

ACCESSIBLE PDFS

THE UNIVERSITY OF
SYDNEY

This September, UPS introduces Accessible PDF's - our new eCommunication solution that will convert your existing PDF's and make it accessible to a wider audience. Our team will work with you to make your existing PDF documents WCAG 2.0 (Web Content Accessibility Guideline) compliant.

WHAT ARE ACCESSIBLE PDF'S?

Accessible PDF's are documents that can be read by a wider audience especially people with disabilities. At UPS, we focus on making your documents accessible to individuals with visual impairments. We will do this by adding a logical structure and reading order to your PDF's. Figures, form fields and links will be alternated with text descriptions and additional navigational aids – links, bookmarks and embedded links will be added to offer readers an interactive and enriching experience.

WHY USE UPS?

- Quick turnaround times (less than 1 week)
- Affordable pricing
- Compliance with the University of Sydney's's Disability Action Plan
- Compliance to WCAG 2.0 (Web Content Accessibility Guideline)

Contact our Client Service Team - Robert and Patrick to discuss your queries or offer advice on Accessible PDF's.
