS Microbiology Letters*, 244(2), 323-327. [More Information]

Ferenci, T. (2005). Maintaining a healthy SPANC balance through regulatory and mutational adaptation. *Molecular Microbiology*, 57(1), 1-8. [More Information]

Maharjan, R., Ferenci, T. (2005). Metabolomic diversity in the species Escherichia coli and its relationship to genetic population structure. *Metabolomics*, 1(3), 235-242. [More Information]

Maharjan, R., Yu, P., Seeto, S., Ferenci, T. (2005). The role of isocitrate lyase and the glyoxylate cycle in Escherichia coli growing under glucose limitation. *Research in Microbiology*, 156(2), 178-183. [More Information]

2004

King, T., Ishihama, A., Kori, A., Ferenci, T. (2004). A Regulatory Trade-Off As A Source Of Strain Variation In The Species Escherichia Coli. *Journal of Bacteriology*, 186(17), 5614-5620. [More Information]

Seeto, S., McRobb, L., Ferenci, T. (2004). The Multifactorial Influences Of Rpos, Mlc And cAMP On PtsG Expression Under Glucose-Limited And Anaerobic Conditions. *Research in Microbiology*, 155(3), 211-215. [More Information]

2003

Maharjan, R., Ferenci, T. (2003). Global metabolite analysis: the influence of extraction methodology on metabolome profiles of Escherichia coli. *Analytical Biochemistry*, 313(1), 145-154. [More Information]

Tsunedomi, R., Izu, H., Kawai, T., Matsushita, K., Ferenci, T., Yamada, M. (2003). The activator of GntII genes for gluconate

metabolism, GntH exerts negative control of GntR-Regulated GntI genes in Escherichia coli. *Journal of Bacteriology*, 185(6), 1783-1795. [More Information]

King, T., Ferenci, T., Szabo, E. (2003). The effect of growth atmosphere on the ability of Listeria monocytogenes to survive exposure to acid, proteolytic enzymes and bile salts. *International Journal of Food Microbiology*, 84(2), 133-143. [More Information]

McRobb, L., Seeto, S., Ferenci, T. (2003). The Influence of Cellular Physiology on the Initiation of Mutational Pathways in Escherichia coli Populations. *Proceedings of the Royal Society B: Biological Sciences*, 270(1517), 843-848.

Ferenci, T. (2003). What is driving the acquisition of mutS and rpoS polymorphisms in Escherichia coli? *Trends in Microbiology*, 11(10), 457-461. [More Information]

2002

McRobb, L., Seeto, S., Ferenci, T. (2002). Enrichment and elimination of mutY mutators in Escherichia coli populations. *Genetics*, 162(3), 1055-1062.

McRobb, L., Pinto (Pinto-Nadanachandran), R., Seeto, S., Ferenci, T. (2002). Regulation of mutY and nature of mutator mutations in Escherichia coli populations under nutrient limitation. *Journal of Bacteriology*, 184(3), 739-745.

McRobb, L., King, T., Ferenci, T. (2002). RpoS mutations and loss of general stress resistance in Escherichia coli populations as a consequence of conflict between competing stress responses. *Journal of Bacteriology*, 184(3), 806-811.

Schlegel, A., Danot, O., Richet, E., Ferenci, T., Boos, W. (2002). The N terminus of the Escherichia coli transcription activator MalT is the domain of interaction with MalY. *Journal of Bacteriology*, 184(11), 3069-3077.

2001

Liu, X., Ferenci, T. (2001). An analysis of multifactorial influences on the transcriptional control of ompF and ompC porin expression under nutrient limitation. *Microbiology*, 147, 2981-2989.

Ferenci, T. (2001). Hungry bacteria - definition and properties of a nutritional state. *Environmental Microbiology*, 3, 605-611. [More Information]
